Hochtief to raise its stake in rival **Philipp Holzmann**

Europe's Business Nevispap

Hochtief, Germany's second biggest construction company, said it would increase its staka in rival Philipp Holzmann, fuelling speculation about a possible takeover. The purchase of a further 10 per cent would make Hochtief the biggest shareholder in Holzmann, lifting its stake to 28.7 per cent. Hochtief said the purchase was designed to increase co-operation between the companies on the international market. Page 21; Lex, Page 20

Washington hopes boosted by signs of co-operation from ruling junta

Peaceful US landing in Haiti

By James Harding in Port-au-Prince and

The first contingent of US troops arrived without meeting opposition in Haiti yesterday on a mission President Bill Clinton defined as "limited in time and

Optimism in Washington was boosted by signs from the Haltian capital Port-au-Prince that Lt Gen Raoul Cédras, the military ruler, was co-operating with US military commanders in ensuring an uncontested US landing.

Retired general Colin Powell, previous head of the US joint chiefs of staff and a key figure in the negotiating mission led by former US president Jimmy Carter, said this was early evidence that the military junta was prepared to live up to the letter of the agreement.

Yesterday's deal between the US delegation and the Haitian military rulers was reached at the last minute on Sunday night local time, as the first US airborne invasion troops were on their way to Haiti from their US bases, it stipulated that the mem-bers of the junta would quit no later than October 15 and paved the way for what it is boped will be a peaceful intervention in Haiti by US forces.

The first US troops from the Tenth Mountain Division began

landing by helicopter from the aircraft carrier USS Eisenhower. US officials said 6,000 would be in position by the end of the day and 15,000, the maximum deployment envisaged, by the end of the

A succession of belicopters, followed by fixed-wing aircraft. swung low over Port-an-Prince bay and skimmed over the tree

tops into the civilian airport north of the city. Gen Hugh Shelton, the com-

mander of the US armed forces in Haiti, landed to discuss with Gen Cédras the details of co-operation between the occupation force and the Haitian military. The meeting was reported by Mr Carter in Washington as having been "exceedingly successful" and Gen

Shelton emerged saying that "the

Haitians are our friends". The general's emphasis on co-operation was echoed at volume by the US helicopters which circled over the hills of the city with loudspeakers blaring in Cre-ole, "This is not an invasion, we are here to work with the Haitian army. This is not an invasion". Mr Clinton meanwhile stressed

that the force's immediate mission was "to make sure the leaders keep their word". The president and members of the US delegation acknowledged that the agreement placed the junta under no obligation to leave the

quished power. This has caused open concern among advisers to Fr Jean-Ber-

trand Aristide, ousted as president in the 1991 coup. Mr Randall Robinson, the Wasbington human rights activist whose hunger strike earlier this year clearly influenced US policies, said the agreement was "terribly flawed". Senator Robert Dole, the Republican leader and a fierce island once they bad relin-

Reports and analysis, Page 8

Monetary union timetable too tight, say banks

By John Gapper in London and

European hanks warned yesterday that European monetary union will be impossible before the next century because they will need at least five years to plan for a single currency after the Emu starting date is announced.

The warning came as European Union finance ministers admitted that all but two EU members were in breach of the Maastricht treaty's rules on excessiva budget deficits and government debt, two of the most exacting criteria for achieving Emu.

Members of the European Banking Federation said that they had warned the European Commission that the switch from

of the European currency unit would require longer than officials anticipated.

The federation is currently surveying banks in EU member countries to provide evidence to the Commission that Emu will take several years to implement. The results of the survey should be presented by the end of the

The Emu timetable calls for "rapid introduction" of the Ecu as the single currency following the start of the third stage of Emu, when exchange rates are locked. This is due to take place between the start of 1997 and the

start of 1999. Mr Alan Kettley, chairman of the federation's committee on Emu, said Commission officials appeared "still wedded to their timetable" but banks were trying fixed exchange rates to sole use

to persuade them the technical changes required were too large. Mr Kettley said banks would prefer a "hig bang" approach, under which participating coun-

tries switched from their domestic currencies to the Ecu rather than having a dual currency system for a period. He said that large retail banks to make technical changes such

would require considerable time as altering cash machines and computer software. It would be bound to take much longer than switches such as British currency decimalisation.

Leaders of the British Bankers' Association said they would prefer the UK to participate in monetary union because it would help banks. Lord Inchyra, the association's director-general, said it

EU ministers yesterday accepted the Commission's view that only Ireland and Luxembourg fulfil the criteria which call for annual deficits to be less than 3 per cent of gross domestic product and accumulated debt to be less than 60 per cent of GDP.

The Commission will offer recommendations for corrective action to the 10 other EU members at a meeting of finance ministers in Luxembourg on October 10.

The removal of Ireland from the excessive deht procedures recognises the country's considerable progress in reducing its stock of debt, from around 116 per cent of GDP in 1987 to 89 per cent of GDP this year.

Mr Bertie Ahern, Irisb finance minister, said Dublin was determined to be in a position to join the first group of countries trying to create a single currency before the end of the cen-

Sweden's Social **Democrats** may seek coalition

By Hugh Carnegy and

Mr Ingvar Carlsson, Sweden's prime minister-elect, last oight held open the possibility of forming a broad-based coalition gov-ernment following his Social Democratic perty's general elec-tion victory on Sunday.

The speaker of the Swedish parliament, the Riksdag, called on Mr Carlsson to form a govern-ment with the "widest possible

A spokeswoman for Mr Carls-son said be would discuss forming a coalition with other party leaders, including Mr Bengt Westerberg, the Liberal leader and member of the outgoing right-centre coalitioo before reporting back to the speaker today.

A Social Democrat-Liberal gov ernment would be widely wel-comed by the financial markets and Swedish industry as being likely to produce tough action to curb Sweden's big budget deficit

and fast-growing public deht. However, both Mr Carlsson and Mr Westerberg played down the chances of such an alliance hecause of the Liberals' weak performance on Sunday, when their share of the vote fell to 7.2 per cent from 9.1 per cent in the

last election. Mr Carlsson indicated be could instead form a minority government which would seek co-opera-tion on individual issues with other parties. "My aim is to huild an effective government of

co-operation," he said. The Social Democrats emerged clear winners over the four-party coalition led by Mr Carl Bildt's

conservative Moderate party hut fell 13 seats short of a parliamen-The former communist Left party and the Environment party

made significant gains. Fears that the Social Democrats might rely on the left prompted a sharp rise in long-term interest rates and a fall in the Swedish krona on the

GrandMet sells US petfood group to Nestlé for \$510m

By David Blackwell in London and lan Rodger in Zurich

Grand Metropolitan, the UK food and drinks group, sold its US pet-food business to Nestle yesterday for \$510m and launched a restructuring programme for its world drinks and European food

The restructuring, which will carry a £280m (\$437m) charge, will involve the loss of up to 4,000 johs, analysts in London estimate. Lord Sheppard, chairman, said the moves would enable the group to concentrate on "our winning brands and businesses. We remain confident about GrandMet's long-term approach and cash generation potential". Shares in the group closed at

from an earlier fall to 405p. Nestlė, the world's largest foods group, said its purchase of Alpo Petroods could make it market leader in the US canned dogfood market. It is already believed to be among the top three in the US with its Mighty

409p, down 31/sp, after recovering

Dog and Come'N Get It brands which compete with products by rival foods giants Mars, H.J. Heinz and Quaker Oats. The deal is subject to approval by US antitrust regulators.

According to a recent study of Nestlé by Goldman Sachs, the US investment bank, the group had a 39 per cent share of the US canned catfood market and 10 per cent in the European Union. In canned dogfood, its share was 14 per cent in the US and 4 per cent in the EU.

Mr George Bull, GrandMet's chief executive, said the group was selling Alpo because it was only the seventh biggest supplier in a highly competitive market. GrandMet's other north American brands occupied top slots in their sectors.

GrandMet will report an exceptional profit of just over £200m on the sale in its 1994-95 accounts. The £280m restructuring charge

spent at International Distillers and Vintners, the group's world-wide drinks business whose hrands include J&B Scotch whisky and Smirnoff vodka. The group plans plant closures and rationalisations. Of the remaining £140m, £55m

will go towards similar measures in the European foods division.

Last year the group took a charge of £175m for restructuring Pillsbury, the food manufacturer and Pearle, the US eyewear chain, in north America. That restructuring involved the loss of 3,000 jobs, some of them part-time. The rationalisation

lift by £50m its marketing and advertising outlay. The latest restructuring is expected to yield savings of £90m a year over the next two years.

measures enabled the group to

LONDON - PARIS - FRANKFURT - NEW YORK - TOKYO

Markets fall amid fears over deficit

Fears that Sweden's new Social Democratic government would not be strong enough to push through tough spending cuts yesterday alarmed financial markets which marked sbares lower and bond yields higher.

The main disappointment was the weak electoral showing by the Liberal party which initially seemed to rule it out as a potential coalition partner for the Social Democrats

The market believes Liberal influence would strengthen the government's resolve to push through strong measures to tackle Sweden's yawning hudget deficit, which last year ran at 13 per cent of gross national product, and fast-rising deht.

"This is the worst possible scenario," said Mr Christian Diehitsch, analyst with Kleinwort Benson in London.

We have a weak left-wing government which isn't strong eoough to implement spending cuts on its own and a Liberal party which Isn't strong enough to support them."

He said the market was looking for a budget strengthening package of hetween Skr100bn and Skr150hn (\$13.5hn and \$20.2ho.), compared with the SKr61ho. package outlined by the Social Democrats before the election.

The market's early reaction. was clearly oegative, as long-term interest rates rose, share prices tumbled and the krona weakened.

A rally later in the day brought a strengthening of the Swedish currency, as it became clear that a Social Democratic-Liberal coalition had not been ruled out by prime minister-

designate Ingvar Carlsson. But it was not enough to wipe out the bond and share

The general stock exchange index closed 0.38 percentage points lower at 1,424.9 while

THE LEFT

Left party IN THE CENTRE-RIGHT 80

Centre party Christian Der 26 25

the yield on the benchmark five-year bond closed 14 points higher at 10.86.

Analysts said the market would not relax until the government produced a tough financial package with clear strategic objectives,

Mr James McKay, economist with Kidder Peabody in Loudon, said: "The election has failed to clear the political air, with the hond and currency markets likely to remain nervous until the government's deficit-cutting credentials are established."

Worry about Sweden's shaky public finances means the Swedish ten-year bond yield is already four hundred hasls points higher than its German quivalent

The increase has weakened the Swedish krona and led to a reduction in growth forecasts for 1995.

Mr Carlsson said yesterday his party would not come out with an economic package hefore it formally assumed power in early October. But he pledged to seek early implementation of a decision to tighten Sweden's budget-mak-

Poll result 'the worst possible' New Swedish model halted by old

hs fundamental shift from state welfarism to market liberalism that Mr Carl Bildt, the outgoing prime minister, so fervently belleved he had wrought in Sweden over the past three years appeared yesterday to have been stopped in its

tracks. Instead, the Social Democrats – "the barons of the old order", as Mr Bildt likes to call them - were back holding the reins of power, as they have for 51 of the past 62 years. The general election on

Sunday produced unmistakable swing to the left in Sweden, which suggested the electorate had rejected the reforms of the welfare state Mr Bildt's right-centre coalition had pushed through in the face of the country's deepest recession since the 1930s. The Social Democrats, led by

former prime minister Ingvar Carlsson, returned to government, thanks to an eight-point swing in their favour, with 45.6 per cent of

Behind them, the former communists of the Left party won their best result since 1948. Together, the two traditional allies jumped from 153 seats in the 349-seat Riksdag to 184.

At the same time, the Environment party, which supports Mr Carlsson as prime minister, returned to parliament with 5 per cent of the vote, which gives them 18

The con-Socialists slumped dramatically. Only Mr Bildt's conservative Moderate party. with 22.3 per cent of the votes, won more than it did in

The leftward tide goes further: the Social Democratic party today is in some respects more left-leaning than it was during its last spell in government from 1988 to 1991. A key figure on the right of the party, Mr Kjell-Olof Feldt, who as finance minister presided over important

The shift from welfarism to liberalism inaugurated by Bildt appears to have been stopped in its tracks, reports Hugh Carnegy

Swedish prime minister-designate Ingvar Carlsson (left) discusses with Ingeegerd Troedsson, speaker of the Swedish parliament, the formation of a new government, following his party's election victory on Sunday

reforms such as hig cuts in deficit. income taxes and deregulation of financial markets, has left the scene, along with a cumber

of influential advisers. Today, the parliamentary party, half its members women, is more dominated than ever hy public sector workers and professionals who are likely to resist cuts in the welfare state needed to tackle the country's hig budget

But senior Social Democrats insist the picture of a resurgent left is misleading. Mr Jan Karisson, a member of the party's economic policy team, said the election result was more of a protest vote against

for the left. "The picture is very middle of the road," he said. Party officials point out that

Mr Bildt than a positive vote

the three top figures steering the party - Mr Carlsson, Mr Goran Persson, the finance spokesman, and Ms Mona Sahlin, the party secretary are from the right and fully appreciate the need for stringent fiscal policies to tackle the crisis in the public

Mr Carlsson, who will be 60 in November, succeeded the late Mr Olof Palme in 1986, and

has held the Social Democrats to a pragmatic path, presiding over such changes in policy as the party's swing to supporting Swedish membership of the European Union.

Mr Persson is set to be the key figure in economic policy. It was he who outlined the Social Democrats' SKr61ho. (£5.2bn) election pledge to stop the growth in the public debt by 1998 through a mix of tax

He says he will take tougher

2 miles and 10 1 1 4 25

action if required. Mr Carlsson has set his face clearly against depending on the Left party – or the Environment party – for support on economic policies. Instead, he indicated yesterday

he would seek co-operation

with parties of the former government on the economy. This is based as much on realism os sentiment. With Sweden committed to joining the EU and depending to a large degree on foreign investors to finance its debt, the government has little choice hut to meet the loud demands coming from the financial markets for a tough fiscal policy.

The lingering question, however, is the extent to which the Social Democrats are prepared to go to restructure the heavy imbalance between the public and private sectors

Public spending accounts for 70 per ceat of the country's the highest in the leading

industrial countries. Reforms undertaken by Mr Bildt, such as privatisation, 33 deregulation of the telecommunications and hroadcasting markets and the introduction of competition in schools, childcare and the healthcare systems, are unlikely to be reversed. The Social Democrats accept that the battle against unemployment - at a record 14 per cent - must be fought

through private sector joh But the party retains a deep philosophical attachment to the "old order" of universal public welfare that underpins, in Mr Carlsson's words, "a society where there are no great differences between the working class and the upper

"We want social security

Editorial Comment, Page 19

Nordic EU campaigns given a boost

Swedish Social Democratic party's election victory may prove to be a turning point in the successive

referendums for Finland, Sweden and then Norway to join the European Union, writes Hugh Carnegy in Stockholm.

The Social Democrats are believed to hold the key to a Yes vote in Sweden because to date more than half their supporters have been shown by opinion polls to be against membership. Now in government, Mr Ingvar Carlsson, the party's leader, will seek to persnade his voters that EU membership is a way to advance social democratic polícies, par ticularly the fight against unemployment. The electorates in each country are closely following opinion in

the other two, reflecting a widespread desire that that the three should stay in step. Therefore, the election of a Social Democratic government in Stockholm has long been seen as a virtual pre-condition for a Yes vote in Sweden and could help stiffen the Yes side ahead of the vote in Finland and, if Finland and Sweden. vote to join, in turn influence Norway's sceptical electorate.

Finland will vote first, on October 16, followed by Sweden on November 13 and Norway on November 28 on whether to accept agreements already negotiated with the EU on terms for membership. A Yes vote would mean the three will join Austria as new members from January 1 next year, expanding the EU from 12 to 16 members.

But the outlook for the three referendums is still far from clear. In Finland, considered the likeliest of the three countries to vote in favour of membership, opinion polls have recently shown strong gains for the No campaign, with the

lead held hy the Yes camp nar-

rowing to as little as two percentage points.

In Sweden, the signals are mixed. After two years in which the No side has held a steady lead, two recent polls, including one held among voters on election day, have shown a majority in favour.

The election-day poll suggested that 51.8 per cent of voters were in favour of joining the EU and 45.5 per cent against. But another poll pub-lished yesterday showed the No campaign widening its lead slightly over the past month to 52 per cent, against 48 per cent

All the polls in Norway suggest that the Yes campaign has almost no chance of succeeding unless Finland and Sweden vote to join first in their referendums.

SAVINGS CERTIFICATES

National Savings Certificates of the 41st Issue and 7th Index-linked Issue were withdrawn from sale on 19 September 1994.

The 42nd Issue is on sale from 20 September*, It offers a guaranteed and taxfree return of 5.85% pa compound when held for five years. The minimum purchase is £100 and the maximum holding £10,000.

The 8th Index-linked Issue is on sale from 20 September*. It offers a guaranteed and taxfree return of 3.0% pa compound in addition to index-linking when held for five years. The minimum purchase is £100 and the maximum holding £10,000.

In addition to the normal holding limits, up to £20,000 may be reinvested into Reinvestment Certificates of each Issue from any mature National Savings Certificate or Yearly Plan Certificate.

The new Issues of Savings Certificates are available for any amount between the holding limits. Previous Issues were only available in nudtiples of £25.

YEARLY PLAN

The overall return on five-year Yearly Plan agreements is 5.85% pa compound, guaranteed and tax-free, for applications received from 20 September 1994.

PENSIONERS BONDS

Series 1 Pensioners Guaranteed Income Bonds were withdrawn from sale on 19 September 1994. Series 2 is on sale from 20 September*. It offers monthly interest at a guaranteed rate of 7.5% pa gross over the first five years that a Bond is held.

The minimum purchase is £500 and the maximum holding of Series 2 Bonds is £20,000. This is in addition to any holding of Series 1

CHILDREN'S BONUS BONDS

Issue F Children's Bonus Bonds were withdrawn from sale on 19 September 1994. Issue G is on sale from 20 September*. It offers a guaranteed and tax-free return of 7.85% pa compound when held for the first five years.

CAPITAL BONDS

Series H Capital Bonds were withdrawn from sale on 19 September 1994. Series I is on sale from 20 September*. It offers a gross return of 7.75% pa compound, guaranteed when held for live years.

FIRST OPTION BONDS

From 20 September 1994*, the first year fixed rate on FIRST Option Bonds is 6.4% gross (4.8%, net). Bonds of £20,000 or more held to the first anniversary carn a bonus of 0.4% gross (f).3% nc1).

the Italian series and the German current account. Imports can be derived by subtracting the visible trade balance from exports. Export and import date are cate (free on board) basis, except for German and Italian imports which use the CIF method (including carriage, insurance and freight charges). German date up to a 1990, shown in Italian, refer to the former West Germany. The nominal effective exchange rates are period averages of Bank of England trade-weighted indices

The German economy is growing without inflationary problems, according to separate reports published yesterday by the Bundesbank and the German Economics Ministry. The reports agree that the 2.8 per cent growth in gross domestic product in the second quarter, compared with a year earlier, was unexpectedly strong. They added that favourable orders, industrial production and housing construction point to a continuing upward trend.

Citing favourable implications of Germany's moderate wage increases, the Bundesbank foresees an export-led recovery, but calls for continued vigilance on wages to keep inflation down, currently 3 per cent in western Germany and 3.4 per cent in the east. An August survey of 400 companies by the life economic research institute was also upbeat. Companies survayed expected a 2.75 per cent increase in production this year and 3.5 per cent in 1995, as well as strong growth in the investment goods sector.

Although these assessments will help Chancellor Helmut Kohl's campaign for the October 16 elections, neither of the official reports had good news on the jobs front. Unemployment rose sharply after the west German economy fell into recession last year and despite recent growth and moderate wage claims, jobless totals have so far failed to drop. Reuter,

Ukrainian currency loses value

Ukraine's non-convertible and volatile currency, the karbovanets, lost 16 per cent of its value on the open market over the weekend. The fall has been blamed on parliament's release of credits to the agriculture sector last month. Farm credits will push inflation up from 2.6 per cent in August to above 13 per cent this month, said Mr Viktor Youshchenko, central bank governor. Ukraine is set to initial an IMF letter of intent within two days and a final agreement should be finalised at next month's IMF summit, if certain reform conditions are met, western diplomats and aid officials said yesterday. The IMF policy prescriptions will increase inflation in the short run but the \$700m loan will ease pressure by backing up national bank reserves and help cover Ukraine's widening balance of payments and hudget deficits. An agreement also would open the doors to \$4bn in western aid - including \$400m from the World Bank for critical goods such as pharmaceuticals. Matthew Kaminski, Kiev

Hungary presses state sell-off

Hungary is to privatise 25 per cent of each of its five regional gas distribution companies this autumn, the state holding company AV Rt said yesterday. It said it would hold an international tender for the companies - which serve domestic gas users outside Budapest - in October or November with a view to selling the 25 per cent stakes this year. Registered share capital of the five companies is Ft44.5bn (£264m). Mr Peter Mihalyi, deputy privatisation commissioner, said gas privatisation would be followed up with the sale of a stake in the country's electricity company next year. He added that the government planned to present a new privatisation law to parliament next month to merge the SPA and the State Holding Company, Hungary's two privatisation bodies, into a single body. Another aim of the law would be to make sale procedures more transparent to counter popular suspicion of corruption and influence-trafficking in privatisation. Virginia

Strike threatened at Skoda

Unions at Skoda Automobilová, the Czech car maker which is part of the Volkswagen group, have theatened strike action after the company said yesterday it intended to lay off 800 workers by the end of the year in an effort to increase s. Skoda said the redundancies were necessary to help it "slim a little" and become more competitive on the world car market. But the Czech-Moravian council of trade unions said it would support the unions at Skoda if workers at the company's main Mlada Boleslav plant north of Prague voted for strike action. Mr Jiří Hrabovský, a Skoda spokes man, said unions and management would meet tomorrow to try to resolve the dispute, which threatens to delay the introduction of Skoda's new compact car, the Felicia, due to begin production next month. Vincent Boland, Prague

Warning on Russian inflation

Russian inflation will "inevitably" rise sharply in the last months of this year, according to Mr Andrei Illarionov, former economic adviser to the prime minister and head of the Institute for Economic Analysis. Mr Illarionov said it would rise from under 4 per cent in August to 7-8 per cent in September and move higher in the last three months of the year, reflecting steep growth of credits in summer. He said the government had so far this year issued credits totalling Rhs25,000hm (£6.8bn). He said inflation had been kept low because the velocity of money had fallen - but this could be temporary. However, figures produced by the Centre for Eco-nomic Performance, headed by Prof Richard Layard of the London School of Economics show real consumption rose 10 per cent during the year to July while the real income of households rose 18 per cent. He said the recorded fall of 24 per cent of industrial production from a year ago was "difficult to reconcile with consumption data". John Lloyd, Moscow

Enfant terrible' of fashion dies

Franco Moschino, one of Italy's leading fashion designers, died on Sunday, aged 44, after a long illness, his fashion house said yesterday. He had surgery for an abdominal tumour two years ago and had battled against illness since then. News of the designer's death was withheld until yesterday to allow his funeral to take place in strict privacy. Moschino studied at the Brera Academy of Fine Arts in Milan. He began his career as a freelance illustrator for designer Gianni Versace's fashion house in 1974. He launched his first collection in 1983. He was an "enfant terrible" of Italian fashion, poking fun at the fashion world and becoming renowned for outrageous ensemhles. He once designed a ball gown of garbage bags. Reuter and

Danish consumer prices rise

Danish consumer prices increased by 0.4 per cent from July to August and by 2.2 per cent over the 12 months to August, according to the Official Statistical Office. The 12month rate of increase was the highest since early 1992. Half the increase from July to August was caused by a normalisation of clothing and footwear prices following sales in July. A 10 per cent increase in the price of coffee and other food prices explained most of the rest of the increase. In July 1993 the Danish inflation rate was the lowest since the 1950s at 1.2 W.

per cent. This year, under the impact of a last growing economy and a boom in consumer demand, the rate of inflation has begun to move up. Hilary Barnes, Copenhagen

■ Austrian consumer prices rose in August by 0.6 per cent and by 3.2 per cent year on year. ■ Spain's industrial production index rose 8.4 per cent in June

1994 from June 1993. ■ The Dutch producer price index for manufactured goods rose a provisional 0.1 per cent in July from June, giving a 0.2 per cent rise year on year.

Portugal trims rates as inflation eases

By Peter Wise in Lisbon

Portugal's central bank yesterday cut two important money market rates hy half a point in a reversal of the European trend towards higher interest rates. The measure, triggered by falling inflation, will support government efforts to stimulate economic

The Bank of Portugal lowered the emergency lending rate for overnight funds from 12 to 11.5 per cent and the liquidity absorption rate from

9.25 to 8.75 per cent. The variable repurchase rate for sevenday funds was cut by 0.25 points to 9.25 per cent.

Lowering these rates will reduce the cost of funds to banks and should filter through the economy as lower lending rates for corporate financing and investment, as well as reductions in personal mortgage and borrowing rates. The repurchase rate is the average rate at which banks trade on the money market.

The emergency rate is the cost of funds for banks whose

reserves are short at the close of trading. The absorption rate is the rate at which banks can place excess funds with the central bank.

Falling inflation, a lower fiscal deficit and a stable currency have enabled the central bank to cut money market rates gradually since they were reintroduced in early

They had been suspended two months earlier to help fight speculation on the escudo.

The central bank's decision

only.

to cut the compulsory cash reserve requirement for banks from 17 per cent of deposits to 2 per cent from November 1 should lead to further rate cuts. Existing reserves will initially be absorbed by special

Mr David McWilliams, senior European economist with Union Bank of Switzerland. said Portugal was hucking the trend in the rest of southern Europe by lowering rates and securing a non-inflationary economic climate. "It is an indication that the Portuguese

financial system is hecoming increasingly marketoriented," he said. Year-ooyear inflation fell from 6.3 per cent in January to 4.8 per cent

in August. The fiscal deficit is forecast to fall to about 6.1 per ceot of gross domestic product from 6.9 per cent in 1993. From a low of Es104.5 to the

crisis of May, the escudo has appreciated to a current level

D-Mark during the currency

of about Es101.7. Lower interest rates will help foster recovery from last

year's recession, wheo GDP shrank 1.3 per cent.

The government is forecasting growth of about 1 per ceot this year and 2.5 per cent in

Analysts said the Bank of Portugal had been under "moral pressure" from the government to lower interest rates but vesterday's move appeared to reflect supply and demand on the money market. They expect the central bank to balt rate cuts at the first sign of renewed pressure oo the

General warns he might call down Nato air strikes on government forces

N threat wins pledge from Bosnian Moslems

By Paul Adams in Belgrade and Bruce Clark in London

The United Nations sald vesterday it had won a promise of restraint from Bosnia's Moslem leadership after making an unprecedented threat to call down air strikes on government forces in Sarajevo if they continued to fire on the Serbs.

The promise was made by Bosnia's President Alija Izetbegovic, and his military commander, General Rasim Delic, at a meeting with General Sir Michael Rose, the British commander

of UN forces to Bosnia. Earlier, Gen Rose said he held gov-

ernment forces responsible for provoking an npsurge in fighting on Sunday, when the Bosnian capital saw its most serious shelling for the past seven months.

The general told a Reuter correspondent in Sarajevo that he had warned the government forces they would face Nato air power unless they desisted from their attacks immediately.

While Nato made limited air reids on Bosnian Serb positions in April and August, this was the first time it has been suggested that the air power of the alliance could be used against Bosnian government forces.

THE REPORT OF THE PROPERTY OF

mixture of brinkmanship and hluster to face down all parties in the conflict, would be straining his personal authority to the limit if he invoked air strikes against the government, which enjoys widespread sympathy among politicians in the west and the

Middle East. However, officials at Nato headquarters - who in the past have deplored the UN's caution in using air power against the Serbs said there was no reason in principle while the air power of the alliance should be directed at one side

The surge in fighting takes places against a background of increasing friction between the five countries the US, Russia, Britain, France and Germany - which are supposed to be co-operating to establish a peace set-

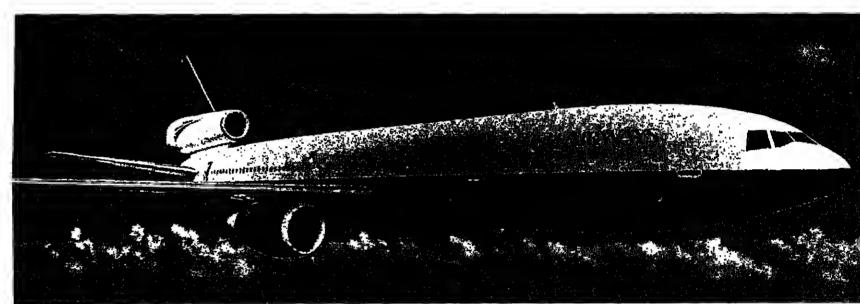

tlement in Bosnia. Tension between the US on one hand and the all European powers on the other has been mounting ahead of October 15, when the US administration will start the process of lifting the ban on supplying arms to the

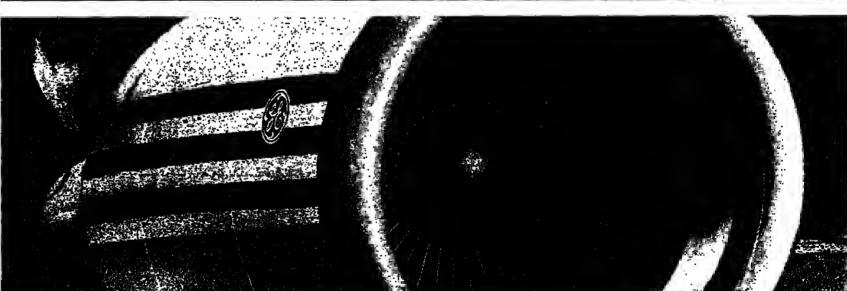

nian governmeot. European governments have said this move will probably force the withdrawal of UN forces from Bosnia,

and Nato experts have drafted two alternative plaos for a pullont, depending on how much fighting is

going on at the time. In Belgrade yesterday, the leader of a team of international inspectors monitoring Yugoslavia's blockade of the Bosnian Serbs said the embargo appeared to be genuine. "It is our opinion, from what we've seen so far, that measures taken seem to be serious and rather effective," retired

Swedish general Bo Pelmas said. His report will increase the prospects of the UN sanctions against Yogoslavia beiog eased later this

These days the Welsh Dragon is a real high flyer since two international glants of the aero engineering industry chose Wales

British Airways has its new engineering base at Cardiff Airport and recently General Electric (USA) has moved to nearby Nantgarw, where they service aircraft engines for famous names like CFMI, Rolls Royce and Pratt & Whitney.

With more than a little help from the Welsh Development Agency, both companies were not merely able to find the right site. but also the right people from Wales' skilled and flexible workforce.

The WDA has also assisted in the development of a local supplier infrastructure to ensure vital components are always at hand.

'Union has exhausted capacity to expand regional trade in a significant way for a long time'

Report finds EU trade policy wanting

The trade policies of the European Union demonstrate blindness, according to Patrick Messerlin, professor of economics at the Institut d'Etudes Politiques de Paris, in a report pub-lished today by the Centre for Policy Studies, a London-based think-tank*.

"Until recently," argues Prof Mes-serlin, "the US had no serious alternative to a policy based on the Gatt disciplines. The strong protectionist mood sooth of the River Grande. prevented any regional alternative... In sharp contrast the EU member states could always count

The situation will be reversed in years to come. The US...will enjoy the relaxation that regional opportunities can offer. By contrast, the KU has exhausted its capacity to expand regional trade in a significant way for a long time to come. The EU - bordered on its southern and eastern flanks by countries unconvinced of the gains from freer trade, or too small to bring substantial benefits to the EU - will be in the same position as the US in the 1950s and 1960s." An indication of the EU's failure to

recognise this necessity is its addic-tion to contingent protection, notably

that dumping is found in 95 per cent of the cases investigated by the Commission - "a conviction rate rarely matched in other judicial procedures". He also points out that almost 80 per cent of cases have been terminated by measures and that these have erected high barriers, the aver-

age EU duty being 20 per cent. Recent cases have been no better; of the 21 cases for which decisions have been published in 1994, measures were taken in 19 and almost all imposed anti-dumping duties ranging from 35-97 per cent. The Uruguay Round outcome, though deserving of "two cheers" according to Mr Brian

provide additional growth opportuni- anti-dumping. Prof Messerlin notes Hindley of the London School of Economics, "comes very close to authorising the biased procedures" used to calculate dumping margins.

"If dumping and injury can be shown whenever it suits a government to do so," states Mr Hindley, "that government can also increase protection for a domestic industry whenever it snits it to do so." In addition, anti-dumping actions can be dis-charged by "undertakings", which are similar to the voluntary export restraints supposedly eliminated in the Round. So "what becomes of the Gatt pledge to 'eliminate discriminatory treatment in international com-

evaluation of the effects of the Round on anti-dumping actions by the EU. He notes that, hitherto, approval of definitive measures in anti-dumping and subsidy cases has required a qual-ified majority. "Under the new rules, bowever, decisions of the Council ... are taken by a simple majority. Hence the votes of six member states are now needed to overturn a definitive measure suggested by the Com-

mission."

Hurd sounds warning on protectionism

Japan yesterday heard a robust attack on protectionism from Mr Douglas Hurd, UK foreign secretary, on the final day of a four-country Asian tour. The danger of blatant protection-ism had receded thanks to the recent Gatt agreement, but the worry now came from subtle pressures to curb the advance of free trade, he warned.

"Now is not the time to sit back on trade liberalisation," Mr Hurd said, after a meeting with Mr Tomiichi Murayama, the prime minister, and other senior cabinet members. New ground needed to be broken, in multilateral liberalisation of telecommunications, shipping, financial services, aerospace

and steel. Gatt members should ensure that the new World Trade Organisation enforced multilateral rules, rather than sought to manage trade. Mr Hurd was critical of pressures to use the WTO to tackle the impact of free trade on environmental and social problems. Labour market rigidities were the eign access to pension fund

and free trade the only solution to it, he argued. On UK-Japan trade, he wel-comed recent Japanese govern-

ment attempts to cut economic regulation and open the mar... ket to foreign competition but said more progress was, needed. Mr Hurd hoped that Tokyo would broaden its military procurement beyond the US, which accounts for almost all the foreign portion of Japan's Y1,000bn (\$10.1bn) annual defence equipment bud-

In official contacts, Mr Hurd made the case for British participation in four large non-defence contracts, including a personal phone system to be introduced by NTT next year. On long-standing trade disputes with Japan, Mr Hurd said he was disappointed by remaining restrictions on foreign lawyers and high taxes on Scotch whisky, which had kept market share at a small fraction of lightly taxed shochu, a local spirit made of sweet pota-

main cause of unemployment management and insurance.

NEWS IN BRIEF

Ericsson secures Malaysia orders

Ericsson, the Swedish telecommunications conglomerate, has won orders worth more than \$550m in Malaysia, one of the world's fastest growing telecommunications markets, writes Rieran Cooke in Kuala Lumpur. The group announced two contracts over the weekend: the biggest, worth M\$1.3bn (US\$507m), is for the design, supply and installation of a public switched wireless network to be delivered to Syarikat Telefon Wireless, a privately

owned Malaysian company; the second contract, worth M\$112m, involves the supply of digital telephone equipment to Celcom Cellular Communications, Malaysia's biggest cellular operator with more than 350,000 subscribers nationwide.

Nr Vijay Kumar, Syarikat's executive director, said the first phase of the Ericsson system would be installed on the resort island of Langkawi, off the west coast of the Malaysian peninsula. Celcom Cellular said it wanted to start offering subscribers a digital service through its eristing petweet by post year Melay. digital service through its existing network by next year. Malaysia is one of the company's top 10 markets and over the past five years Ericsson has been the main supplier for Celcom's existing

Ship identification plan delay

A British government proposal to fit automatic identification devices, or transponders, on the world's merchant shipping fleet has been put back for a year after international maritime experts called for further studies, writes Charles Batchelor, Transport

The Department of Transport put its plans to the United Nations' International Maritime Organisation (IMO) earlier this month; the department wants them to be mandatory from 1999. month; the department wants them to be mandatory from 1999. The transponders would allow coastguard and port authorities to identify vessels and would mean that ships causing pollution or involved in an accident could be immediately traced. The IMO's safety of navigation sub-committee called for further studies of the legal and technical implications of the plans and will look again at the proposal in a year.

"We will have to see how this initiative fits in with other conventions such as the UN Law of the Sea which guarantees vessels unrestricted free passage," an IMO spokesman said.

Saudi Arabia's Tabuk Cement has awarded a contract worth \$257m for a cement and associated power and desalination plant to Mitsubishi Heavy Industries and Ube Industries of Japan, Reuter reports from Dubai. The Llm tonne-a year plant is to be built in the coastal town of Duba in north-western Saudi Arabia.

Kurshi's control town of Duba in north-western Saudi Arabia. ■ Kuwait's central tenders committee yesterday invited bids from nine international companies for construction of three electricity sub-stations, Reuter reports from Kuwait. Industry sources estimated the contract value would be about KDIOm

■ Sunrise Technologies of the US has received approval from the Japanese Ministry of Health and Welfare to sell its SunLase Master dental laser in Japan, AP-DJ reports from Fremont, California. Japanese government procurement of medical equipment has been criticised by the US in continuing trade talks.

AC Delco Systems, a unit of General Motors, has formed a joint venture with a group of Saudi industrialists and businessmen to build a battery manufacturing plant in Saudi Arabia, AP-DJ reports from Fiint, Michigan. GM said it would have a 49 per cent equity in the battery plant, which will be built in Damman, Saudi Arabia. GM expects to start production in late 1996.

Kværner Fiellstrand of Singapore, part of the Kværner group, Master dental laser in Japan, AP-DJ reports from Fremont

■ Kværner Fjellstrand of Singapore, part of the Kværner group, has secured a \$5m contract for a high-speed FlyingCat catamaran for Hong Kong Ferry (Holdings), Extel reports from Singapore. The vessel will be the third fast craft of this type delivered by the Singapore company to the shipping group.

Lumber producers at loggerheads over Nafta

By Bernard Simon in Toronto

US timber producers bave threatened to undermine one of the most innovative parts of the North American Free Trade Agreement (Nafta) by challenging the legality of the pact's dispute settlement mech-

The lumber industry has brought an action in the Court of Appeals for the District of string of setbacks in its long

campaign against tree-cutting fees levied by Canadian prov-inces. The US producers allege that these "stumpage" fees are so low that they constitute an unfair subsidy on Canadian

softwood lumber exports. Several panels set np under the 1989 US-Canada free trade agreement, on which Nafta's dispute-settlement provisions are based, have dismissed the US complaints. The lumber producers appeared to have exhausted all aveoues last month when a three-judge "extraordinary challenge committee" split along national lines in Canada's favour. Canadian exporters have

refund about US\$600m in interim countervailing duties which they have paid pending the outcome of the dispute.

now called on Washington to vailing duties.

The diapute settlement mechanism has been widely regarded as one of Nafta's most successful innovations, Binational panels have so far

reviewed about 62 cases relating to findings by US and Canadian administrative tribunals on subsidies, antidumping duties and counter-

The panels' decisions are usually binding. However, the Coalition for Fair Lumber Imports, representing US forestry companies, maintains that the panel system violates the US constitution by diminishing the anthority of the judiciary in favour of

other branches of government. The coalition also contands that the panels are unconstitutional because while they administer US law, the Canadian members have not been elected or appointed by the US. It alleges that some Canadian panellists who have heard the lumber cases failed to disclose conflicts of interest.

Mr John Ragosta, a lawyer for the coalition, said the constitutionality of the dispute-settlement provisions were not

The Canadian Forest Industries Council said: "The coalition filed this lawsuit only because it lost the countervailing duty case on its merits and, rather than admit defeat, it decided to take on the entire

Israel holding secret talks over Golan

By David Horovitz in Jerusalem

An Israeli minister yesterday confirmed for the first time that Israel is holding secret negotiations with Syria, with the aim of reaching a peace accord involving an Israeli withdrawal from the Golan

Mr Binyamin Ben-Eliezer, who holds the bousing and construction portfolio and is a close aide to Prime Minister Yitzhak Rabin, compared the contacts with Syria with last year's secretive negotiations with the Palestine Liberation Organisation in Oslo that led to the signing of the Israel-PLO autonomy accords in Washingtoo last September.

Minister Binyamin Ben-Eliezer confirms there were secret contacts with Syria, not at the ministerial level, but at the same echelons that led, in his words, to the dizzying success in other peace agreements," the radio reported.

Israell media has carried a

tacts, quoting anonymous government officials saying nego-tiations are being personally overseen by Mr Rabin, assisted by the army's chief of staff Gen Ehud Barak and intelligence chief Uri Saguy, with Israel's ambassador to Washington, Mr Itamar Rabinovitch, and his Syrian counterpart Mr Walid al-Muallam serving as interme-

Israeli opposition leaders have charged that a deal is already close to completion, and that Mr Rabin has agreed in principle to withdraw from the entire Golan Heights strategic ridge in exchange for fully normalised relations with

FIS boycotts Algeria's crisis * talks – but not the talking

Francis Ghilès on the outlawed fundamentalists' continued contacts

solution to Algeria's political crisis will open in Algiers today but one of the country's key political forces, the Islamic Salvation Front.

will not be there.
The FIS, which was outlawed two and a half years ago after the suspension of elections it looked certain to win, decided to boycott the talks in spite of the decision last week by Gen Liamine Zeroual, the head of state, to transfer the party's two paramount leaders, Mr Abassi Madani and Ali Benhad, from prison to house

Nonetheless, contacts and discussions between the funda-mentalist leaders and senior generals have never been so numerous. Most take place behind closed doors, indeed behind prison gates, in and outside of Algeria.

FIS leaders are insisting on a number of conditions before their party joins the talks, which will be attended by five smaller political parties. However, Mr Rabah Kebir, the sman for the exiled leadership, based in Germany, has suggested Mr Madani might be

prepared to call a ceasefire before all conditions are met. FIS leaders wish first to convene a meeting of the party's roling council, the Majits Es Shura, and consult leaders of the Islamic Liberation Army (AIL) which owes allegiance to

"We do not wish to create difficulties for President Zeroual," Mr Kebir said at the weekend, "but each party to the negotiation must be able to hold meetings in order to represent their side." It is "not easy" to conduct proper con-sultations," he added, when the telephone used by Mr Madani and Mr Benhadi is "controlled"

The fundamentalists say that a key precondition to such a meeting is the lifting of the ban on the FIS. The state of emergency would have to be lifted and a general amnesty proclaimed. The army would also have to be consigned to harracks. To ensure such conditions are met, a "neutral" government should be formed to oversee the period of transi-

tion necessary before new elec-tions are held. This is a tall order for the

army's senior commanders and is unlikely to be met in full. The past two weeks have, however, already profoundly modi-fied Algeria's political landscape. The two heavyweight players in the drama which since January 1992, has claimed at least 11,000 lives, have publicly recognised the status of the other as a valid

Dialogue, if and when it accelerates, is unlikely to spell the end of violence. The FIS will not have been surprised by the total opposition to talks expressed by the hardline Islamic Armed Group (GIA), many of whose leaders were trained in US-run camps in Peshawar, Pakistan, and went on to fight Russian troops in

interlocutor.

Mr Cherif Gousmi, the GIA leader, is opposed to any "truce or dialogue with a renegad government, to the very idea of democracy and all those who argue in its favour". The All. has been losing fighters to the GIA but some diplomats are convinced that some GIA activists are linked to the state

security forces.

come from Mr Redha Malek, who said the release of the FIS leaders was a "huge unilateral concession which put the

republic in danger of death". Mr Malek, who brokered an agreement with the International Monetary Fund, was took office last winter. Mr Malek's views are shared by groups within the country which have defended women's rights and, what is more important, by a number of

senior officers. Some are bitterty opposed to the ideology of the FIS, others fear the loss of the many privi-leges a state-controlled economy has afforded them since independence in 1962. Others, in the middle ranks of the army and the security forces.

Many have been forced to participate in human rights ahuses that they are deeply ashamed of, and feel betrayed 3 by their elders. All parties to the conflict have resorted to methods which in Algeria remind many of the violent fight for independence from France between 1954 and 1962.

Jump of 8.75 per cent will boost public support for reforms

Indian industrial output rises

By Stefan Wagstyl in New Delhi

indian industry, which saw production stagnate after the launch of the country's economic reforms in 1991, is recovering sharply this year, according to government estimates published yesterday.

The data will boost public support

for the reforms among businessmen who earlier complained at the extent of the slow-down in demand caused by widespread economic restructuring. Executives will also take heart from recent inflation figures which show a slowing in the rate of price

Industrial output rose 8.7 per cent in May, compared with the same month last year, the largest monthly increase since before Mr FV Narasimha Rao, the prime minister, launched the reforms. The jump in to continue for some time, May followed a 7 per cent increase in

The recovery is being led by a sharp rebound in the production of capital goods, which suffered particularly hadly in the early post reform period because the government, an important buyer of industrial equipment, cut orders in an effort to trim public spending.

This year, private companies. intending to modernise and expand their factories, are fuelling demand for capital goods, Capital goods output in May was 19.6 per cent higher than in May 1993.

While the data is provisional and subject to adjustment, government officials and business executives alike believe that the recovery is broadly-based and expect it

The Reserve Bank of India, the central bank, earlier this month forecast that industrial output for the year to the end of March 1995 would rise 7 per cent over 1993-94. Some industrialists foresee an increase of up to 10 per cent.

Meanwhile, government figures published at the weekend show the rate of increase in wholesale prices, the most widely followed indicator of inflation, fell in the week ending September 3 to 8.3 per cent, compared with the same week in 1993 the lowest rate recorded this year. inflation has slowed from a peak

of more than 11 per cent in the spring, when prices were affected by sharp increases in the cost of goverument-controlled goods and services such as fuel and transport.

Fahd promises to turn to UK for 'all Saudi Arabia's needs'

By Kevin Brown, Political Correspondent, in Jeddah

The UK will remain a key supplier of defence equipment to Saudi Arabia for the foreseeable future, King Fahd told Mr John Major, the British

prime minister, yesterday, In several hours of talks in Jeddah, the king and Mr Major also agreed an outline deal for Britain to provide technical and financial advice on Saudi Arabia's fledgling privatisation programme.

British officials and businessmen who joined the week long trip to the Gulf and South Africa, were buoyed by the warm reception given to Mr Major, and by King Fahd's promise that Saudi Arabia "will come to the UK for all our needs"

Mr Major is believed to have discussed a number of potential defence contracts with the king, including a possible order for Westland's Merlin anti-submarine warfare helicopter.

Saudi Arabia is believed to be deeply concerned about its vulnerability to a potential threat from Iraq, which has acquired a number of conventional submarines in the secondhand market in spite of an international arms embargo,

The king is also said to have responded sympathetically to British suggestions that the kingdom should buy Avro International jets for the Royal Flight, and Rolls-Royce engines for the state-owned airline.

It is believed a bid by the Davy construction group to build a steel plant at Hadeed was also discussed.

The Saudi government is expected to confirm shortly that it has accepted a British offer to provide technical assistance in developing the kingdom's plans to involve private capital in large parts of the

state-owned sector.

Candidates for privatisation or partial involvement by the private sector include the electricity industry, the state-owned telecommunications company, petrochemicals, aviation and the road system.

Saudi Arabia has run a budget deficit for 12 years as a result of declin-ing real prices for oil exports and rising spending

The kingdom is also believed to have spent most of its reserves on financing the Gulf war.

Iran's non-oil exports show growth of 23%

Iran has exported \$1,6bn (£1.01bn) worth of non-oil goods since the start of the Iranian year in March, Iran's official news agency said yesterday, Reuter reports from Nicosia. "Iran's non-oil exports have

risen by 23 per cent compared

with the corresponding period last year," the agency said. It did not give a value for exports in 1993 or a breakdown of different kinds of exported goods. Mr Ali Saeedlou, head of the Export Promotion Centre of Iran, predicted that non-oil exports by Iran, a leading oil producer and member of the Organisation of Petroleum Exporting Countries, would

reach a total value of \$24bn in

the 1994-98 period.

By Gerard Baker in Tokyo

Further evidence of a gradual strengthening of Japan's economic recovery emerged yesterday with figures showing better corporate profitability and a slight improvement in monetary conditions.

A Ministry of Finance survey revealed that aggregate pre-tax profits at Japanese companies fell by just 0.2 per cent in the three months to the end of June compared with the same period last year.

Earnings fell for four straight years from 1990 but the survey confirmed recent anecdotal evidence from companies that profits have hit hottom. Manufacturere reported sales higher by 0.3 per cent, and profits up by 7.6 per cent, the first increase for 13 quarters. Non-manufacturers' sales were up by 0.9 per cent, but profits fell by 3.9 per cent The senior bureaucrat at the Finance Ministry, Mr Jiro Saito, said the survey was in line with recent official reports that suggested the economy was recovering from the long recession. "The upturn in manufacturers' earnings is an especially bright factor," said Mr

However, the report also pointed to continuing declines in corporate investment. Capital spending during the quarter ahrank by 16.8 per cent, with both manufacturers and non-manufacturers reporting

Japanese | Mahathir snubs ecology lobby over dam

By Kieran Cooke in Kuala Lumpur

Prime Minister Mahathir Mohamad of Malaysia has told western environmentalists and activists to "mind their own business" and not interfere in Malaysia's development programmes.

Dr Mahethir was speaking et a ground breaking ceremooy for the Bakun dam project in a remote jungle area of the state of Sarawak on the island of Borneo. The Bakun project,

world's biggest private power scheme, involves construction of e dam nearly twice the size of the Aswan dam in Egypt and the flooding of an area larger than Singapore.

Plans are to transmit the bulk of Bakun's 2,400MW power output to peninsular Malaysia, first by 670km of overhead cables within Sarawak and then through 650km of cables under the South China Sea. An area of more Sarawak-based Ekran company.

described by its developers as the than 80,000 bectares, much of it tropical rain forest, will be cleared to accommodate the dam and more than 8.000 tribes people will be resettled.

Opponents of the project say that the dam will be "an ecological time bomb sitting right in the centre of Borneo". Earlier this year Dr Mahathir's government signed a memorandum of understanding giving management of the

Ekran says 70 per cent of the financlug for Bakun will be raised from domestic resources and insists the project can be completed in six years, without federal or state funds. Critics point out that Ekran has had no previous experience in the power business.

Dr Mahathir said his government had done extensive research into the Bakun project: "Bakun will be a catalyst for industrial growth in the country and in Sarawak itself."

Flux emerges in Malaysian politics

news show. Each evening television feeds Malaysians a series of gener-ally upbeat items about the state of their country. The considerable achievements of the Malaysian economy are the main focus of attention. The activities of Dr Mahathir Mohamad, the prime minister, feature prominently.

But lately the news has been a little more subdued. While the economic outlook, in the short term at least, appears good, Malaysians have been puzzled to hear about the government's tough ections against a Moslem group. They have been intrigued that talk about a sex scandal involving a senior government figure has been allowed to surface in the official media.

There have been a series of fires at Kuala Lumpur'a international airport and two "near misses" between aircraft. Even the weather forecast looks worrying. Some of the worst pollution in years has clouded the skies of much of the Malay peninsula in recent weeks and has led to government health

Dr Mahathir and other senior figures in government have made clear signals that a

general election will be called soon, possibly at the end of the year. There seems very little chance that Dr Mahathir, in power since 1981, will lose his tight grip on power. But a degree of flux is evident in Malaysia's body politic.

In June the government launched its campaign against Al Argam, a Moslem sect that claims 100,000 followers in Malaysia and many more in the region. In early August Malaysia'a Islamic authorities banned Al Argam's teachings. describing them as deviationist. Since then the government has declared the sect illegal, launched police raids on the group's communes and carried out a number of mass arrests of followers.

Kieran Cooke

reports on an

intense debate

in the ruling

party

Many, particularly in the majority Malay Moslem community, question the govern-ment's heavy-handed tactics. Mr Ashaari Muhammad, Al Argam's leader, had his pass-port revoked by the Malaysian authorities while in Thailand. Mr Ashaari, along with at least seven followers - including his wife and six-month old daughter - are being held under Malaysia's Internal Security Act (ISA), which allows for up to two years' detention without

The Malaysian Bar Council has protested that the ISA, which usually involves harsh isolstion treatment and round the clock interrogations, is being used for purposes for which it was never intended and says Mr Ashaari has been denied the right to legal representation.

Critics say there are political motives behind the move against Al Arqam. They say Dr Mahathir had become worried about the growing popularity of Al Arqam within his own United Malays Netional Party (Umno), the dominant group in the ruling national front. Al Arnam says it is being used as a scapegoat to take attention away from scandals and corruption within Dr Mahathir's government

The government seys lt acted against Al Arqam because the sect had strayed

from proper Islamic teachings and could pose a threat to pub-lic order. Dr Mahathir has made a number of allegations against Al Arqam, including that through the practice of polygamy, the sect treated women as "little better than prostitutes".

At the same time and to the deep embarrassment of the government, the case of Mr. Abdul Rahim Tamby Chik hit the headlines. Mr Rahim is chief minister of the state of Malacca and head of Umno's youth wing. Mr Rahim is under police investigation after allegations that he sexually abused a 15-year-old girl. He has also been accused of accumulating a vast fortune through dubious property

r Rahim is a leading member of a new generation of Umno personalities who came to prominence within the party along with Mr Anwar Ibrahim. the deputy prime minister and Dr Mahathir's heir apparent, in

elections late last year. Dr Mahathir has been forced to suspend Mr Rahim from his official posts, Mr Rahim was allowed to go abroad on holipolice custody.

What intrigues Umno watch

ers is that the allegations against Mr Rahim have been allowed a public airing in the heavily government-influenced media. There are suspicions that senior figures in the party might be out to rock Dr Mahathir's political powerboat.

Dr Mahathir faces few problems from Malaysia's weak and divided opposition parties. But within Umno there is intense debate about the future direction of the party. Many of the Umno rank and file say the party has lost touch with its rural roots and is now domi nated by urban-based politicians with close links to the country's corporate élite,

Some sections of Umno have voiced concern about corruption within the party and a nationwide cult of vote-buying called "money politics". Dr Mahathir has pledged to put a stop to abuses within his own party.

Economic success has brought a large degree of political complacency to Malaysia. But politics has been give a shot in the arm by recent events. The evening news could be more interesting in

Pro-democracy and pro-Beijing candidates do well in Hong Kong poll

By Simon Holberton in Hong Kong

Strong support for pro-democracy candidates and a good showing for Hong Kong's main pro-Beijing political party were the highlights of the colony's first fully democratic elections.

Hong Kong went to the polls on Sunday to elect 346 local government officials in

polls to be held over the coming year. After failing to agree terms with Britain, during talks last year, Beijing has said It will annul the result of these elections when it resumes sovereignty in 1997.

By the close of counting yesterday afternoon candidates representing pro-democracy groups had taken nearly a third of what was the first of three colony-wide the seats. The Beijing-funded Democratic

Alliance for the Betterment of Hong Kong (DAB) won just over 10 per cent of the

The loser on the day was the pro-business Liberal party, which managed to win only 19 of the 99 seats It contested. More than 150 of the successful candidates ran as independents, underlying the essentially local nature of the elections. Houg Kong's Chinese language press

colony's leading newspapers commented favourably on the elections, with many saying they boded well for municipal council elections next spring and Legislative Council polls next

> In all, 693,223 people voted - 64 per cent up on the vote in 1931, when 424,032 people voted. Sunday's turnout, however, repre-

> welcomed the poll. Almost all of the

sented only 33.1 per cent of Hong Kong's registered voters and was not much ahead of the 1991 poll, when 32.5 per cent of voters cast a ballot.

The high voter turnout was attributed by some to the growing civic consciousness among voters. Many commented on the maturity and responsibility of voters and said they hoped China would take note of the result when it came to estab-

lishing a fresh political order after

The pro-Beijing Ta Kung Pao said the large turnout did not imply public support for Mr Patten's reforms, Instead it concentrated on the turnout rate. Wen Wel Po, its stablemate, had encouraged its readers to participate in Sunday's poll by voting for candidates who "loved Hong Kong and the motherland".

Acrive since 1946 in the international was industry. Caz de France is constantly developing its rechnology and services at home and abroad. A pipeline network which has grown six-fold in forty years, a distribution network increased by 3.500 km in 1993; Gaz de France exports this know-how to Germany. Russia and countries as distant as Bulivia and China. With one-third of Western Europe's storage capacity. Goz de France's expertise in this field is recognised worldwide, and is currently contributing to impurtant projects in the United States and Canada, Providing a safe, relialde gus supply is only part of the story. Gaz de France goes further, offe-

and training. Because for Caz de France.

performance also means contributing

to the good of all.

With 15,000 troops in Haiti the US has the means to enforce the compact, says Jurek Martin

Stubborn Carter saves Clinton's bacon

political imagination even to aug-gest that former President Jimmy Carter and his team of US negotiators in Haiti have saved the current presidency. But they certainly seem to have helped to give Mr Bill Clinton as optimal an outcome as he could rea-sonably have expected well into an

agonising Sunday afternoon.

Mr Clinton could certainly claim yesterday his order to begin the invasion was the last straw that broke the back of the resistance of Lt Gen Raoul Cédras and General Phillippe Biamby to agree to step dowo from power.

But it was Mr Carter's stuhborn insistence to continue talking in Portau-Prince long after he was due to leave and even after the White House advised him to get out that made possible the denouement.

Equally, it was Mr Carter's determination to obtain a Haitian political imprimatur from acting president Emil Jonaissant, a man whose legitimacy the US government has not even recognised, that was in the final bour vital to the accord. It was Mr Jonaissant's emotional declaration "we must have peace not war" that helped persuade the military men not to disobey their civilian leaders, according to Mr Carter.

In effect what the US team, which also included retired General Colin Powell, previous head of the joint chiefs of staff, and Senator Sam Nunn, chairman of the armed services committee, hrought about was Gover-nor's Island Revisited - a close replica of the July, 1993 agreement under which the military junta agreed to relinquish power.

The difference - and it is buge - is that the presence in Haiti of an occu-pying force of 15,000 US troops means that the US has the means to enforce

Sunday's compact. The agreement itself leaves some hostages to fortune. It does not require Lt Gen Cédras or Gen Blamby to leave Haiti, as demanded by Presi-dent Clinton. Its promise of amnesty may leave members of the local military and commercial elite free to

A Haitian soldier (right) watches as US troops deploy at Port-au-Prince airport shortly after their arrival

trand Aristide's return. Even Mr Carter conceded the agree-ment was not hinding on junior officers or "attachés," the freelance thugs with close ties to the military who have replaced the dreaded Tonton

Macoutes of the Duvalier regimes.
The agreement contained no reference to Fr Aristide, though perhaps it did not need to. Initial reaction from his advisers - and on the streets in Miami - was not favourable, mostly because of the prospect of the junta getting off scot-free and, possibly,

remaining in Haiti. In a fascinating CNN interview yesterday morning, Mr Carter offered many insights into his extraordinary two days in Port-au-Prince, demon-strating yet again the strength of his independent streak and the remarkable rapport he seems able to establish with the most improbable negoti-

last year the late Kim II-Sung, the North Korean dictator, and Muham-med Farah Aideed, Somali warlord).

The US, the UN and countries beyond number have condemned the military junta for their appalling vio-lations of human rights in Haiti. But Mr Carter countered that "it's a serious violation of inherent human rights for a citizen to be forced into exile." General Powell reported, more practically, that at no stage had Gen Cedras asked about the terms, finan-

cial and otherwise, of exile. Mr Carter was even dismissive of US government officials, including Mr Warren Christopber, now secretary of state and the departmental number two in his own administration, who have said there was no alternative but exile. The Governor's Island agreement, he pointed out, was also signed by Fr Aristide and would not have forced the junta physically to

leave the island. The US official attitude, Mr Carter said, failed to understand the mindset of the junta as military men and selfperceived patriots. The former president paid particular tribute to the arguments deployed by General Pow-ell in this respect. He also said that the wife of Gen Cédras ("one of the strongest and most powerful women I've ever met") had played an influential role after he had spoken to her at length on Sunday morning.

Throughout the interview, Mr Carter displayed considerable understanding of the complexities of Haitian society and its fledgling political system. He could not even guarantee parliament would pass the amnesty law, since 40 pro-Aristide members are in exile in Miami. But the October 15 deadline could not be avoided by the junta.

The agreement - and yesterday's

apparently trouble-free US military landing - should bring political relief to Mr Clinton at home, where the prospective fully-fledged invasion

remained unpopular.

The presence of General Poweli in the delegation - another suggestion from Mr Carter eagerly taken up by Mr Clinton - provides a degrea of political cover for the president against Republican criticism. The general's political neutrality is legendary hut Republicans increasingly claim him as one of their own, largely because of his service under presidents Reagan and Bush.

in the short term, the agreement and the US occupation also removes all threat of a congressional vote of disapproval against US policies in Haiti. The Democratic leadership immediately began moves to get both Houses to approve the Sunday agreement and to express support for the US military mission. This will pass. It will not, however, subdue for long

persistent reservations about Mr Clinton's foreign policy decision-making processes, which, even over Haiti, are widely seen more as crisis-driven than the product of a strategic plan. There appear to have been some sharp divi-sions in the administration, investiga-tions of which are certain to feature in the media. The position of Mr Anthony Laka as national security

adviser seems most vulnerable.

Nor can Mr Clinton expect much lift from public relief at November's midterm elections. In 1962, predicted steep Democratic losses were much reduced by the resolution of the Cuban missile crisis but that hap-pened only a week before voting. A better comparison may be 1978 when Mr Carter's Middle East peace accords produced instant political benefit that mostly faded by polling day.

But, for the moment at least, Mr Clinton's agonies are less. He did take the fateful step of ordering US servicemen into a combat mission for the first time in his presidency but then was able to recall them before they landed. That outcome seemed inconceivable four days ago; it was even in

300 years of violence, and misbegotten intervention

Stephen Fidler describes Haiti's troubled history

ust 700 miles from the coast of Florida, Haitl is the poorest country in the western hemisphere. The average Haitian has just 75 US cents a day to

live on, According to the World Bank's yardstick, anyone living on less than a dollar a day is suffering dire poverty. Haiti is an enclave of African-style poverty in Washington's backyard. The UN Development Programme calculates that, in terms of the quality of life of its citizens. Haiti ranks 131st out of 173 countries, just ahead of Zambia. Yet Haiti was once France's richest colony, furnishing two-thirds of its overseas trade. Rich with plantations of coffee, cotton, indigo and sugar cane, it supplied Europe

with half its tropical produce. The intervening 300 years tell a tale of appalling government, misbegotten foreign intervention and violence.

An almost unbroken line of blood connects the arrival of Christopher Columbus 502 years ago to the present day. Within 50 years of the navigator's arrival on the island of Hispaniola, which today French-speaking Haiti shares with the Spanish-speaking Dominican Republic, the esti-mated half million Arawak indians had perished, and the pre-Columbian culture had all but vanished.

lished the first European settlement in the New World, 500 years ago this year. When he returned 11 months later, the settlement had been razed and his men killed.

Haiti provided the world's single example of a successful slave revolt. After 12 years of struggle, Haiti became independent from Napoleonic France in 1804, so becoming

tbe first "third-world" country. France finally recognised Haiti in 1825, extracting in

return a buge indemnity which remained a burden on the economy for decades, and left French financiers in positions of influence for almost a century. Washington put in place a trade embargo in 1806 and the

country was not recognised by the US for almost 60 years, with Washington fearful of the impact a successful revolt would have on its own slave population. Recognition was not achieved until the middle of the US civil war in 1862. Between 1849-1913, US Navy ships entered Haitian waters 24 times with tha stated objective of protecting American lives and property. In 1915, fearing German rivalry in the Caribbean, and amid a Haitian political crisis, the US invaded. Its forces stayed for 19 years.

The Americans built 1,600 km of roads, telephone exchanges and medical facilities, but few of these lasted much beyond an ignominious withdrawal. There were longer-lasting legacies. The racism of US

occupying forces is widely seen at the root of the development of noirisme, nationalist black-oriented political thought, of which a leading exponent was a black medical doctor named François Duvalier.

Duvalier, a minister in the late 1940s, was elected president in what was hy Haitian standards a reasonably free and fair election in 1957. Duvalier - "Papa Doc" - sought to limit the influence of the army, the Roman Catholic church and the US, and to reduce the political and economic power wielded by the minority mulatto community. Haiti's white plantocracy - the French aristocratic slave owners - were expelled by the revolution. But its spiritual descendants remained in a mulatto oligarchy, that even

now - in co-operation with the black-dominated army -

continues to dominate the economy and politics. Duvalier subdued the army with the creation of a black militia, the National Security Volunteers, which became known as the Tontons Macoutes. He put to shrewd use voodoo, a synthesis of African belief and Catholic ritual that attributes the events shaping people's lives to myriad apirits. As a belief system, it is held to limit the responsi-hility believers feel for their own actions, and partly explains the lack of cohesivenesa of Haitian society. According to Elizabeth Abbott, the author of a 1988 book

on Haiti, Duvalier studied "voodoo with as much devotion as an houngan (voodoo priest), and then twisted it and used it to keep an entire population at his pitiless mercy". Life under Papa Doc quickly degenerated into violence and murder. By 1963, the US ambassador had been expelled, and one year later Papa Doc made himself president for life. The dynasty lasted until 1986, when his son Jean-Claude flew to exile in France. Baby Doc had taken over on his father's death in 1970. The Duvalier fortune was by that time estimated at \$500m - although now Jean-Claude is reported to be penniless.

Baby Doc's exit was followed by several months of violence as people rid the country of signs of the dictatorship. The army took over but was eventually forced by popular pressure to concede elections, held on December 16, 1990. The victor, a radical priest, Jean-Bertrand Aristide, won 67.5 per cent of the vote against 14 per cent for his nearest rival. He presided for only seven months before a military overthrow on September 30, 1991.

Evidence emerging since the mid-1980s suggests a strong link between the Haitian military and the trafficking of cocaine from Colombia into the US through Port-au-Prince. This may be one explanation for the tenacity with which the army has beld on to power in the face of US threats. "President Aristide is right when he says that one of tha reasons the Haitian military will not let go is that their lifestyle depends on the drugs trade," US Senator John Kerry said last year.

US troops land in full strength

By George Graham in Washington

The first US troops landed in Haiti yeslerday in an operation that closely resembled the carry out just hours earlier.

The most important differences are that we are not having to make a forced entry, we will not have to do it in the middle of the night, and we will not have to use our paratrooping forces to do it." said Mr William Perry, the US defence secretary, in a briefing just after the invasion was called off.

The original plan called for six paratroop battalions from the 82nd Airborne division to attack the Port-au-Prince airport, while Army and special forces landed by helicopter to secure the southern half of the

At the same time, a force of more than 1,500 Marines planned an amphibious landing on Haiti's north coast, taking over Cap Haitien and other

Instead of a parachute landing, froups from the 10th Mountain division landed by helicopter at Port-au-Prince

Around 6,000 US troops were axpected to be in Haiti by the end of yesterday, with the number rising to around 15,000

"We have, of course, the assurance of the Haitian government, but we do not believe we should have our troops depend just on that assurance, and so therefore they're going to go in in strength and fully armed," Mr Perry said.
In all, the US has had around

15,000 troops stationed off the coast of Haitl in a fourteen ship fleet, including the aircraft carriers Eisenhower and America and the amphibious command ship Mount Whitney. Vessels from Argentina and Canada have also been in position off Haiti.

Around 2,000 troops and personnel from as many as 24 other countries are due to join the US-led task force. Countries contributing to the force include Carlbbean nations such as the Bahamas, Barbados and Jamaica, Latin American and European detachments and large contingents

Haitians wonder: What next?

James Harding joins a bewildered crowd watching the Americans fly in

harlie said his friends, standing bewildered on the quayside across from a US aircraft-carrier in Portau-Prince harbour, did not like him speaking English. "They want me to speak Cre-ole or French, but I like to speak English because Americans is raining down in on the city," the former tourism operator

said. Most people, unsure whether the last-minute deal by the US and Haiti would stick, contained their enthusiasm. As the US troops arrived - not in a shower of paras, as the delighted Charlie described, but in a swarm of helicopters flying low over the bay to the civilian airport north of the city - Haitian heads lifted from their daily business. Neither in celebration nor defeat, most appeared to be wondering: "What next?"

At the police headquarters adjacent to the palace, sombre men in civvies, carrying an assortment of guns, waited for

The marketplaces bustled. The men carrying baskats of disweet (flat-square bread), the women selling papaya and avocados, and the stores offering soft drinks and plastic trinkets that had squeaked through the two-year-old economic blockade, were in business

With the price of staple foodstuffs up threefold and petrol 15-fold because of that embargo, the arrival of the Americans inspired hope of relief.

When I saw President Clinton, I said

take more than we already have."

His friend, Pierre Joseph, a supporter of the ousted president Jean-Bertrand Aris-tide, was sceptical. "Cédras said he would saying again he would leave in October. We don't believe him." He was referring to the last US-brokered agreement with the army chief, Lt-Gen Raoul Cedras, in 1993 which provided for the military to step

down and Father Aristide to return, If the future of Gen Cédras, the police chief Lt-Col Michel François, and General Phillippe Biamby, was unclear yesterday as more and more US military personnel arrived, the threat they posed to the Haitian people seemed to be receding

Some people, who complained of the jun-ta's reign of terror, now saw no need for a witch-bunt. One man said: "Cédras could stay if he wants because be is in his country, but he doesn't matter now."

One thing all agreed on was relief that there had been no hostile intervention. Zachary, a relief worker, did not know what the accord would bring, but said: You've got to think it's good - there's no

But, warned Zachary, there were still dangers. He did not believe the Haitian military would disobey Gen Cédras if be had accepted the agreemant, but said there could still be casualties.

on too long," said Moise Herbert, a driver in the Haitian capital. "This is the last chance for Haiti to be born again. We can't waving his arms in all directions.

The possibility of guerrilla warfare is another unknown. US officials do not rule it out. One embassy source yesterday pre-dicted a tense night ahead and warned ous, if not openly hostile, territory. Testing the temperature of popular sen-

timent is difficult. The walls of the capital are covered with anti-Aristide and antiintervention graffiti, such as "no to Aristide - Aristide is Castro", and "1915 [the first year of a two-decade US occupation) never again". Whether these, like the small groups of

the last few days, are an outpouring of public feeling or commissioned by the military is not clear. Honest comment has been further skewed by the arrival of thousands of journalists to whom Haitians, for a fee, are happy to give a big smile and a pro-

anti-US protestors outside the palace over

American soundbite. With so many questions unanswered not least how many US servicemen will stay and for how long - the Clinton administration may find Charlie's expectations worrying. Asked what the US-led forces should do in Haiti, ha said he

wanted them to run the country. "The city is too dirty, there are no roads
the Americans could do everything. I
like the Americans to stay for all time -

Barcelona:

Southern Europe's New

Logistics Centre.

If you are considering secting up a goods distribution centre in southern Europe and the Mediterranean, the ideal place is Barcelona: the largest container port in the Mediterranean. Its free port area and logistics activities zone offer numerous advantages in terms of storage capacity and streamlined distribution.

Connected to the rest of the continent by scheduled flights to 79 cities in 29 European countries, 250 shipping lines and an extensive network of motorways, Barcelona is less than a day away from any point in southern Europe and North Africa and state of the art telecommunications keep you in constant rouch with

the world's major financial centres. But the biggest guarantee is this: if your goods are not disputched within the agreed time, the Port of Barcelona will refund your money. Give us a call for more details, (34 3) 443 13 00

Washington opposes Chrétien | US warned of health reform need suit over Brazil debt

By Stephen Fidler, Latin America Editor

The US government has stepped in to oppose a lawsuit filed by a big US family investor seeking repayment of \$1.4bn (£900m) of bank loans to Brazil, bought in the secondary

The investor - the Dart family whose fortune derives from the invention of the polystyrene cup - refused to join a \$52bn bank deht restructuring accord completed in April.

The Dart suit, filed in US federal court in Manhattan among other things, seeks payment of interest arrears.

Washington's statement of interest argues: "The US has a strong interest in encouraging voluntary restructuring of sov-ereign debt" and that a successful claim by the Darts would servs to undermine

It said that the US had in the past sought to discourage the use of the courts hy dehtor governments, so as to encourage negotiation over voluntary deht restructurings. It said. in such debt had developed (Its turnover last year was \$1,978bn), it did not want to However, lawyers for the

Darts are likely to argue that the statement refers to only one of the eight counts cited by the Darts - that of accelerated repayment. They may also argue that the US government position undermines the rights of investors who bought their loans in the secondary market. and that a judgment in its favour would hurt secondary

market prices for bank loans.

Last week, the presiding judge dismissed a request from the Darts' lawyers for summary judgement in the case and said she would consider a motion to dismiss on the grounds that the eight counts have legal defects. If she fails to dismiss the case, the Darts' lawyers will elaborate their claim on October 7, and the Brazilian government will respond by October 28.

Under the 1988 agreement covering the bank loans hald hy the Darts, holders of more than 50 per cent of the loans could demand immediate repayment from the Brazilian government. To prevent the Darts from using this clause after all other creditors had converted their loans in the

encourage creditors to use the 1994 agreement, the Darts courts. holders - Brasilia made sure that the state-owned Banco do Brasil kept a larger holding of the 1968 loans. The Darts argue this is improper.

Angus Foster reports from São Paulo: In a move that marks a sethack for the government, Brazil's car workers went back to work vesterday after manufacturers and unions had agreed at the weekend to a e-off payment to solve the week-long dispute.

Workers will receive a special bonus equivalent to about 25 per cent of this month's salary. Manufacturers also agreed to hring forward the annual pay round for many workers. w to take place in November instead of April.

The government, worried that pay rises will fuel infla-tion in its new currency, the Real, had sought to delay wage increases as along as possible. Government officials have said they will try to stop companies raising prices so soon after the Real's launch. But manufacturers have promised the government that the one-off payment will be paid for hy productivity gains and will not be passed on through higher prices.

Task force will tackle offshore financial crime

FBI and UK police combine

By Peggy Hollinger

chotten

cention

The Federal Bureau of Investigation in the US and officers from the UK police's New Scotland Yard have joined forces to create a task force aimed at tackling white-collar crime emanating from British offshore territories.

The White Collar Criminal Investigations Team was set up in January to investigate fraud and money laundering which affects the British dependent territories in the Caribbean. Two UK officers have been assigned to the FBI's base at Miami, Florida.

The move comes as the UK government seeks to put pressure on its territories to

change laws which allow company owners to hide hehind nominee names. Such regulations make the work of criminal investigators almost impos-

Mr Tony Baldry, a UK Foreign Office minister, is to hold a series of discussions with the heads of government in the territories when he visits the

Caribbean next month. International business companies, as these shells are called, are often used hy money launderers as part of a complex finanical network through which funds cannot be

According to one estimate by British intelligence, some \$500bn (£322bn) may have been "laundered" worldwide last

The territories and the UK government have been working together to crack down on criminal activity for some time. However, the territories are particularly sensitive about the rules regarding lBCs, which are substantial revenue earners for such entities as the British Virgin Islands.

The creation of the task force is disclosed in a documentary, to he screened tonight in Britain on BBC-1 television, describing the role played by offshore centres in financial fraud. More than 60 per cent of the world's money is estimated to reside in low-tax havens off-

launches drive on separatism

By Bernard Simon in Yorordo

Canada's prime minister. Mr Jean Chrétien, is launching an offensive to defuse Quebec's drive towards independence.

In a speech delivered in Quebec City yesterday, he outlined several federal government initiatives and said hs intended to campaign vigor-ously for national unity ahead of the independence referendum which the francophone province's newly-elected sepaised to hold next year.

The Parti Quebecois won 77 out of 125 seats in last week's provincial elections in Quebec. PQ leaders indicated during the campaign that they will seek to persuade Quebeckers of the advantages of independence by relentlessly pointing out the inefficiencies of the present federal system.

The first front in the referendum campaign opened yesterday with the recall of Parliament in Ottawa. The Bloc Quebecois, the PQ's federal counterpart which holds 54 seats in the House of Commons, is expected to use its position as the official opposition to press the separatists' case on the national stage.

Mr Chrétien said that the federal government would release long-awaited proposals in the first week of October to overhanl Canada's costly social-security system. He also promised an "economic npdate" later this antumn, which is expected to outline a range of measures to hring down public spending. According to Mr Chrétien, sweeping changes will he unveiled to eliminate and scale back some government programmes, and transfer others to provinces, municipalities and the private

Despite reports that the goverument is far off-target in meeting its deficit-reduction goals. Mr Chrétien reaffirmed that It would do "whatever is necessary" to bring the federal deticit down to 3 per cent of gross domestic product in the year to March 31 1997.

By George Graham in Washington

A senior US budget official warned yesterday that, although no healthcare reform hill was likely to pass through Congress this year, the need for reform had not gone away.

"It obviously does not look like we are going to be successful this year," said Mr Robert Reischauer, head of the Congressional Budget Office, an independent agency which has been charged with checking the arithmetic of all the compet-ing US healthcare reform plans.

But Mr Reischauer, speaking at a conference at Boston College, warned that effective reform of the healthcare system remained essential in order to keep the cost of healthcare from continuing to

erode US disposable incomes. The chances of completing such a large and controversial plece of legislation in the three weeks before the end of the

most observers - to be virtually non-exis-

However, Senator George Mitchell, Democratic majority leader in the Senate, and some centrist senators from both parties have continued to work on a possible compromise hill

Although Mr Reischauer has made clear, over the past year, his own commitment to reform of healthcare in the US, his agency's assessments of the competing reform plans have contributed to congressional unwillingness to act on health reform this

The CBO's assessment, for example, of the comprehensive reform, presented a year ago by President Bill Clinton, concluded that the plan could achieve its aims by guaranteeing universal health coverage, but would cost much more in the near term than the administration had calcu-

Instead of cutting the federal hudget def icit hy \$60bn (£39m) over the next six years, as the administration estimated, the plan would increase the deficit by \$70hu. the CBO said.

Republican right-wingers such as Senator Phil Gramm, who have been fighting against healthcare reform all year, declared the issue dead some weeks ago. Also, some left-wing advocates of reform such as Congressman Jim McDermott, worried that anything now likely to pass both chambers of Congress might do more harm than good, have given up the idea of

acting this year. Even so, some Democrats want a bill of some kind to come to a vote, if only so that they can pin the hlame for failure on their Republican opponents.

"They've killed reform. Now we want to make sure their fingerprints are found at the scene of the crime," one Democratic

Progress among the plagues

Edward Orlebar assesses the new administration in Honduras

r Guillermo Molina. the Honduran plan-I ning minister, says: "It'a something like the seven

plagues of Egypt." The country is undergoing a crippling energy crists, water shortages, a drought that has devastated grain production, and a spreading cholera epi-

Energy is rationed between six and 14 hours a day, and the hlackonts have set off a crime wave. Industrial production has contracted, investment is stagnant, foreign reserves have dried up, and economists are predicting negative growth this

If all that is not had enough, the government wants to raise taxes to cut a growing hudget deficit, and to release finance from the International Monetary Fund and the other international financial institutions. its proposal will he put to Congress, which will be returning to work today after the independence day hreak.

The proposed measures are aimed to reduce the fiscal deficit from 11.6 per cent to 7.5 per cent of GDP. They include a 1 per cent capital tax, a widening of the scope of value-added tax, a tax on luxury goods, and a 10 per cent tax on interest from bank deposits.

The tax increases are required before Hooduras can sign a letter of intent with ths

IMF. That will open the possi bility of \$700m (£451m) in deht relief from Paris Club sovereign creditors, and allow the disbursement of up to \$300m this year in loans from Washington-based financial institutions, which have been held

The measures have elicited widespread initial opposition from unions and professional organisations, which say these will further harm the 80 per cent of Hondurans in poverty.

Also, the measures lack the support of a majority in congress, although husiness has made a late rally in the government's favour.

Success in congress may depend on the government's ability to make clear that prospects for the country are far

more dismal if the package is not passed. Officials say the government

will be unable to meet its foreign deht commitments and would be declared ineligible for loans from the institutions on which it is heavily dependent.

"The central government does not have the necessary resources to meet its obligations," said President Carlos Roberto Reina in a televised address last week, when he attacked his predecessor, Mr Rafael Callejas, for mortgaging the country's future. Officials of the ruling Liberal

party have complained that the economic crisis is a legacy from the previous government, which abandoned fiscal discipline in an attempt to get reelected, ran up the deficit and artificially held down prices in the months before the election last November. Sharp price Increases this

year will push up inflation to about 36 per cent, from 12 per cent in 1993, say economists. Mr Reina has found it difficult to sell what is effectively another structural adjustment

plan when Hondurans have fresh memory of a harsh economic programme introduced by the last government. He not only lacks the support of the opposition National party in congress, which sees the package as a vote-loser, but must persuade a sector of his own

party which has little appetite for a widely unpopular usea

If the economy slides further and social tensions rise. Mr Reina risks a reversal of the successes of his government so far, say observers.

"The story on civil military relations and human rights is exceptionally good," said a senior western diplousit. "It would be a tragedy for Honduras if support from the international community were to full

Mr Reina has delivered on his promise to abolish forced military recruitment by pushing through a hill in May, despite ferocious opposition from the powerful military who have acted with almost total autonomy. It awaits ratification in the next session of congress, from January

He went over the heads of the armed forces to appoint his own candidate to head Hundutel, the national telephone company, which is run by the military, and has said he wishes to privatise it.

His government has also overseen the establishment ol a new investigative arm of the police which will be under the control of a new civilian public prosecutor, after the disbandment of the DNI, a notorious, military-run police force accused of numerous violations hy human rights groups.

FT Worldwide Residential **Property Survey.**

On Saturday, September 24 the FT Worldwide Residential Property Survey will be published with the Weekend FT.

It will look at a wide range of properties around the world including the most desirable residencies in London, Parls, Tokyo and New York.

There will also be insights into what makes a waterside development succeed. And it will provide a useful review of islands in the winter sun as well as chalet properties even for those who do not like winter sports.

Weekend FT

For more than a century and a half, Patek Philippe has been known as the finest watch in the world. The reason is very simple. It is made differently. It is made using skills and techniques that others have lost or forgotten. It is made with attention to detail very few people would notice. It is made, we have to admit, with a total disregard for time. If a particular Patek Philippe

movement requires four years of continuous work to bring to absolute perfection. we will take four years. The result will be a watch that is unlike any other. A watch that conveys quality from first glance and first touch. A watch with a distinction: generation after generation it has been worn, loved and collected by those who are very difficult to please: those who will only accept the best. For the day that you take delivery of your Patek Philippe, you will have acquired the best. Your watch will be a masterpiece, quietly reflecting your own values. A watch that was made to be treasured.

approved by any classification The societies have been criticised for failing to impose strict standards but the International Association of Classification Societies, which groups the 11 largest, said that under the tough condi-tions at sea defects can emerge after a survey has been carried

Details of ships detained in UK port inspections are passed on to 14 other European nations allowing ships with a poor record to be selected for future inspection.

Britain in brief

Lib Dems' tax plans in confusion

Attempts by the UK's third political party, the Liberal tinctive tax policy were thrown into confusion yesterday as the newly appointed Treasury spokesman appeared to overturn key planks in the party's latest tax and benefit In e presentation to the par-

ty's Brighton conference designed to cast the Liberal Democrats as a party of low rather than high taxation, Mr Malcolm Bruce rejected a plan from its policymaking committee to back an increase in the top rate of income tax to 60 per cent. Instead he proposed that no one should pay a marginal rate of above 50 per cent. At the same conference, Mr Menzies Campbell, the party's new foreign affairs and the UK to maintain its current level of military spending, despite the traditional calls from some delegates for uni-

lateral nuclear disarman Mr Campbell said Britain should resist "another raid" on the defence budget even if recent attempts to forge peace in Northern Ireland led to a reduction in troops there.

Feelgood factor lags statistics

Consumer confidence has fallen this month, suggesting that the UK's recent spate of good economic data has still not translated into any overall "feelgood" factor among the population.

A survey by Gallup yester-day, conducted before the Bank of England's recent interest rate rise, shows that 31 per cent of people surveyed expec-ted their household's finances to deteriorate in the year abead compared with 19 per cent who expected an improve-

Rail fund to sell old masters at Sotheby's

The British Rail Pension Fund is to sell 17 of the old master peintings it bought in the 1970s when it invested £40m in works of art. They will be auctioned at Sotheby's on December 7 and are expected to bring

Woodland grant scheme under way

A grant scheme for tree planting was yesterday opened to applicants by the UK's forestry

The scheme is a stepping up of government efforts to increase the production of conifers for timber and to improve woodland management. However, timber groups said the package failed to provide enough incentives for new land or money to be put

into forestry. The new woodland grant scheme, part of the govern-ment's review of the forestry sector, involves an increase of at least 10 per cent in funding.

BT and union back away from conflict

The executive of the National Communications Union is today expected to back off from industrial conflict with British Telecommunications over new

working patterns. BT and the union have been in negotiation for several months about new work pat-terns designed to ensure more staff are available to customers at weekends and in the eve-

Smith & Nephew to redevelop in Hull

Smith & Nephew, the healthcare company, is to spend £41m (\$64m) redeveloping its medical division's site in Hull.

The project, the largest single capital investment in the company's 138-year history, is intended to increase the diviand upgrade manufacturing facilities to keep pace with increasingly stringent international healthcare regulations.

Lloyd's is Saunders' trial was 'oppressive'

Law Courts Correspondent

Alleged fraudsters should be treated the same as other suspected criminals and not be Lloyd's of London has been given a more positive report deprived of their right to than a year ago by Standard & Poor's, the US credit-rating silence the European Commis-aion of Human Rights ruled agency, Richard Lapper writes.
S&P's annual survey of the financial stahillty of Lloyd's yesterday in its judgment declaring unfair the trial of Mr Ernest Saunders, the former syndicates indicates that the chairman of Guinness, the UK overall health of the market

drinks company. As expected, the commission ruled his trial was "oppres-sive" and hreached Article 6 of the European Convention on Human Rights because the jury heard evidence Mr Saunders had given to Department of Trade and Industry inspectors when his right to silence

had been removed. The judgment also appears to support the interpretation of many UK lawyers that the unique powers given to the Serious Fraud Office under section 2 of the Criminal Justice Act 1988 which also allow the removal of the right to silence might also breach the conven-

The Commission did not mention Section 2 specifically but ruled: "It cannot be comconvention that varying degrees of fairness apply to dif-

ferent categories of accused. "The right to silence, to the extent that it may be contained in the guarantees of Article 6, must apply as equally to alleged company fraudsters as to those accused of other types of fraud, rape, murder or terrorist offences.

There can be no legitimate aim in depriving someone of the guarantees necessary in

securing a fair trial." As expected, the commission restricts its criticisms of Mr aunders trial to the use of the DTI evidence in a criminal court. It accepted that the "right to silence" is not guaranteed by Article 6 of the Convention and accepts that this right may not be unqualif-

However, the judgment says: "The very basis of a fair trial presupposes that the accused is afforded the opportunity of defending himself against the charges brought against him. The position of the defence is undermined if the accused is under compulsion, or has been compelled, to incriminate him-self."

INNOVATION. OR OUR DIFFERENCE BETWEEN THE IMPOSSIBLE

AND THE POSSIBLE.

in Electromechanics, ere-

sylvening. Technology which

In the past year, we've

seen our storage

business grow

30%, our PC

business grow 100%, and our

Alpha AXP sales increase 164%.

Some people think those figures already represent a comeback.

To us, it's just a beginning. Digital is changing from a company famous for complicated decision-making, to one famous for decisiveness.

At our new Computer Systems
Division, we're applying the
lessons learned in our PC operation to our core business. The
result: a division with its own
manufacturing, engineering, sales
and marketing—one that lets us
pay more attention to your needs,
with systems unequaled in their
openness and range of choice.

THE BEST OF CISC,

That choice begins with two
equally supported platforms—Intel^m
CISC for very high volume and
high performance PC clients and
servers, and our 64-bit Alpha AXP^m
RISC for absolutely blinding
performance in workstations and
servers. And we offer the only
products you can convert from
CISC to RISC.

Now the industry is finally beginning work on 64-bit RISC, and we're happy to see this endorsement of Alpha AXP. But HP and Intel say it'll take a few years. We have 64-bit RISC now. With 6,000 applications.

OUR SYSTEM: MANY SYSTEMS

Fact is, Digital is a multiple operating system company because that's what most of you are.

In DEC OSF/1, we have the most standards-compliant, highest quality UNIX in the industry. It gives you outstanding high availability features through clustering and the fastest recoverability of any UNIX on the market. And ours is the only commercial 64-bit UNIX system, which experts say will keep us the price/performance leader for years.

We offer OpenVMS™ because millions need it, as it provides the best clustering capabilities on the market for high-security,
high-throughput, business-critical
work. We plan to support it,
invest in it, keep customers fully
operational with it, and introduce
it to new customers as well.

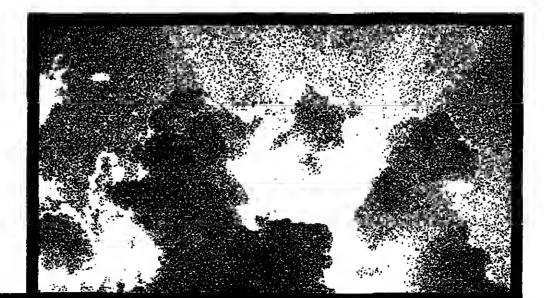

What's more, Digital has partnered with Microsoft® to bring you the Windows™ operating environment, Windows NT™ Workstation and Server.

All these system options give you one very important thing. Choice without compromise.

OUR SOFTWARE: TRULY OPEN

Our openness even extends to software. One excellent example is

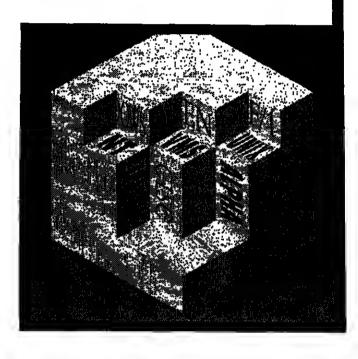

But don't worry, we're planning a comeback.

our PATHWORKS™ application, which lets you connect with anybody on virtually any network operating system, no matter what client you're on. And our LinkWorks™ software lets you share and edit work regardless of application, on most any network operating system.

OUR STRATEGY: YOU CALL THE SHOTS

This multiple platform/multiple operating system strategy means we never have to force a migration on you. You choose what's best now and we support it. You decide when, where, or if you want to migrate and we provide what you need. Simple.

TECHNOLOGY

Nothing proves this better than our pioneering 64-bit RISC architecture. Where else in this industry are so many competitors so far behind a single leader? Right now, our Alpha AXP clients and servers offer the highest performance and the best price/performance you can buy.

THE EASIEST TO DO BUSINESS WITH

One thing that definitely isn't changing is our world-class service and support. To be even more responsive, we're dramatically expanding our relationships with resellers, VARs and System Integrators. Of course, if you need a direct relationship, we're here, with our partners, delivering the products. Our goal is to be the easiest company to do business with. With the products and support that will keep you competitive into the 21st century.

Just like us.

digital

Expansion on the agenda

Two surveys indicate recovery and growth, writes Andrew Taylor

ritish industry and commerce seem to be getting itchy feet. Many senior executives are contemplating moving their headquarters to new cities as their businesses recover and they feel constrained by their surroundings,

according to two separate surveys The most surprising feature of the surveys is that expansion is the biggest reason given by companies expecting to relocate in the next five years. Over the past few years cost cutting and staff

reductions were the biggest reasons for moving headquarters. Neither the identity of the companies, nor the extent to which relocations might include manufacturing operations, has been revealed. Some of the ses may be divisions of big groups, but many appear to be small and medium-sized companies with an average annual turnover of £26m. The survey by Black Horse Relocation, part of Lloyds Bank, and ment Today magazine. shows that more than a fifth of

The recession has not prevented new businesses from being formed or growing'

senior executives who responded expect to relocate in the next five

John Carolan, managing director of Black Horse Relocation, says. "The recession has not prevented new businesses from being formed or growing. A number of these appear to have reached the size where they will need to move. There may be some bunching with companies postponing decisions until they feel more confident that the

recovery will be sustained." The survey received replies from chairmen, chief executives and other senior directors from 536 companies. More than a third cite expansion as the main reason. for moving, twice the proportion indicating restructuring or

"It is the first time in the 21

years that I have been in industry that companies have cited expansion as the main reason for

moving. It is very encouraging for the economy," says Carolan. A separate survey of 480 directors and senior managers by property consultants Richard Ellis shows that 31 per cent expect to relocate their office buildings in the next five years as a result of "major structural changes in their industries". Among the most important features in choosing a iness location, according to the surveys, are quality of the local workforce and road

Property costs are regarded as much less important, says Richard Ellis. The survey says that only half of those interviewed "claimed they knew the annual cost per person of occupying their present building and only 22 per cent knew their moving costs per

Quality of life appears to rate highly with executives who chose Bristol, Edinburgh and Nottingham as the most favoured centres for locations in the Black Horse survey. Provincial cities such as Norwich, Plymouth and Exeter were highly regarded.

The most important personal factors in support of relocation cited by executives include; overall quality of life (57 per cent), cost of living (30 per cent), crime rate (29 per cent), access to countryside (27 per cent) and the quality of schools (26 per cent).

On business grounds the main reasons cited by executives are quality of the local workforce (57 per cent), cost of overheads such as local authority rates (36 per cent) and availability of local customers (23 per cent). Property costs and competitive

wage rates score 21 per cent and 20 per cent respectively.

Black Horse, which expects to move about 4,500 families this year on behalf of companies and public-sector organisations, says: We are still evaluating the results of the survey but there appears to be a new dimension to relocations compared with the 1970s and 1980s, which mainly were concerned with reducing overheads rather than improving the quality of the business."

t is something a biologist would recognise immediately: the highly effective strategy of the virus and the chain letter. Both have an in-built mechanism to make sure that whoever is at the receiving end of the "message" passes it on to at least another five or six unfortimate souls. That way it spreads through the population at

maximum speed. Tucked away in the quality assurance standard BS 5750, or BS EN ISO 9000 to give it its new official title, is a similar masterstroke: the requirement that every company seeking quality accreditation must have a purchasing procedure which examines the quality policies of its suppliers.

As a result, a July poll by the Small Business Research Trust (SBRT) recorded a rapid rise in small business BS 5750 registra-tions. One in 10 had already regis-tered and a further 31 per cent were planning to. Most of the companies registered because the business con-

cerned felt under pressure to do so. As Reginald Shaughnessy, chairman of the committee responsible for ISO 9000 at the International Organisation for Standardisation. admits: "Eighty-five per cent of the use of the standard is primarily for third party supplier registration rather than a self-imposed internal system for quality effectiveness and continuous improvement."

That, complains David Martin, head of the trade and industry com-mittee of the UK Federation of Small Businesses, means "BS 5750 has almost become a licence to

Viruses breed resistance, and this one is no exception. Criticisms among small businesses of BS 5750 are familiar. The charges include that it is too costly in terms of consultants' fees, management time and bureaucracy, it is unnecessary for smaller organisations where there are flatter lines of communication; it is manufacturing-based and not relevant to services; it is merely being used as a marketing tool; it is more of a consistency standard than a quality standard; it encourages an obsession with processes instead of customer focus

"The whole approach of BS 5750 has a tendency to make you inwardlooking. Using it you can produce lousy products very efficiently," says Martin. "A lot of our members say it is an absolute con-trick to force them to pay a hell of a lot of money to consultants,"

These criticisms are by no means unanimous. According to the SBRT survey only firms with up to four employees are strongly against BS 5750, while 56 per cent of businesses employing 20-43 staff feel it is appropriate. In addition, a growing num-ber of small to medium-sized service companies are discovering benefits. Peter Brown, operations director at mind on processes that everybody

Alan Mitchell on why UK businesses are finding the BS 5750 quality standard increasingly catching

Bitten by the bug

THE GOOD NEWS IS THAT THE COMPANY HAS BEEN AWARDED THE INTERNATIONAL STANDARD FOR QUALITY ASSURANCE. THE BAD NEWS IS THAT WE WENT BUST DOING IT

market research company Harris. says BS 5750 helped the company cut rather than add to paperwork, while Jerry Wright, managing direcor at recruitment consultancy Michael Page, found that seeking

accreditation forced him to improve the structure of job interviews. Likewise, Yorkshire-based advertising agency The Charles Walls Group discovered it needed to tighten up its training procedures. John Oldfield, group managing director, says: "BS 5750 focuses the

takes for granted - and interprets differently. Anybody who says it is onerous is not running their busiss properly."

Criticisms are at last being slowly addressed. Since April the British Standards Institution has been applying a streamlined accreditation system for smaller companies which it claims is "proving very successful".

More significantly, there are moves to change both the content and context within which BS KN ISO 9000 operates. ISO has embarked on a review - due in the next few years - which it says is far wider in scope. On its agenda is what Shaughnessy calls the "flaw in application" where the accreditation badge is seen as more impor-tant then the commitment to total

quality.

Meanwhile, a European Commission paper, called "Elements of Quality Policy" is seeking to put ISO 9000 "back in perspective" as just a small part of TQM. In addition, a small but fast-growing band of blue of the open proving band. of blue chip companies, including parts of Erzon, Kodak, Unisys, Du Pont, Scottish & Newcastle and Southern Electric, have sought accreditation for an officially recogaccreditation for an officially recogmised extension to BS 5750 covering
marketing sales and customer service—an-extension which its originator claims fills many of the gaps
left by the current standard.

At gressent while BS 5750 has limited procedures for responding to
customer complaints and aspects of
sales, it does not force the business
to answer fundamental marketing

sates, it does not note the cuantess to answer fundamental marketing questions, says Ian Griffith, joint managing director of Markating Quality Assurance, the recognised BS 5750 accreditor which developed

the extension.

The questions include how the company identifies customer needs; tompany measures these needs into a business plan; how that in turn is manifested in a marketing strategy, the procedures used to implement that strategy and the methods used to measure its success, including a

Griffith, who advised the DTI on its recent marketing initiative, says his experience of accrediting companies' marketing, sales and customer service functions reveals that small and large organisations share com-mon failings, such as a lack of rig-our in the gathering of customer information and feeding it into internal decision-making; a lack of agreed procedures for segmenting markets and products, and poor internal communications between marketers and other functions.

A few smaller companies such as Michael Page and Yorkshire-based window fixings and fastenings firm WMS Group have already gained accreditation for their marketing and sales. Griffith is now working on creating specific guidelines for individual industry sectors, such as car dealers. -

However, whether the combined effect of such initiatives will succeed in winning the critics round remains a moot point, if only because experience of implementing BS 5750 varies so widely. As David Kent, WMS group chief executive and a self-proclaimed enthusiast of third-party accreditation scheme says: "It's very difficult to put financial numbers on it. It's like religion. You either believe in it, or you don't."

Bank charges take a tumble

Increasing competition among large UK banks has driven down hank charges over the past two years, reversing some of the rises imposed during the recession, according to a price index published in the newsletter Small Business Perspective.

Since June 1992, the big four benks – Barclays, NatWest, Lloyds and Midland – have reduced bank charges by more than 6 per cent after taking account of inflation, it said.

The largest banks have been cutting their charges faster than the smaller banks, although smaller banks generally remain

"It does not mean that all benk charges are going down but it does mean - contrary to the general impression - that basic processing charges for small firms, which rose during the recession, are now being driven down again by competition," said a spokeman for Small Business Perspective, which is published by Graham Bannock and Partners, a London-based consultancy.

Holding on to the business

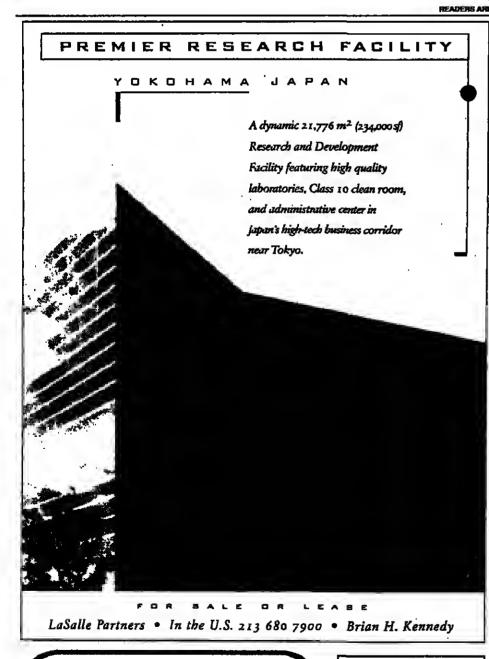

Only a third of small business owners have long-term plans to sell up and retire, according to a survey by Lloyds Bank and the Small Business Research Trust. Most people want to maintain their relationship with their

husinesses to some form, nsnally working "reduced hours" or "visiting on an occasional basis".

The survey found striking lifferences between the responses of men and women owner-managers. Only 20 per cent of women wanted to sell up compared with 38 per cent of men. Some 15 per cent of women said they would "never want to withdraw" compared with 4 per cent of men.

The report was based on esponses from 350 small businesses in the north, midlands and south-cast OE.

FOR SALE

AIMES BEACH HOTEL THE GAMBIA

LOCATION: Sitnated slightly off the coast road 6 miles from Banjul on Cape Point, Bakan on the south side of the month of the River Gambia, Aimes Beach Hotel and Apartments opened in 1988 and lies in extensive landscaped tropical gardens with a wide beach frontage.

The grounds have been extensively landscaped with lawns, palms of several varieties, flowering shrubs and hedging dividing off all of the walkways from the bedroom blocks to the main building.

ACCOMMODATION: Consists of 120 twin bedded rooms all with shower, toilet and private balcony. In addition there are 45 one bedroom self catering hotel spartments each with en-suite facilities, kitchenette, terrace/balcony and lounge area. Each are situated in 2 storey bedroom blocks equally spaced around the grounds with interconnecting walkways back to the main building

CASINO: A fully equipped casino is included in the hotel complex and a casino licence is available.

FACILITIES: These include swimming pool, tennis courts, volleyball courts, 4 bars, 3 restaurants and the complex includes several shops, a supermarket and private apartments presently producing substantial rental income.

The Joint Administrative Receivers, Len Gatoff and lan Brown, offer for

BAILHACHE LABESSE = Advocates & Solicitors =

The Partners in the firms of Bailhache & Bailhache and Bois Labesse are very pleased to announce that the two firms have merged effective I September 1994. The firm now comprises eight partners and approximately 70 support staff. The predecessor firms were very long established with the older having its origins in the 1890s. The merged practice will continue to maintain very close association with a number of commercial, banking and other financial institutions for whom it now acts. In the past a number of leading firms of London solicitors and account mus have instructed the predecessor practices and regular instructions were also received from professional advisers in other major international finance centres. As well as providing legal advice in many diverse areas to their significant local client base, the partners in the merged firm have particular interests in mmercial litigation, banking and securities work. In addition, due to the Island's fiscal status the merged firm's partners have developed particular expertise in the provision of offshore advice and in the related ancillary areas of trusts and corporate stuctures generally. The firm has a number of inhouse fiductary service companies which are available to its clients.

at that I want to be a part of

something that will be larger

behind this "growth impera-tive" in professional firms: the

first is the cocktail of motiva-

tional drives in professional

people; and the second is the

need to sustain the profitabil-ity of the business.

The motivation and psycho-

logical drives of professional

people tend to differ from those

who follow alternative careers

in quite fundamental ways.

Professional people have a greater need than the average

person in an organisation for:

influence over their own

· constantly meeting and

overcoming new challenges;
• professional growth and

development, to be able to han-

dle better quality work and cli-

and for a feeling of value.
 For many young lawyers the

ultimate career prize is to become a partner. At a stroke

many of their needs are met.

direction and thinking of

As partners they have a say in

their firm, and so satisfy their

need to influence their own

future. It can provide new chal-

lenges, and is certainly a mark

of recognition by colleagues.
Motivating high-quality peo-

recognition;

gic issues at stake?

grow.

David Temporal on why law firms feel the need to expand

and to perform highly there-fore involves ensuring the goal of partnership is realistic and

Matntaining this motivation requires firms to grow at a rate that results in a steady flow of new partners, in order to convey a sense to people that their ambitions can be satisfied.

This does not mean everyone can become a partner but it does mean the prospect for talented people to achieve partnership must be evident. People understand the economic reality of life in a professional firm and that new partners can be appointed only if the business is growing. Hence if people do not see growth, they will ek alternative routes to meet

The second explanation for the growth imperative is economic. The profitability of most medium to large law firms depends upon having an . appropriate economic relationship between equity partners and other fee earners, namely its leverage. If the leverage falls below a certain level then, assuming other economic varishles remain constant, profitability will fall

increase the volume of work to sustain more partners without diluting earnings of the existing partners. For example, a firm with a leverage of 4 to I has to ensure that for each new partner it brings into the equity there is enough work to sustain another person at a partner rate and four other feeearners. Each new partner must generate sufficient work to maintain the firm's lever-

new partners requires a firm to

ence one way to reconcile the need to ensure people are motivated (by seeing that the "ultimate prize" can be realised) with the need to sustain the economics of the siness is to maintain a rea-

sonable growth rate. This is not, however, an option available to every firm, and many will find growth very difficult to achieve in the latter 1990s. An analysis of growth rates of the medium to large firms across the country highlights quite stark differences between the top nine City-based firms and the rest, and also between the firms in Maintaining a steady flow of the top hine. Growth rates,

among these nine firms over the last three years vary between 5 and 32 per cent. What are the implications for

firms that cannot sustain firms that cannot sustain growth comparable to the competition's? Are they to accept that holding on to good people is almost impossible and that they are likely lose their best people? This is not an option for any firm wanting to remain

competitive. Even if the value of work is unlikely to grow much in the short term, the principles governing the motivational needs of people still apply. One short-term option for firms facing limited growth is to ensure there is a real sense of momentum in the firm so people can see a realistic possibility of advancement to partnership.

This requires a rigorous approach by the firm to the performance criteria for both potential and existing partners. firms need to engineer more room in the partnership to allow people with the requisite qualities to become a partner, to the extent of requiring existing partners to leave. Moreover, the ability to expand the business through increased revenue from existing clients or through attracting new clients must become a mandatory skill for every partner.

Another option for nongrowth firms is to enhance the effectiveness of the deganisa tion itself. It needs to provide people with an environment in which they can satisfy their motivational drivers without achieving partnership. Achieving this requires a further, mandatory shifty among partners - to provide high levels of leadership coupled with an ability to manage people more effectively than is the case among most professionals

oday. In a period of intense competition, when attracting and retaining high-quality people is so important, it is essential that firms achieve rates of growth equal to or above the average for those in their group. If they cannot achieve the growth required then partners will need to change their management style in a funda-mental way. If they cannot do either, they run the risk that their most talented people will be attracted elsewhere and that this will trigger a steady decline in their

Pajares accepts Savoy offer

The Savoy group yesterday announced that Ramon Pajares, general manager of London's Four Seasons hotel, is to become its managing director on November 7.

Pajares' appointment, while expected, will be greeted with relief by the Savoy and its new-ly-constituted chairman's committee of Sir Ewen Fergusson, Rocco Forte and John Sinclair.

The committee was set up last week after the departure of Giles Shepard as managing director and represents a truce between the Savoy and Forte factions on the Savoy board. Forte holds a majority of Savoy shares but a minority of votes. Pajares was the favoured choice of both Forte and the

TECHNOLOGY

Putting people before machines

A new report looks at why 'good' IT systems fail, says Joia Shillingford

any "good" information technology systems fail because technical issues are put first and human and preanisational issues second.

nrganisational issues second.

This is one of the findings of a report* to be published this month by London consultants Pagoda. Other common causes of failure, according to the report, include projects where:

The buped-for benefits are too

 The buped-for benefits are too narrow and insufficiently tied to business strategy;
 The benefits are not

communicated to staff so they try
to adapt new systems to old ways
of working;

The benefits are too broad,
insufficiently prioritised and may

even conflict.
Pagoda's conclusiums are based on reviewing the experience of 100 organisations and on 30 in-depth interviews with big users of IT. Judith Wainwright, a director of Pagoda, argues that the critical success factor in implementing systems is the way the buman and organisational issues are planned; the technology is secondary.

She gives several reasons. First, IT systems are now so central to an arganisation's function that their effect is felt by most emplayees and, increasingly, by customers. Second, there are fewer technical constraints than there used to be. Third, more managers are using computers than befure. They cannot be coerced into using them, so unless they are convinced of the benefits

of a system they will not use it. However, linking human and technical goals is not easy. The report suggests that companies introducing new systems should at the same time consider all other aspects of the husiness that are likely to be affected by the change. This could include technology, husiness processes, organisational structures, job design, staff attitudes and skills.

All should be treated within a single project plan because decisions taken in one area will inevitably affect other areas.

Wainwright believes large projects involving change should be run by a line manager with a senior member of staff, such as a director, backing them up.
Commitment and input to the
project among the staff can he
gained by involving them in the
choice and definition of the

Users should also work closely with prototype systems — partly-built versions that staff can experiment on — helping to shape them. This approach works better than basing systems on early, detailed specifications because non-technical staff are aften not good at visualising what the promised system will look like. Then, when it arrives, they find it is not what they wanted.

Getting users to participate in systems design takes longer but is more likely to yield benefits in the long term. But "even when planning and design have been good, poor implementation can still make a system fail", warns Wainwright. "Implementation hadgets and timescales are usually the first to be cut. Operational and systems managers often give in to political pressure to bring forward implementation because they feel that by then the real work has been done," she says.

"This reflects the common view that with IT change projects, you plug in the system and the benefits flow – whereas wider changes are usually involved."

The study advises companies introducing IT to keep their staff involved and to communicate with them at all stages. Training afterwards is also important.

According to the report, users like to discuss projects with their managers and any staff who have experienced similar change.

Wainwright believes that a participative approach reduces the risk of start-up problems and of project failure because human and organisational factors are the greatest source of risk. Participative approaches to systems change are most commonly found in factory antomation projects, according to the study, where IT makes a small but important contribution.

*Why "Good" Systems Fail, available from Pagoda. Tel 071 497 2280 later this month. he half-a-dozen Texas oil men and computer industry executives sitting round a boardroom table in Houston last week bore little resemblance to die-hard revolutionaries.

blance to the hard revolutionaries.

Sipping soft drinks, their demeanour was more that of correct corporate citizens. But their rhetoric
revealed a true believer's commitment to nothing less than the
wholesale destruction of the current
structure of the world oil industry.

Their chosen weapon is a new set of software operating standards being developed by the Houston-based Petrotechnical Open Software Corporation (Posc), a non-profit organisation set up in 1990 by British Petroleum, Chevron, Mobil and Texaco of the US and Elf Aquitaine of France, five of the world's biggest international oil companies.

If implemented, the standards should ease the growing problem of data management and incompatible computer communication systems within one of the world's most technologically intensive industries. And that could lead to early cost reductions in the "upstream" exploration and production end of the nil and gas business.

But the real power of the new standards is that they would enable companies to break down the barriers that have been built up over decades between the various technical and scientific disciplines involved in oil and gas exploration. Price technology can be "a destroyer of current organisations", according to Larry Gehagen, a BP executive seconded to the corporation. He believes that adoption of an industry-wide computing standard will be as important to oil companies as the adoption of a common gauge for track was to US railways in the last century.

The result, he predicts, will be a radical restructuring of oil companies, with whole layers of bureaucracy being abolished. It could also usher in the era of the "virtual oil company", in which small teams of specialists located around the world exchange complex geological and exchange real time via information superhighways.

That prospect, according to a Posc executive, caused one Alaskan oil man to note recently that: "If this thing really works, one man and his dog could develop an oil field, And you might not even need the dog."

Several of the large computer groups and software suppliers such as IBM, Digital and Hewlett-Packard, are co-operating with the Posc project, along with government agencies such as the Department of Trade and Industry in the UK and the Norwegian Petroleum Directorate.

The need for a unified data and computer communication model for

The oil industry could be revolutionised by a software standards project in Houston, writes Robert Corzine

A new field of exploration

the exploration and production industry has long been recognised, according to Posc supporters. But attempts by companies, even the largest ones such as Exxon, to integrate the various technical functions failed because of the high costs involved.

The scale of the problem has been exacerhated in recent years as exploration and production companies experienced an explosion of data from new seismic and other scientific techniques which have been developed.

The current structure of most oil companies has also proved to be a problem. At present, most are divided into functional departments, such as geology, petrophysics and reservoir engineering, a structure which industry executives say tends to reinforce existing cultural differences between the groups. Traditionally, these depart-

ments have operated in relative isolation, and over the years they have tended to acquire unique solutions to their technical problems, both in terms of computer hardware and

The result, according to Posc executives, is that information held

'One man and his dog could develop an oil field. And you might not even need the dog'

by one department is often inaccessible by, or unknown to, another. In addition, the inability of the departments to share information without reformatting it to different standards has reinforced a linear corporate structure. And that has made it

difficult to put in place the inter-disciplinary teams that many industry executives believe are the most effective way to organise the indus-

Gehagen notes that the poor standard of data management within the industry can have expensive consequences. One company recently mobilised its resources for an urgent seismic survey in a portion of the Guif of Mexico in advance of a US government auction of oil leases. At the last minute one member of staff remembered that some years before the company had not only conducted a seismic survey of the area, but had also drilled some inconclusive wells before handing it back to the government.

"Eighty per cent of data held by oil companies is historical and static," according to Gehagen. Only 20 per cent is generally in current use, with an even smaller amount considered as secret, commercially strategic information.

strategic information.

Even so, many companies jealously guard it, although a large
number "dun't knnw what they
have or can't find it" when they
need it. All too often the result is
that geologists and ather professionals can spend up to 60-70 per cent of
their time searching for information
rather than using their skills to
analyse it.

analyse it.

One of Posc's main aims is to create standards that make consistent the way in which the industry stores information so that it can can be used more effectively.

Handing over the management of such technical data to an outside company which could put it in a Pose-compatible format would save millions of dollars a year for most oil companies, says Gehagen.

oil companies, says cenagen.

The development of such largescale databases open to the industry
would also free the various experts
within the oil companies to spend
the bulk of their time doing their
job rather than tracking down data.

The apportunity to transfer data

The apportunity to transfer data easily between disciplines could also result in large cost savings. A recent pilot project in the US estimated that the time taken to drill a new well in an existing oil field could be halved if ail disciplines were working to a common data model.

"Exploration and production companies continuously adopt new computing technology," says Bill Bartz. Posc's president. "If they proceed without the benefit of standards, they risk incurring unnecessary costs and experiencing critical delays in implementation."

It is that element of Posc technology that could propel oil companies into a radically different future. Most have launched extensive restructuring programmes to save costs in an era of relatively low oil prices. But they "have slashed and hurned without fundamental changes in their business structures," says Gehagen.

He believes that adoption of Posc standards would enable executives to make the best use of the team structure now being promoted by many companies. "People around the world could be much more productive if they were working with the same underlying system."

The adoption of Posc would also have a big impact on information technology companies, which advise companies on how to implement such far-reaching changes, and on the software houses that supply the industry.

The first software products

The first software products designed to the new standards will begin appearing next year, although industry experts expect it could take three to five years to fully change over.

OUR INSURANCE AND FINANCIAL SETLLS SET A CAR RENTAL FIRM ON A FASTER ROUTE. While helping a multitrational car rental firm manage its complex U.S. insurance needs, the AIG Companies were asked to develop a cost-effective plan for coverage throughout Europe. Our captive management experts showed the

company a new direction. They established a self-insured retention program and a claims-management system for the firm, while our

portfolio specialists in London implemented a funds-management plan for the multimillion-dollar captive. Excess coverage was written by an AKG company in Europe. The result was a comprehensive risk management program created without sacrificing either

effectiveness or continuity. And another demonstration of how the AIG Companies provide the definitive response to risk.

WORLD LEADERS IN INSURANCE AND FINANCIAL SERVICES.

A firm commitment to abstraction

William Packer admires the work of Barbara Hepworth at the Liverpool Tate Gallery

worth and Henry Moore were run eulometically together, as the joint-pioncers and life-long protagonists in the modern phase of British sculpture. The claim was never entirely true, the creature more of the art and critical politics of the 1930s, with Herbert Read and Adrian Stokes the great revisionists, than the more complex realities of the 1920s. But it served rell enough in its time, and it especially suited Henry Moore's own driven and temperamental need to be recognised as pre-eminent in the field.

I once had the evidence direct from the great man himself, having gone to see him late in 1976 to talk about sculpture in Britain in the 1930s and 40s. The conversation turned inevitably to Barbara Hepworth and the nature of whatever contribution she had made. "Ah: Barbara", he said. "You know, I taught her everything

Whether or not he really did believe so, we can never know. I rather think

here was a time when the names of Barbara Hep-manus of Barbara Hep-speculate. There he was, enjoying in his late 70s the final spectacular confirmation and celebration of his life's achievement: and there was she, dead only the year before, and her reputation qualified by the uncertain work of her last years, when her health was failing and spirits low. And this was the pretty slip of a girl, some five years his junior, whom he found a year ahead of him at Leeds College of Art when he came back from the war, and who went on before him to the Sculpture School of the Royal College and won the travelling scholarship to Italy before he did.

But whatever his reasonings or feelings might have been, it most certainly was not true. What is true is that for e few crucial years around 1930, a time critical for each of them as they sought to establish themselves in their careers, the ambiguous and perhaps competitive relationship they had enjoyed as students was transformed into one of close and mutual professional stimulation and support. There they were in neighbouring studios in Belsize Park. The Moores were newly-married, and she then was with John Skeaping. another sculptor whom she had married in Italy; but they separated in 1931, after which her second husband, the painter Ben Nicholson, moved in.

And again with Nicholson, the easy

assumption is that it was he too, in that creative ménage à trois, who led her to her own commitment to abstraction. But Nicholson, some decorative abstract exercises in 1924 apart, would not turn to formal abstraction as such until 1933. As for Moore, he was making some severely ebstracted and surreal carvings by 1931, but they retained nevertheless e figurative connotation, and it was not until 1933 and even later that he made any sustained commitment to purely formal abstraction. Even then, as he openly declared, the complete abandonment of an organic or figurative

reference was not for him. With Barbara Hepworth, the transition from figuration into abstraction was more or less in step with Moore's, neither leading nor following. Both, in the 1920s, had drawn upon primitive and ancient examples, he from Mexican, she from Egyptian carving especially, and both were now looking closely at contemporary surrealism and constructivism, and of course et each other. But with Barbara the commitment to abstraction, when it came, was characterised by none of the other's equivocation and self-doubt. And though she would return from time to time to a figurative reference, that essential commitment to a pure and formal abstraction would sustain her all her life.

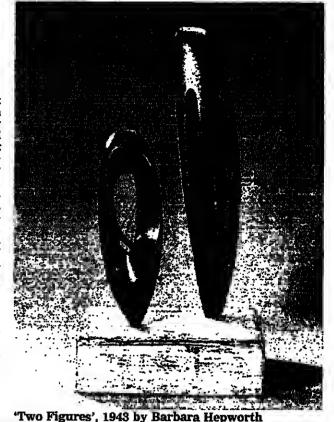

Ironically, it was her first husband, Skeaping, who in his own work withdrew from the avant-gardism of the 1920s into e safer academicism, who had had the most direct influence upon her, from their years together at the British School et Rome. That influence was technical, for he was a consummately skilful carver. It is upon her own extraordinary refinement and originality as e carver that her reputation finally rests.

This exhibition has been beautifully chosen and installed, rightly laying

the emphasis upon her work on that human and domestic scale, at which the artist's hand is most directly engaged with image and material together. She was capable of working successfully et e monumental scale her "Family of Man" is currently splendidly set out on the hillside al the Yorkshire Sculpture Park - but in this, in her later years especially, and in her modelling rather than her carv-

ing, she often seemed to lose her way. Now the record is put straight and tt is as a carver of unique sensibility and true originality, breaking open the form and reaching into the spaces within, that we properly celebrate her. Most of all we celebrate the radi-cal achievement of thet first transition to abstraction, that is set out so clearly in the first few rooms of this important exhibition.

Barbara Hepworth - A Retrospective: Tate Gallery Liverpool, Albert Dock, Liverpool, until December 4, then on to Yale and Toronto: sponsored hy Manchester Airport and supported by the Henry Moore Foundation.

Scene from Bill Bryden's production in the Harland & Wolff Shed in Glasgow

Theatre/Alastair Macaulay

'The Big Picnic' in a battlefield

cerns a bunch of Scotsmen fighting in the First World War. It has several visual wow effects, of which the main one is that the audience moves (part of it is moved on a vast galley lined with seats) from the "Glasgow" end of the huge Harland & Wolff Engine Shed (in Govan, Glasgow), to the "trench" area in the middle (real trenches dug amid six or more feet of surrounding earth and mud), and so into the final waste land of the battlefield itself, pitted and baked. And it is

accompanied by music of several kinds. There are no great surprises for those of us who have heard even a little ebout the Great War. We are taken through the horror of innocent young men being killed or transformed by warfare; and we see famous events such as Germans and British exchanging cigarettes and playing football on Christmas Day. Also (see below) the Angel of Mons. Some of these incidents are presented sharply enough to prompt me and other audience members to laughter or tears.

four hours. And it is woofully underscripted. (Bryden himself is author and director.) It is astounding how often ordinary sentences or phrases are repeated to no good purpose. "That was the devil's work," says Hughie Frizell ponderously, "the devil's work, 'cos it was murder, murder." "You alwaye know," says Norrie Beaton lugubriously, "you always know." Pause. "You always know." Thin, thin. Thin. Also slow, slow, Slow, And heavily amplified, so that voices usually emanate from nowhere near the actors and a

heavy echo follows every utterance. The next problem is John Tams's music I do not care to hear scenes of death and battle in the Great War accompanied by sub-Elton-John songs, and I think blasts of electric guitar and drumming are a cheap way to suggest gunfire. There is some visual excitement in the way this muzak is played, high above the action, by e group of musicians and singers on e galley which also moves from end to end of

ill Bryden's latest epic extravaganza, The Big Picnic, conBut elsewhere to yawns. For The Big the action. The vocalists sing mainly symbolic effect time and time again.
Picnic keeps us in the Shed for almost slow folksy numbers in folksy style (i.e. Her most spectacular effect is to pick) flat), but the worst element is the perenssion, which adds an appalling

monotony to everything it joins. Much better are the songs, dances and music played and performed by the performers. In general, the performances are fine, and would be much better if encouraged to move at twice the speed. Jimmy Logan is Colours, who turns this bunch of volunteers into soldiers: Iain MacColl is the dour Gus Adams, who becomes the toughest fighter of them all; Stuart Bowman plays the half-reluctant young warrior Russell Enoch; Derek Riddell is the more mercurial Norrie Beaton, Morag Hood and Juliet Cadzow lead the female

contingent in a variety of roles. Oh, yes, the Angel of Mons. After Angels in America I have grown so used to seeing angels that I feel like Joan of Arc. This one, however, is the worst to date. With deep red hair, she hangs, usually upside down, from the musi-cians' gallery - e cumbersome sensational effect trundled out for the same

up a corpse and to bear him in her arms, as she hangs in the air, until she passes out of sight. You just watch and pray she never drops the poor blighter. Show me a group of bright young

Scotsmen going to their deaths, show me them sharing cigarettes with the enemy on Christmas Day, and I blink back tears as fast as the next person. Travel me from the Glasgow Docks to the uneven terrain of the battlefields and trenches and I too am astounded. (William Dudley's design is altogether the evening'e highlight.) But there is an awkward mix of sentimentality and sensationalism about all this. We watch these young Scotsmen face the prospec of their possible deaths - and then, ghoulishly, we zoom along to see, from ringside seats, whether they indeed live or die. Meanwhile drums and cymbals thwack out a 4/4 beat in the air above our heads.

At the Harland & Wolff Engine Shed, Govan, Glasgow, until October 30.

The Royal Philharmonic woos a youthful audience to the Albert Hall

he Royal Philharmonic Orchestra has formed e partnership with the Royal Albert Hall which makes the RPO the "house" orchestra of the hall, performing there ten tin the 1995-96 season with the expectation of 40 appearances during 1997-98.

certain to go ahead but the greater commitment, with the RPO playing roughly once e week between October and May, depends npon raising 2500,000, which will mainly be spent on marketing the link and building up an audience.

The RPO hopes that the Arts Council and Westminster City Conncil will contribute towards the investment needed. The plan is that the seats in the Arena, where the

Promenaders stand during the BBC'e summer Proms, will be priced at just £4 to attract a similarly youthful andience. If public money is not forthcoming the RPO and the RAH will look for a corporate sponsor. A "home" et the Royal Albert Hall will mark a

remarkable resurgence for the RPO, which was threatened with the loss of all its subsidy a year ego when the Arts Conncil, unsuccessfully, attempted to stop funding two leeding orchestras. In the event the RPO received e grant of only £300,000 from the Council for 1994-95, less

than 5 per cent of its turnover. The RPO has since signed a sponsorship deal with Classic fm: emberked on e major recording contract with Tring Records; end forged a resiRPO would hring classical music to the RAH on a regular hasts outside the summer Prom season, nicely fulfilling the ambition of Patrick Deu-char, chief executive of the Hall, to present a more struc-

tured programme.
The orchestra would provide a range of music hnt concentrate on choral and the great romantic classics, which suit the size of a hall with 5,000 seats, of which 3,500 are available to the public.

The RPO link with the RAH fits neatly into Arts Council policy of marrying orchestras to halls. The LSO resides at the Barbican and the LPO and the Philharmonia are house orchestras at the South Bank.

Music in London/David Murray

A cappella prowess and uninspired Mahler

t. John's, Smith Square was unusually well filled on Friday for music of the past half century; for the BBC Singers were celebrating their 701h tion, needed only more fluent anniversary. Not to be con- French in the quickest pasfused with the much larger BBC Symphony Chorus, who are stalwart amateurs, the 24 Singers are professionels of great technical prowess. This virtuoso anniversary programme, all a cappella, showed

them off brilliantly. It included not only two treasures of the repertoire which they themselves premiered, Britten's Hymn to St. Cecilia and Poulenc's war-time Figure humaine, but a new commission from Jannis Xenakis, Sea Nymphs is e fractured setting of Ariel's "Full fathom five" these ere plainly Cuhist nymphs, voices arranged in spiky tone-clusters, extraordinarily difficult to pitch. (Each singer consulted his or her own tuning fork assiduously.) As a collective feat, it was fascinating: at later performances it may even begin to sound like

Britten's twinkling Hymn could not have been feater nor more charming. The splendid eight-section Figure humaine, a wartime plea for the Libera-Rechants, an old BBC Singers favourite, was all colour and sexy vitality, and in Ligeti's Three Fantasies the solo entries were as poised and telling as the rich, equeous choral textures (tone-clusters again, hul succulent ones). The conductor was Simon Joty, who seems able to inspire the Singers to practically anything.

t would be hard to claim that Giuseppe Sinopoli has inspired the Philharmonia much in the several years he has spent with them. The trouble has not been with the orchestra. Even now Sinopoli'e left hend has scarcely any functional independence from his right, which is not very expressive either: to weed out clotted textures, he needs recording engineers Sunday's Royal Festival Hall

Edita Gruberova was originally billed to deliver several Strauss songs before the main work, Mahler's Fourth Symphony; hut her place was taken by Angela Maria Blasi, who ishly turned, though "Morgen" was over-slow and "Zueignung" over-quick). Thus we got Don Juan es e Sinopoli extra: loud and puppy-eager, much of it an undifferentiated welter of sound through which only the leading voices penetrated. For hrief moments one heard the Philharmonia's edmirable first-desks doing

The Mahler Fourth was friendly, well-meant, by turns under-pointed and too heavily emphasis-ridden. The slow movement was at least heartfelt, though the sudden radiant outburst near the end sounded ordinary. It took Miss Blasi to bring the performance to real, musical life with the child's-vieion Finele, in which her knowing tact and her pleasing mezzo-ish timbre were lovety

₹ he crane, emblem of Cermany's flag-carrying Lusthansa airline, was passed over hy the nature protection league as "Bird of the Year, 1994". instead, it chose the threatened white stork, harbinger of luck, realth and prosperity.

luvestment analysts, on the ther hand, are virtually unanmous this year in hailing Lufthansa as a success story. They pay tribute to its rapid restoration to viability in the three years since Mr Jürgen Weber was installed as chairman.

Today the airline will set the seal on this change in its forunes when subscriptions open for a rights issue and government share sale to reise an irgently-needed DM1.7hn to restore the group's eroded capi-

Lufthansa's return to favour is a recent phenomonenon. Scepticism still abounded as recently as 12 months ago. eveo though the government had just negotiated recewal of the restrictive post-war USfierman air traffic agreement.

This opened up swathes of previously inacceasible air space to be exploited by a new co-operative venture between Lufthansa and United Airlines. But with no sign of any sobstantial easing in competition on transatlantic routes, and the lack of binding ties such as cross-shareholdings between he two lines, the deals were welcomed only coolly.

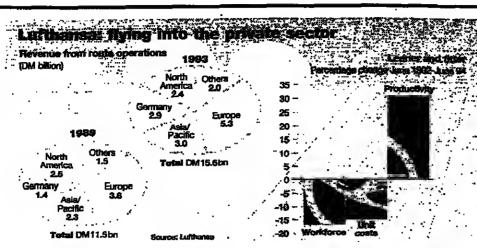

The mood changed in May when the last hurdle to privatisation was dismantled by an agreement disentangling Lufthansa's pensions from the civil

The deal, in which the DM4hn cost of holstering the airline's pension fund was split between government and airline, opened the way for the surrent rights issue. The issue was launched in Frankfurt last week at a ceremonial preview, to the accompaniment of management forecasts that annual orefits would improve by up to

DM700m within three years. By virtue of Bonn's decision not to exercise its rights and to sell some of its stock, the issue will dilute its majority stake to around 35 per cent. More dis-posals will follow, although Ronn has yet to make clear how far it is prepared reduce

In fact Lufthansa has been run as a de focto private enterprise since Mr Weber took over as chairman in September 1991. In that time he has done much to cut costs and inject flexibil-

Like other top German com-

Ready for take-off

nies, Lufthansa entered the 1990s laden down with an over sized fleet and workforce, and hohhled by a grid-locked bureaucracy which atretched from the boardroom to the cbeck-in desk.

Misplaced optimism over the prospects offered by the purported completion of the single European market on January 1 1992, had tempted the board into an unprecedented spend-

In the three years to the end of 1991, it added 120 aircraft to its fleet, spending some DMSbn on the way, and building net debt up to DM6bm. As was to emerge shortly after Mr Weber took over in September of that year, the airline had made its first net loss - of DM426m - in 20 years. As Mr Weber was to admit for the first time publicly last week. Lufthansa'a

existence was threatened. As a first step, be announced a 10 per cent cut in the work-force for 1992 and 1993. Since the programme started hiting in mid-1992, the payroll has been slimmed by 17 per cent, unit costs have been cut 25 per cent, and productivity has soared 31 per cent.

Even though average Lufthansa salaries were last year still more than 20 per cent higher than those at arch-rival, British Airways, analysts have been impressed by the scale and speed of the turn-round, and compare recent developments with the 37 per cent rise in payroll costs between 1989 and 1992 when productivity

increased by a mere 7 per cent. Reviewing the new management's performance so far observers have concluded that restructuring and the concurrent huilding up of Lufthansa's inherent strengths in freight and far-east traffic leave it

Christopher Parkes on the share issue by Germany's

well-placed to benefit from the revival in the industry'a for-

Lufthansa

The group's cargo business reinforced by a 25 per cent stake in DHL, for example, has been an early beneficiary of the international economic recovery. Cargo haulage is estimated to have risen around 20 per cent so far this year, when measured in cargo tonne kilometres (CTKs), and yields have risen an estimated 4 per cent. Lufthansa's newly introduced twice-weekly service to

Shanghai, supplementing its Beijing flights, and its stake in the Beijing-based aircraft maintenance joint venture, Amerco, give it a strong position in one of the fastest growing markets in the world. Even the north Atlantic

routes, where the group's bustness has shrunk from 22 per cent of total revenue from route operations in 1989 to 15 per cent in 1993, were already showing improvement last year when the passenger load factor rose from 72 per cent to more than 76 per cent.

In its home base, Europe, which still accounts for 50 per cent of operational turnover (19 per cent in Germany) low cost-base operations such as Lufthansa Express and the regional Cityline are winning it market share. Passenger load factor was 58 per cent last year, compared with around 51 per cent in 1992.

At the same time, the eco-

nomic recovery is helping bol-ster bookings of premium-priced seats. Although no regional breakdown is avail-able, Lufthansa's first- and business-class bookings in the six months to June rose to 40.2 per cent of the total compared with 38.7 per cent in 1993.

While passengers may be prepared to spend more on their comfort in transit, the story within Lufthansa has been one of continued economies. But the greatest luxury to be sacrificed was the illusion that the group could sit tight in its high-cost German base and do everything as in the past - by itself.

Deal after deal has been struck to widen and deepen Lufthansa's reach in the international market. Holdings have been huilt in Austria's Lauda Air and Laxembourg's Luxair. Co-operative links were forged with Varig of Brazil.

A 25 per cent holding in Sky Chef of the US fattened the catering division. Collaboration in a freight huh at Sharjah in the Gulf has been followed by negotiations for a similar distribution base in Indonesia, further to extend the group's reach in the fast growing far eastern market. Now, together with information and systems, Lufthansa's maintenance and cargo operations are to be spun off as free-standing businesses.

Functioning as profit centres in their own right, along with the Condor tourism line and catering, they will provide services at market-competitiva prices both to the parent and outside customers. In a global air traffic market forecast to grow hy an average 4-5 per cent a year for the foreseeable future, Lufthansa has a chance to test its entrepreneurial

Political chaos theory

fundamental to and chic among economists investmant managers, but

to learned students of politics like you and me it is old hat. Wa have always understood that a surprise may hit us in the face at any moment, that nobody knows what is going to happen, and that each event bounces off the other with a cumulative effect that on one equation is constructive, on another destructive. So be warned. We cannot be certain of the outcome of tomorrow'a election in Denmark although, if we are British, we may be envious of the choice of

Those of us who have mastered the finer intricacies of chaos theory know that when applied to politics, positive feedback does not always occur. Perhaps the most unex-pected Danish politician of the post-1945 era was Mr Mogens Glistrup, who established his Progress Party in 1972 on the principle of cutting income tax. It briefly became the second largest party to the Folketing. their parliament. Unfortunately, it appeared that Mr Glistrup did not rely on the democratic process to reduce his hill. In 1983 he was sent to jail for three years for tax fraud. This was more than the beating of a butterfly's wing in Tokyo. It was world fame. A fat lot of good it did. Today Danes pay the highest share of national income in taxation of any country in the Organisation for Economic Co-operation and Development.

Chaos moves in mysterious ways. For example, Italy may have been hit by negative feedback. In April 1993, on a high turnout, four-fifths of the electorate signified approval of a

change to the law on voting. The old, corrupt, party list sys-tem was cast aside. In future deputies would be chosen by first-past-the-post and the rest elected on new, simon-pure party lists. Excitement ran high. Strong government would surely follow reform. A year later the first ballot held under the new rules produced a shaky coalition. Mr Silvio Berhisconi's hastily-established party, Forza Italia, promised change, but it has not yet delivered much. Italy's propo-nents of national renewal are

understandably disappointed.

admirer of Lady Thatcher, but he does not command tha overwhelming. and stable. majority in Italy's parliament that the former prime

enjoyed in Britain. Many other examples lie in the database, including the intervention of Mr Ross Perot in the 1992 presidential elec-tion in the US and tha unscripted victory of Mr John Major in the British contest of the same year. You will, however, have taken my point. So, I assume, will Mr Paddy Ashdown. The leader of Britain's Liberal Democrats can only keep his countenance as cheerful as he does by telling himself that one day something unexpected and positive will turn up. Then his party, created hy him almost singlehandedly out of the ashes of the Liberal and Social Democratic alliance, will have an assured role to play in national

To appreciate his predicament you need to step back a bit. The ancient and venerable Liberal party was virtually obliterated in the 1945 election that swept Labour to power in a landslide. In subsequent years, first under the then Mr Jo Grimond and later under the now written-out Mr Jeremy Thorpe, the lynchpin of Liberal strategy was the notion of the long march. Slowly, steadily, election by election, the party of Gladstone would regain its former glory. It may take a generation, or perhaps two, but that was the goal. A generation passed by. Little distance was gained. The footsloggers became dispirited. Under Mr David Steel's leadership a new

were to be the pluralist party, The current talk co-operate with of whether the others. If one of Lib-Dems will the two large parties would give their only be kind enough to favours to introduce pro-Labour or the portional repre-sentation, deals Conservatives is could be cut. a mere fancy

Mr Beriusconi may be an strategy was adopted. Liberals

This formula looked likely to become a winner when the alliance was high in the opinion polls in the mid-1980s. Alas. something, possibly a butter-fly-wing, intervened. The alli-

Mr Ashdown's initial task, when he surveyed the ruins in 1989, was clear. He had to rebuild. He has done so: the Lib-Dems are a long march ahead in local politics. As to national representation, they have half-a-dozen taxifuls of MPs and a position of strength in Scotland and the West Country. Unfortunately for them chaos has hit them on tha bead once more. The Labour party, which the Liberals, the Alliance and the Lib-Dems were supposed to overtake and replace, is remaking itself. Mr Ashdown knows he

would not be credible if he

march. He must be aware that while pluralism works in hung local councils, a hung parliament is no more likely to follow the next general election than it did the last.

That is why the current talk of whether the Lib-Dems will give their favours to Labour or the Tories, in return for no higher a payment than the rewriting of the British constitution, is a mere fancy. The expected outcome in 1996 or 1997 is a strong Labour victory; the second most likely is a repeat of the present parliament. Yet the statistically unexpected could happen Labour, or its new leader, might turn out to be unmodernisable. The Lib-Dems would then gain a renewed meaning Alternatively, Labour might win the most seats but not an overall majority. The people's party would then so depend on Lib-Dems support that it would be obliged to keep its promise to hold a referendum on proportional representation for the House of Commons. That could lead to an interesting twist up the chaos spiral. The Conservatives would oppose PR; Labour would be split, and Mr Ashdown might find himself fighting the referendum on

his own. The outcome would be up to Chaos's sister, Fate. In two referendums in 1992 and 1998 New Zealand'a voters rejected the advice of the main national parties and introduced the Ger-man combination of singlemember and proportional elections. The strongest influence on voters was their dislike of mainstream national politicians. Whatever the latter asked for, they did not get. It makes you think. The presently available evidance suggests that Mr Ashdown's only secure future is to lie on the Labour leader's lap and wag his tail. But you never know, A thunderbolt may strike . . .

The cold war will end only when Russia joins Nato

From Mr Roris G Fedoron. Sir, After reading Judy Dempsey's report, "Moscow 'cannot join Nato'" (September 10/11), I could not help being worried by the remarks of Mr Volker Ruhe, Germany's minis-ter of defence. If his opinion reflects general feelings in the west then the cold war is not finished. If he speaks like this in Moscow, most of our democrats and liberals will vote to increase military spending and the armed forces (beyond the

current 2.1m soldiers). If Russia is "different" and cannot be integrated then Nato (the EU is a different issue) will be enlarged and reinforced against Russia, which will then never feel secure - and naturally so. Why can we not be integrated? I have heard such

bizarre arguments as "Russia is not European". Sorry, but look up the past 1.000 years of history and you will see we are more European than the US or Turkey. Yes, we are a big country with lots of problems but if we are incompatible please make clear by what criteria this is so - probably it will help us domestically. But don't let there be arrogance and short-sightedness - particu-larly from Berlin, which has been forced to host Russian armies three times in not so

many centuries. I am absolutely sure that global accurity will be strengthened only if Russia is integrated into Nato and our generals rub shoulders with their western colleagues. Only then will the cold war come to

a real end. Do not fore we have plenty of war hawks in Moscow and Mr Ruhe seems to be intent on helping them. I think that Nato itself has to be reformed, with US domination, which is no longer needed, scaled down and the widespread fears of a stronger Ger-many dissipated. Russia's membership will help achieve just that.

Finally, Russian democracy is still an ailing infant and sin-cere integration of Russia Into the European and interna-tional community can help avoid any turning back - and

Repudiate milk quotas

From Mr Anthony Rosen. Sir, The current expensive fiasco over milk prices was highlighted by Deborah Hargreaves ("Milk prices sour the cheesemakers", September 19), but the chaos can be placed firmly at the door of former minister of agriculture, Michael Jopling - aided and abetted by the short-sighted empirebuilding attitudes of both the Dairy Trade Federation and

the Milk Marketing Board.
At the end of March 1986 Jopling, at half-past-three one morning, after a long tiring session with his European colleagues, agreed that milk quo-tas would be imposed throughout the European Union only 48 hours later.

For reasons never revealed Jopling agreed that the Dutch should be allowed a milk quota equivalent to 757 litres per head of their population, the Irish 1,508, while the British were to be cut back to only 258 litres per head - one third of the Dutch and one-sixth of the Irish. And the Italians? They have never imposed quotas npon their farmers and are now producing 12 per cent more than they did in 1984. We produce 15 per cent less.

Out of that basic mistake by Jopling has grown the current position whereby Britain's milk producers are only allowed to produce 30 per cent of the IJK's milk requirements - the Irish produce 300 per cent of theirs.

The sooner Britain repudiates this grossly unfair quota restriction the better. Anthony Rosen, Feenix Formino Rosehill, Arford

Sovereignty at issue, not fisheries conservation

From Mr Mario Campora.

Sir, Your article "Falklands rivalry tests quick tempers" (August 30) accurately atates that the south west Atlantic is one of the few regions in the world rich in fishing resources. However, its author does not present a complete picture of the issues involved in the area. Allow me to address those of greater relevance. Argentina rejected the UK's

extension of its alleged juris-diction over undisputed waters north of the Malvinas Islands on grounds of their appurtenance to land territories subjact to controversy, and because it had always exerted exclusive rights of sovereignty over those waters. The issue at stake has nothing to do with fisheries conservation but with

The Argentine government has developed an effective conservation and fisheries administration policy. The Argentine Navy has substantially increased its patrols in the Argentine economic exclusion | London SW1X OLA

zone, and provisions are being mada to increase them further. At the same time, the National Institute of Fisheries Research enjoys greater financial and technological resources and producaa state-of-tha-art research in the subject. In the case of Illex squid, it is

worth recalling that between 1987 and 1992 Argentina cap-tured less than a third of tha totals fished in waters close to the Malvinas Islands. The reference to the Argen-

tine-EU agreement seems to be misleading since it only came into force on May 24 1994, and it has not yet been imple-

tion would have benefited from further research on Argentine fisheries policy and from con-sultation with Argentine official sources. Mario Campora,

Excessive barriers in Euro car

From Mr K E Ludvigsen. Sir, In his report about the battle ovar the EU block exemption which governs car distribution in Europe ("The battle for the forecourt", September 16), Kevin Done makes much of the car price differences that are reported in Europe. In interpreting these findings we place special emphasis on consumer group Bureau Européen des Unions de Consommateurs' point that institutional barriers impeding cross-border purchases and registrations of cars are excessive in what should be a single market for cars. These must be removed, in combination with greater economic coherence between EU member states. before any form of price harmonisation can he contemplated. Certainly this is one area where new regulation must tread with care. Done suggests that the cur-

rent dehata is determining what rules will apply on the forecourt for tha next 10 years". Our conclusion from a major study of the block exemption is that the car industry's distribution system in Europe has been under the most intense and detailed scrutiny for the last 91/4 years. This should be long enough to eval-uate a system of this kind. The industry and its many dealers and amployees throughout Europe should not be subjected to similar uncertainties 10% years from now. We recommend that the new regulation be put in place for a term as long as any block exemption the Commission has granted, namely for 141/2 years. K E Ludvigsen naging director.

Agenda for Euro-reform

Across a wide range of fields, the European Union is falling to win ones agree to be represented in support from its citizens for measures carried out in their name and, ostensibly, for their benefit. Its decision-making bodies appear unwieldy, undemocratic and ineffective. Steps to correct this should be high on the agenda of the inter-governmental conference (IGC) which is to meet in 1996 to consider revision of the Maas-

WALLS OF

tricht treaty. That conference will also have to adjust the Union's institutions in the light of two years' experi-ence with an enlarged membership (including Austria and up to three Nordic states) and in the perspective of further enlargement to central and eastern Europe. It will, in addition, have to take some account of Germany's desire for further advances towards political union as a condition for economic and monetary union.

In considering reform, goveroments will need to separate areas where agreement is possible, and indeed indispensable, in 1996 from those where disagreement will remain for far longer. Some of the federalist proposals in the German Christian Democrats' recent discussion paper fall in the latter category. For instance, it is hard, if not impossible, to see how the proposal that the Commission should take on features of a European government" can be reconciled with the desire of several national governments (not only the British) to exercise more control over the Commission, through the Council of Ministers.

One area where it is vital to agree on change is the size and composition of the Commission. Under present arrangements it will increase next year to 21 members, including at least one from every member state. There will not be enough portfolios to go bard to manage, and not all Com-missioners will be of the calibre needed. The IGC will bave to come up with a more meritocratic sysones agree to be represented in groups, or by rotation.

If the Council, for the foresee-able future, is to remain the main locus of EU legislative power, changes in decision-making mechanisms will be vital to allow more majority voting, with a lower threshold for the so-called "qualifled majority", and voting weights that more accurately reflect the differing size of member states. The Council's legislative sessions must also be made fully public, and its work made more accountable, notably by better scrutiny in national parliaments.

As for the European parliament, 1996 will probably not be the time to decide a further expansion in powers already considerably extended under Maastricht. The parliament must first demonstrate that, in spite of its disparate composition since last June's elections, it can sensibly deploy the "co-decision" muscle it now shares with the Council.

MEPs can help the electorate understand how the EU works, and what purpose they themselves serve, if they take a constructive rsther than utopian or self-aggran-dising lead in the debate on institutional reform. They could draft a European Basic Law - simpler and more modest than their predecessors' efforts at constitutionwriting - which would relegate to essentially technical annexes mncb of the impenetrable language of the Maastricht treaty, and provide in its main text a clear account of the Union's structure, the competences of the various organs, and, perhaps most important, the division between the powers of individual member states and those of the EU.

This draft could then be used as the basis for public debate throughout the Union, in which round, plenary meetings will be national governments would have to take a position. That way the citizens of the EU would be less likely to feel in 1996, as so many did at the time of Maastricht, that tem, in which larger states forgo everything was being done behind their automatic right to have two their backs.

ntel the world's largest semi-Chips down for conductor manufacturer, is spending \$80m - the most it has committed to an advertising campaign - to persuade consumers and businesses to buy PC partners personal computers based on its latest microprocessor, the Pentium. The first newspaper, radio and TV advertisements are appearing in Europe and the US. But behind the

The computer industry's response to the Compaq-Intel spat is fascinated dread, say Louise Kehoe and Alan Cane

tha end of tha year, Compag'a latest machines, for the consumer market, use AMD microprocessors.

Last week, Nexgen, a privately held chip developer in which Compaq has a minority stake, launched a family of "Pentium class" chips microprocessors claimed to be as powerful and flexible as Intel's, Nexcen and Cyrix, another smaller chip company, have also contracted with International Businesa Machines to manufacture microprocessor clones, making them credible Intel challengers.

Collectively, these companies could achieve a 20 per cent or higher share of the PC microprocessor market over time, Mr Slater predicts. "In a worst case scenario, Intel faces a gradually declining market and possibly rspidly declining profit margins as competitors force down prices," he says. Rather than give ground, Mr

Andrew Grove, Intel's combative chief executive, has declared the chip maker will "eat its own children" or deliberately cannibalise the market for its established products with new, more powerful chips. For Compaq, however, Intel's determination to maintain market leadership presents serious problems. In its own drive to increase market share, Compaq built up huge inventories of PCs, worth \$2,2hn at the end of the second quarter, double that of a year ear-

lier. The PC maker says the stocks will enable it to meet expanding demand and increase market share. But much of Compan's inventory comprises lower performance PCs, rather than the Pentium models Intel is promoting. Last week, Compaq launched its own "aggressive new worldwide consumer marketing blitz" for new consumer PC

Compaq's new consumer models have multimedia capabilities and can double as a television set or

models based on older microproces-

telephone answering system. They will sell in the US for about \$2,100 including a large colour monitor. For a similar price, a buyer could get a Pentium based PC, with fewer bells and whistles, from a less well known manufacturer. Pentium multimedia PCs usually cost about \$400-\$500 more.

Intel's efforts to point consumers towards more powerful Pentium machines include in-store demonstrations showing a Pentium PC racing through tasks while older 486SX-based machines lag behind.

The 486-based PC is not tha machine you should be buying," says Hans Geyer, head of Intel's European operations. "Any company that has a huge inventory of one kind of product when the market prefers another is in a dangerous position."

Compaq is not amused. From the company's perspective intel seems to have forgotten the rule that the customer is always right. in fact, It

seems. Intel is saying loud and clear that its biggest customer is wrong. "What upsets us generally is that component supplier should try to influence the end user. The enduser market is not their business. They are interfering," says Andreas Barth, one of Mr Pfeiffer's closest colleagues and bead of Compaq's European operations.

Compaq must also be galled that intel, along with Microsoft, the PC software leader, earns most of the profits made in the PC industry -its 1993 gross margins of 63 per cent were significantly ahead of Compaq, the most profitable PC manufacturer, which managed 23.6 per cent.

lt is an illusion, argues Mr Barth, to suggest the whole PC market is shifting to Pentium. Less than 12 per cent of PC sales in US consumer electronics stores are Pentium PCs, says market researcher Consumer Intelligence Infocorp.

owever, intel's argument that a powerful Pentium processor is necessary to take full advantage of multimedia PC applications is increasingly credible. The latest PC games, incorporating sophisticated video and graphics, run at a snail's pace on older microprocessors.

Moreover, what Compaq sees as

interference, smaller PC makers regard as free advertising likely to boost demand for their products. Several plan to ride on the coattails of Intel's campaign with their own product campaigns.

Yet Compaq is not alone in rueing intel's power to shift the PC market rapldly from one generation of microprocessors to the next. The dizzying pace of change is also upsetting some buyers concerned about the rapid obsolescence of the products they purchase. "Customers are telling us to slow down the pace of technology," Lou Gerstner, IBM chairman, said earlier this year. "How powerful a computer do you really need on your desk?"

For now, however, intel is in the driving seat. While it is promoting the Pentium chip for this Christmas, it plans to launch a yet more powerful microprocessor, codenamed P6, next year and is already working on later generations of chips, "Intel has made a conscious decision that It is more important to try to make the overall PC market grow as quickly as possible than to protect the interests of its big customers," says Mr Slater.

The computer Industry is follow ing the dispute with fascinated dread. Alliances and co-operative ventures have become the order of the day as electronic technology becomes too complex for any one company. If giants like Intel and Compaq cannot co-ordinate strategies to their mutual advantage, can others do better?

Feelgood factor

about the economic recovery? Mr John Major says they should, and ness. Few large companies are not so do most of the economic statistics: but Gallup shows them clinging resolutely to gloom.

A clue to this conundrum came yesterday from a leading feelgood factory, Grand Metropolitan's IDV drinks business. Instead of uncorking expansion, IDV's announcement reads like recession'a hangover: plant rationalisation, office closures, regional

restructuring.

Another clue is the way companies find it hard to raise prices. despite economic recovery. Fiercer global competition lets consumers shop around. Companies grown fat on regional dominance find themselves seventh in a global market where only the big three thrive. To compete, ever-lower costs are essential.

This remorseless logic has undermined the drinks industry's dash for margin, the trend of the late 1980s. For a while, drinkers were happy to pay more for sipping less; but as Guinness has found, that only works while the glow of economic euphoria lasts.

This is the real message in IDV's bottle. Big companies, in English speaking countries at least, are in a Maoist state of permanent revolution. GrandMet pre- harm in the late 1980s.

Why don't consumers feel happler ceded the IDV restructuring with wielding the axe somewhere in their divisions. So, even though employment is rising, people who already have jobs feel threatened by uncertainty.
That is a deeply unsettling sen-

timent. Much of economic history reflects the desire to defeat, avoid or pass on to someone else the inevitable uncertainty of human existence. The craving is a visceral one; its consequences range from trivial to profound, from the folding umbrella to the Common Agricultural Policy. It is frustrating when this sentiment hampers manifest improvements in human welfare, such as wider free trade. But politicians and business people ignore it at their peril.

The lesson, for politicians, is that people really feel good only when they possess greater economic certainty - something to be earned the hard way, by long-term policies which promote stability. Business people have little choice but to live with uncertainty; hut they might minimise its impact on well as bad: a bit less feelgood factor wouldn't have done any

home computer sales.

Saunders, the former Guinness chairman jailed for theft and false accounting after the company's 1986 takeover of Distillers, was denied a fair trial. In particular it concluded that the use by the prosecution at his trial in 1989 of answers given by Mr Saunders under compulsion to Department of Trade and Industry inspectors breached the European Convention on Human Rights.

The ruling appears to be a serious blow to the Serions Frand Office, for which the Guinness trial was a rare high-profile success. It may have a crucial bearing on the ability of the UK authorities to prosecute fraudsters and other financial mis-creants, which depends to a significant extent on being able to compel suspects to answer questions.

More tentatively, it may also have implications for the government's current strategy for comhating other forms of crime by curbing the suspect's right to silence. The ruling is not binding and the

issue will have to be decided by the think again about the use of evifull European Court of Human Rights. That could take two years. questions by DTI inspectors.

But if the Court upholds the Commissioners' findings, criminal law experts believe the result would have grave implications for the fight against fraud.

This is because the authorities might no longer be able to use the transcripts of interviews with suspects carried out by Department of Trade and Industry inspectors as direct evidence in court. In the view of many experts, such interviews often play a crucial part in the pros-ecution case; without them, white-collar crimes can be extraordinarily difficult to prove.

Mr John Clitheroe, a fraud lawyer and senior partner of London solicitors Kingsley Napley, says: "DTI transcripts were used almost as the sole basis of the prosecution case in the Barlow Clowes trial. In many instances it's going to be the main plank of their case."

Mr Clitheroe believes that if the court upholds the commission's ver-dict the government would have to dence provided by witnesses who have been compelled to answer

The same may go for such evidence when it is obtained by company liquidators under sections 235 and 236 of the Insolvency Act.

Until recently it was thought evidence gathered by liquidators using their Insolvency Act powers could not he used directly in evidence at trial. But in July the House of Lords ruled in the case of Mr Muhammed Naviede, former chairman of Arrows trading company, that sec-tion 235 and 236 information can be used by the prosecution at trial. A Strasbourg court decision to uphold the commission may call this in

question, too.

The SFO is making no comment about the commission's ruling. But sources close to the office believe victory for Mr Saunders would not seriously damage the fight against fraud. They say the SFO is no longer so reliant on DTI inspectors' transcripts as it was at the time of the Guinness case. Nowadays it pre-

OBSERVER

fers to mount its own investigation using its powers under section 2 of the 1987 Criminal Justice Act to compel witnesses to answer Its own questions.

The SFO also believes that these draconian powers would not be affected by the commission's ruling. The commission's complaint with Mr Saunders's treatment is that he was compelled to answer questions and that his answers were then used in evidence against him.

Information gathered by the SFO using its section 2 powers cannot be used as evidence in court unless the defendant deviates from the account he gave to the SFO. At worst, the SFO believes it might now have to consider carefully what reliance it wanted to place on DTI

transcripts in future cases. What of the government's current attempt to curh the wider right to silence in ordinary criminal cases? Could that, too, be impaired? Mr David Kirk, a partner of solicitors Simons Muirhead Burton, believes the Strasbourg court would need to go much further than the commission for the government's new pollcy to be threatened.

"The new curb only goes as far as saying you can still say nothing, but if you do say nothing the judge can comment on your silence. That's not the same as compelling someone to answer and then using tbeir answers against them in

But Mr Anthony Scrivener, QC, former chairman of the Bar Council, says that irrespective of what happens to Mr Saunders's case in Strasbourg, the government's curb on the right to silence cannot stand

The first time someone is convicted without the benefit of the right to silence, the European Court of Human Rights will recommend the conviction is overturned.

"Most European countries uphold the right to silence. Mr Howard is trying to take us back to the dark ages. He should treat the Commission's decision as a shock warning of what's to come, and think again." If Mr Scrivener is right, and the Strasbourg court does eventually strike down curbs on the wider right to silence, the government

will be facing a rethink not just on

its campaign to clean up the City.

Sweden's road

After victory comes the battle. The Swedish Social Democrats' return to power in Sunday's election leaves their leader, Ingvar Carlsson, with three campaigns still to fight. On past experience, he is well-equipped to wage the two, more immediate, battles. But he has yet to show that he can take on the country's deepest challenge: reform of the Swedish wel-

Mr Carlsson's first task will be convincing the world's financial markets that be will reverse the country's spiral into debt. There are plenty of reasons for scepticism. His party's electoral campaign was noticeably short on talk of fiscal austerity. Clearly, there must be a larger package of deficit cuts from the new government than the meagre SKr61bn (£5.1bn) one announced in August.

A more credible fiscal plan would involve public spending cuts, not the tax rises which the party finds it easier to suggest. 311t the Social Democrats' close ies with the public sector might telp them tu persuade affected groups that the cuts are inescapble. The outgoing centre-right overnment could not play this ifficult role, as the results of the

ampaign suggest. Mr Carlsson may owe his vicory to Mr Carl Bildt's willingness will be enough.

to push through several unpopular, hut necessary, reforms as prime minister. Mr Bildt, however, frequently tried to sell these poli-cies as the medicine required hy membership of the European Union. This may prove damaging to the new government in battle number two: November's referendum to confirm Sweden's membership of the EU.

Although the Social Democrats' have committed themselves to Europe, many of their supporters have not Thanks, in part, to Mr Bildt's sales tactics, the latter view Europe only in a negative light. The new prime minister must continue his efforts to show that Sweden has a better chance of tackling problems like its 14 per cent unemployment rate within Europe than without lt.

Sweden must recognise its kinship with the other countries of Western Europe, but its third and largest challenge is also to see the parallels between its own predicament and those of countries further east. As Poland and others have learnt, it is painful to reform a system which guarantees security but fails to provide long-term economic growth. Sweden's pain is bound to increase further, if its government and people continue to hope that short-term expedients

Pea-soup pop art

■ Stick around long enough and you'll become part of the furniture. Back in 1962 Campbell Soup, tha US food group, reacted nervously to the late Andy Warhol's screen prints featuring the company's red-and-white soup cans. "We didn't know what to make of it. We thought someone was making fun

of us," says Kevin Lowery, Campbell's public affairs chief. That was probably exactly what was happening, but, boy, did it do wonders for brand recognition. So 30-plus years on Campbell is searching out the next Andy Warhol, Hence an "Art of Soup" contest in which artists are invited to re-interpret the Campbell soup

Budding Warbols may work in any medium, including sculpture, video and "wearables". Professionals, amateurs and children of 12 and under will be judged separately, and there will be prizes of up to \$10,000 for some. So is this art or just an artful PR stunt? Who cares, so long as it's (internationally) famous for 15 minutes.

Puppy love

■ Has Grand Metropolitan sold itself short in off-loading Albo to Nestlé for a mere \$510m? The Swiss

company should appreciate, after all, that it has acquired something far more prestigious than simply America's seventh largest pet food

Why, the Alpo name is a veritable institution across the country after those long-running dog food ads of yesteryear featuring Johnny Carson side-kick Ed McMahon. Indeed, considering the number of people popularly supposed to have been conceived during the commercial breaks of the Tonight Show, Nestlé could be considered to be buying directly into the country's gene DOOL.

Pussy footing

Alexander Kwasniewski, who last year led Poland's reformed communists back to power in coalition with the Peasants' party, is not normally backwards in coming forward. But, mention his possible candidacy for next year's presidential election, and he comes

over all shy. Lech Walesa, the current incumbent, is deeply unpopular, while Kwasniewski tops the opinion polls. The latter's main worry, however, seems to be that, if he stands, Walesa could wage the sort of bare-knuckle anti-communist campaign that secured him victory

in 1990. In London yesterday, Kwasniewski thus confined himself to saying that Poland needs a president who spends more time on

pushing Poland's entry into the European Union and Nato, and less on domestic political infighting. No-one's fooled. That's code for "I'm your man". Being president has to be better than trying to control a fractious coalition, or forging a new constitution out of the seven competing drafts now on the table - two of the wearisome tasks on Kwasniewski's plate.

Happy families

So Ramon Pajares has finally succumbed to the blandishments of Rocco Forte and the Savoy Group. He is packing his bags at the Four

Seasons and heading for the office of Giles Sbepard, who made his exit last week.

As much the preferred candidate of both the Savoy and Forte, he was no doubt under considerable pressure to accept - perhaps even from his nearest and dearest. For his daughter, Maria, as PR manager of Claridge's, must surely have been

Blackhand gang

■ How the mighty have become confusing. Bill Rodgers shouldn't really be astonished that he's emerged as the bête noire of Liberal Democrat activists currently putting the world to rights at Brighton. After all, he's been as outspoken as any among the old SDP Gang of Four in singing the praises of the new Labour leader Tony Blair.

But surely the conference bookshop has gone too far. The newly ennobled Lord Rodgers' political autobiography, Politics of Change, is placed on a shelf clearly marked for his party's political

Cuba novella

■ Another sign that the Havana-Washington hurricane is metamorphosing into something a little less threatening - Cuba is posthumously rehabilitating Ernest

The Nobel laureate was thrown out in the early, heady days of the 1959 revolution, an act which some think contributed to his later suicide.

Not that he was ever utterly persona non grata. His love of fishing has been locally commemorated by the use of his name for an annual international game fishing tournament.

Many weighty hlue marlin have been booked, hung and photographed in honour of Papa Hemingway.
But now his old home, 11 miles

south of Havana, is being transformed into a small museum, where visitors will be able to see such oddities as an aged. well-preserved typewriter on a stand - Hemingway often wrote standing up. Another, smaller museum is

being created out of the writer's room at the Ambos Mundo Hotel. Maybe Fidel Castro has even

discovered the pertinence of one of Hemingway's tales: The Old Man and the Sea.

Less chatter

■ The latest annual report of the House of Commons commission informs us that administration costs were £4.6m lower than expected in 1993-94, "due mainly to lower than expected levels of parliamentary activity", Not all blessings are mixed,

FINANCIAL TIMES

Groupe Bull employees accused in arson case

By John Ridding in Paris and Laurie Morse in Chicago

Agents of Groupe Bull, the French state-owned computer manufacturer, sought huge increases in insurance coverage for a warehouse in the two months before a fire devasted it in 1991, according to evidence in an arson case which began in Chicago yesterday.

A suit filed by Allendale Mutual Insurance of the US claims that the June 1991 fire, which destroyed stock worth about FFr584m (\$111m) at the warehouse in northern France, was caused by employees or associates of the French company.

In pre-trial documents, the insurers allege that employees of the computer company started the fire at the warehouse - a central inventory collection point for most of Europe - to hide rapidly depreciating obsolete machinery stored there, and to obtain insurance policy proceeds and fresh capital from Bull's

Ministers row over

Spain's inflation rise

In Paris yesterday, Bull vigor-ously denied allegations of arson and said it was counter-suing its former insurer for making the accusation. Bull claims Allendale wants to avoid paying a \$100m insurance claim.

The French company said it firmly rejected the allegations and that an investigation by French authorities, completed at the beginning of this year, found

no evidence of arson.
According to Bull, the warehouse was owned and operated hy a company which was not an affiliate. The fire destroyed mainly excess inventory of Zenith Data Systems, the personal computer manufacturer acquired by Bull in 1989.

The opening of the case follows a protracted dispute hetween Bull and Allendale Mutual. With some 1,800 exhibits and 40 scheduled witnesses, the case has

> minister's bullish tone was partly intended to reinforce his upbeat economic message to King Fahd, delivered during several hours of "very friendly" talks.

> However, Mr Major's positive message was also an attempt to reverse the trend of many opinion polis which suggest that the economic recovery is not being translated into an increase in support for the government.

Britain on brink of 'historic' recovery, says Major

By Kevin Brown In Jeddah Gillian Tett in London and

The economic outlook in Britain is the best for nearly 50 years, Mr John Major, the UK prime minis-

ter, claimed yesterday.

In a clear attempt to reap a political dividend from the recent steady improvement in most indicators of economic performance, Mr Major used a speech to British businessmen in Saudi Arabia to set out his most optimistic assessment of the economy since the end of the recession.

But as an indication of the difficulty the Conservative government faces in persuading the electorate that recovery is under way, an opinion poll yesterday showed consumer confidence fell back earlier this month.

umer sentiment.

Mr Major, however, yesterday insisted that the UK was at "a historic turning point" in its eco-nomic performance. "We are now standing at the threshold of an economic recovery unlike any that wa have seen since the second world war," he said. UK officials said that the prime

The Saudi government is traditionally an important purchaser of UK government debt, and its willingness to remain in the market is regarded as an important indicator of the overseas credibility of British economic policy.

120 -----

Those inclined to look back will find plenty to grumble at in yesterday's restructuring announcement from Grand Metropolitan. The company seems unable to shake off an inclina-tion to pile up provisions. The £280m charge announced yesterday, primar-ily for reorganisation of the drinks and European food husiness, follows a £175m charge a year ago for the US food and eye care businesses. If Grand-Met really is trying clean up its accounts, why is it still resorting so heavily to exceptional charges? If the drinks business really is in need of surgery, why were its problems not addressed earlier? Cynics would say the new top team is simply setting itself up for a run of good operating

profits. Yet those prepared to look forward must admit that the new approach is both reasonable and a reflection of GrandMet's growing internal strength. Disposals and cash generation have strengthened its balance sheet, so it can more easily cope with the outlay involved in restructuring. The latest programme will enable GrandMet to spend more on marketing its spirits brands, some of which have suffered

slightly from neglect. Two big questions remain. Grand-Met clearly needs to do something about its European food husiness, which lacks critical mass. The choice, left open in yesterday'a announcement, is between expansion and winding down which might prove less risky. The other concern is whether the weakness of the spirits husiness reflects fundamental pricing troubles. GrandMet's recovery will be slower if today's austere climate has left consumers reluctant to pay up for pre-mium hrands. That environment would hit other producers too, though In such a world the prizes accrue to those with the most efficient production and distribution networks.

MAI The recent news about MAI has been dominated by its media side - in particular Lord Archer's controversial share orders in the run-up to the group's hid for Anglia Television. But that was not what was worrying the stock market yesterday. MAI's media division, which includes Anglia. exceeded expectations. The cost-cutting phase is over and MAI is now moving ahead with plans to build up Anglia's TV production operations. Originally, MAI predicted the £292m acquisition would be earnings nentral

Hochtief is the more profitable with a FT-SE Index: 3079.1 (+14.0) return of nearly 5 per cent on turnover at the last earnings peak, five times as high as at Holzmann. Hochtief could **Grand Metropolitan** extract operational efficiencies at Holzmann, whose shares have under-performed the market by 50 per cent

performed the market by 50 per cent over the past five years. However compelling the argument for fusion, changes of corporate con-trol in Germany – especially those promoted against the will of incum-bent management – are long-drawn out affairs in which the interests of the hig shareholding banks invariably the big shareholding banks invariably take precedence over those of minority shareholders. The traditional, back door way for Hochtief to win control would be to acquire Deutsche Bank's 30 per cent stake in Holzmann (though at present the bank says it is not selling). Better, for the evolution of Germany's financial markets, would be for Hochtief to make a full-scale take-

City regulation

The British system for investigating and prosecuting fraud has once again been found wanting. Powers that compel suspects to answer questions are blatantly unfair - as the European Commission of Human Rights has ruled in its assessment of the Guin-ness affair. But it is not as though these powers are particularly effective anyway. Britain's record of convicting fraudsters is notoriously poor.

A rethink is needed. A promising approach would be to abandon criminal punishments for many classes of financial skulduggery and instead focus on civil penalties. Those con-victed could be fined, ordered to restitute funds to those who had been damaged, and/or be disqualified from being directors. When individuals have not personally enriched themselves, a prison sentence often looks unnecessarily harsh. And since they would not go to jail, it might also be acceptable to lower the standards of proof to those in civil cases.

The main argument deployed against such an approach is that It would create one law for the rich and one law for the poor: petty thiefs would end up in prison, hut big fraud-sters would not. But this need not be so. It would still be possible to retain criminal sanctions for cases such as embezzlement. Moreover, if the evidence was not strong enough for a criminal trial in such cases, surely it would be better to inflict stiff civil penalties than no punishment at all.

Fifty-one navies would be in deep water if propulsion shaft seals supplied by the world's leading manufacturer, John Crane Marine, weren't equal to the challenges of life at sea.

Without us, it wouldn't

be waterproof.

The mechanical seals, fitted to surface ships ranging from small patrol boats to the world's largest aircraft carriers and submarines, prevent seawater from entering along the propeller shaft. Offering major technological advantages over other systems, the seals are designed and tested to the highest military specifications and have been proven under all operational conditions. Thanks to John Crane Marine, navies aren't shipping water.

John Crane is one of TI Group's three specialised engineering businesses, the others being Dowty and Bundy. Each one is a technological and market leader in its field. Together, their specialist skills enable TI Group to get the critical answers right for its customers. Worldwide.

UAP takes full control of Colonia in DM1.2bn deal

By David Buchan in Paris

Union des Assurances de Paris yesterday announced it was mounting a DM1.2bn (\$780m) deal to pay Oppenheim, the private German group, for its minority stake in a holding company in order to give the French insurance group 100 per cent control of Colonia, lts German insurance subsidiary.

In a complex financial deal, UAP has been able to reduce the amount of cash paid to Oppenheim by exploiting Westdeutsche
Landesbank's desire to raise its a 'put' or option to sell their stake in the French insurance

company.

UAP will finance the deal 45
per cent in "quasi-own funds" or
bonds convertible into shares, 33 per cent in ordinary bonds and the remaining 22 per cent in

the French financial group, swapped their insurance holdings. Suez gained Victoire's French insurance subsidiaries, and UAP took Victoire's 78.8 per cent stake in Vinci, a specialist holding company controlling various European insurances compahigher stake. By putting up FFr482m (\$92m) nies notably Colonia, the third

largest German insurer with DM8.8bn worth of business a year. The remaining stake in Vinci was held by the Oppenheim family, who had earlier sold out control to Victoire. "With the Oppenheims having

stake, it was always clear that if they exercised it we would try to buy the stake," said UAP, adding that "the only question for us was how to minimise our cash third in cash.

UAP's opportunity arose when it was privatised earlier this year. Westdeutsche Landesbank joined

the "novau dur", or core of institutional investors organised by the French government. Like other core investors its stake was scaled back to 2.2 per cent by the French government, but the regional German bank wanted a

Debt holders offered new terms in Heron rescue

By Simon Davies in London

Holders of £378m (\$599m) of deht in Mr Gerald Ronson's property group Heron International were yesterday offered £142m of cash, or the chance of taking a stake in the group which could continue to be run by Mr Ronson

HNV Acquisition, which is controlled by US entrepreneur Mr Steven Green and has Mr Rupert Murdoch and Mr Michael Milken's family trusts as hackers, yesterday released details of an offer, which will give it at least 51 per cent of

This follows the collapse of the £1.4hn bank restructuring of Vasiliou & Company, which finalised last September.

the day-to-day management continues under Mr Ronson's guidance and that he remains an executive director, but no employment terms have been

The board of Heron stated that "it is highly probable that failure to implement the pro-posed offers will result in receivership and/or the instigation of bankruptcy proceedings in some or all group compa-

Both the board and the company's bankers have concluded from separate studies that the rewards of receivership would be substantially lower. Mr Basil Vasiliou, chairman

speaks for a large number of Mr Green has proposed that non-hank hondholders, welcomed the offer as "extremely positive". It follows what has effectively been a two-year receivership that has cost Heron about £50m.

HNV is offering £450 or 300 HNVA shares for every £1,000 of senior deht, £60 cash or 40 shares for every £1,000 of junior deht, and £7.50 or five new shares per old Heron share. HNVA is committed to achieving a listing in the future, but the hanks are likely to take cash, and Mr Green is expected to be left with at least 70 per cent of the company.

The announcement was accompanied by Heron's profit figures for the year to March, in which the group made an operating loss of £6.8m, against.

BK Vision wins rights case

By lan Rodger in Zurich

BK Vision, the investment company controlled by Mr Martin Ehner's BZ banking group, has won a landmark court challenge against a Swiss company's attempt to reduce shareholder rights in issues of new equity capital,

Union Bank of Switzerland, in which BK Vision is the largest single shareholder. last year won approval from its AGM to create pools of equity capital that could be used at the hoard's discretion for acquisitions or equity linked bond issues without seeking

their pre-emptive rights. BK Vision claimed that a new Swiss companies act, which came into force in 1992 and authorised the creation of these pools of capital,

shareholders or respecting

specify to the AGM the purposes for which they would be The panel of five commercial court judges agreed that neither the capital nor the voting rights of shareholders could be

required that companies

withdrawn, even by a majority AGM vote, unless it was for a specified purpose.

The court made clear that it

in detail, as for example, in the case of a large acquisition. However, guidance had to be After the new companies act

came into force, several quoted Swiss companies drew up resolutions creating pools of authorised and conditional capital and had them approved by their AGMs.

The court did not say that these resolutions, none of which were challenged within the time limit allowed by the law, were void. Its judgment applies only to UBS and, if it is not overturned on appeal, as a

Political uncertainty holds sway in Italy

Comit index

500

Budget discussions may cloud the forthcoming results season, reports Andrew Hill

he Italian stock market, like Italian newspaper headlines, sometimes seems to be just a noisy approximation of what is really happening. Milan's principal equity indices are no higher now than they were on the eve of the country's mould-break-ing general election in March, in spite of the fact that Italy's quoted companies are about to publish evidence of real economic recovery in their half-

year results. The main reason is that this year's Italian results season -although it will be the first for two or three years to hring predominantly good news - coincides with nervousness about the economic plans of Mr Silvio Berlusconi's government. Investors are preferring to focus on cabinet discussions of the country's hudget for 1995, which must be completed by the end of the month.

As one analyst puts it: "The political uncertainty will prevail over the markets. It looks like any investment in Italian financial assets - lira, bonds or equities - has a precondition. and the precondition is: a good

Privately, Italian entrepre-neurs are frustrated by investors' emphasis on the fragile political situation. Whatever appens to the government, the news coming in from subsidiaries looks good, they say. Italian companies' half-year figures are difficult to forecast and tricky to interpret. They are unaudited and usually published before tax, a notoriously unpredictable element in fullyear results. There is room for some companies - financial and hanking groups in particular - to axarcise a certain amount of discretion about what they declare at the half-

But there is a consensus among analysts that the hig industrial companies will show in the next fortnight how they are reaping the rewards of restructuring, and, at last, making the most of a weak currency. "Exporters are doing extremely well, and the recent weakness of the lira is helping this," says Ms Sophia Blanpain, equity strategist with Credit Suisse First Boston in London.

our of Italy's higgest quoted industrial groups
- Montedison, Plat.
Pirelli and Olivetti, for example - all recorded large net losses in 1993. But their interim results should demonstrate a marked improvement in trading, which is likely to be reflected also in the performance of smaller manufacturers, often dependent on the giants for their livelihood.

Montedison, the chemicals energy and agro-industrial group, has already announced a return to interim pre-tax

profits for the first time since 1991. On Friday, the group, which came close to collapse last year, reported a pre-tax profit of L289bn (\$185m) in the first half against a loss of L369bn in the equivalent period. The shares rose by 5 per cent immediately after the news was announced, although they slipped back later in the

93

1992

Fiat, the automotive and industrial group which last year recorded the biggest loss of its history, is expected to demonstrate towards the end of this month that it is on its way to making a profit in the

the group's annual meeting in June. The domestic market is still sluggish, in spite of the impact of the new Punto, now Italy's best-selling car, but the company has still managed to increase its market share in Italy and boost exports because of the weak currency.

Recession has forced both Fiat and Pirelli, the cable and tyre manufacturer, to restructure. Pirelli, which should produce its results at the beginning of next week, reduced debt from L4,000bn in January 1992, to L2,000bn by June this year, closed 22 of the 102 factories in its core business and cut its workforce hy 20 per cent to 40,000. Again, the half-year results should demonstrate that the group is on the way to its target of a return to net profit in 1994.

The recovery at Olivetti, the computer group, is more frag-ile. Its half-year results, which will be published on Thursday. are likely to be marred by large trading losses on the group's investment portfolio. But although there is still some doubt about whether the company will take restructuring charges for 1994 in the first or second half, many analysts expect Olivetti to break even at the operating level in the first six months.

The news is likely to be less good in the banking sector -hit by trading losses, particu-

Gianni Agnelli, chairman, at larly on the bond market - and for those construction ond cement companies which are still suffering from stagnation in the building sector. But even here, analysts point out that companies such as Unicem - the cement manufacturer which is part of the Agnelli family's empire - have reduced their costs substantially during the two to threeyear downturn.

💙 o far, the Italian husiness community has been notably cautious in its judgment on Mr Berlusconi, perhaps partly out of respect for an entrepreneur-turnedprime minister, partly out of residual optimism about what is, in effect, Italy's first pro-

What they now want to see is a strong effort by the government to match their hard work in cutting costs and restructuring for a recovery, for example by keeping taxes down and pursuing its initial proposals on labour market flexibility and investment incentives.

When the 1995 budget is ... tabled at the end of this month, it will not deliver Italy "into paradise or hell," as one analyst puts it, but it should provide the first indications of whether Mr Berlusconi is going to fulfil his part of the bargain with business.

General Mills suffers cereal setback

By Tony Jackson in New York

General Mills, one of America's higgest producers of hreakfast cereals, suffered a 21 per cent slump in cereal sales volume in its first quarter to August 28. The company blamed supply disruptions during the summer, when it discovered it had been using in its cereals oats treated with an unauthorised pesticide.

General Mills said the costs, which obliged it to throw away some 50m boxes of cereal, had been included in last year's

results. However, cereal production, suspended in June. had not been fully resumed until the second half of July. That had affected first-quarter sales and profits both.

The company said that shortage of product had caused its share of the \$9bn US cereal market to fall from 29 per cent to 24 per cent in the quarter. However, trade inventories were now normal and full marketing support had resumed. Sales were ahead of budget, the company said, and a "resumption of earnings

Net income for the quarter fell 9 per cent from \$1.04 per share to \$0.95, on sales down 5 per cent at \$1.98bn. Excluding the cereals operations, the company said, earnings were up 8 per cent on the year before. Volume of its Betty Crocker products, excluding snacks, had risen 8 per

Restaurant sales were up 6 per cent in the quarter, but operating profit was virtually flat. General Mills' shares rose \$% to \$56% in early trading.

France Télécom in MTS stake

By John Ridding

France Telécom, the French state-owned telecoms operator. yesterday took a further step in its international expansion announcing it would take an 11 per cent stake in MTS, a Russian mobile telephones joint venture.

The stake in the Russian venture also represents a strengthening of France Télécom's alliance with Deutsche Telekom, the German operator from which it will buy the After the sale, Deutsche Tele-

kom will have a 28 per cent stake in MTS. MTS, which holds a 10-year exclusive operating licence for

mobile communications in the Moscow area, is 51 per cent owned hy Russian interests. These include MGTS, Moscow's public telecoms operator.

The joint venture, which plans to invest about \$90m in the Moscow mobile communications network, launched operations in July. It has about 2,000 subscribers for its CSM systems, a digital radio telephone system used by about 60 countries.

France Télécom is present in Russia in fixed telephone communications. Since 1992 it has jointly operated a network in Kaliningrad.

Last year, it signed an agreement to help modernise the Russian telephone network.

 M6. the French television station which is due to be floated later this month, should record profits of about FFr300m (\$57m) this year, compared with FFr229.8m in 1993, according to Mr Nicholas de

place on September 28 at a price of FFr260 per share. Lyonnaise des Eaux, the utilities and communications group, which is one of the television station's controlling investors, intends to list at least 10 per cent of the shares

Tavernost, managing director.

The flotation is due to take

in M6. Lyonnalse des Eaux currently holds 28.6 per cent of the shares, the same stake as CLT, the Luxembourg media group.

Rental group directors insist chief should stay

By Simon Davies

The directors of Central Transport Rental Group (formerly Tiphook, the failed international container leasing group) have examined the details of chief executive Mr Robert Montague's complex personal finances, including an estimated £30m (\$46.5m) of debt, and are committed to his remaining with the company.

Following last Thursday's revelation that the Royal Bank of Scotland had issued a bankruptcy petition against Mr Montague, the Tiphook founder has refused to explain any difficulties concerning the £2.3m bank loan.

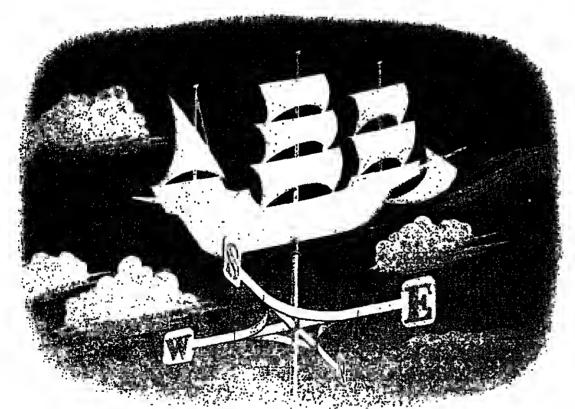

The directors and newly-appointed chairman Mr lan Clubb, have analysed his situation. Mr Clubb stated his continued commitment to Mr Mon-

Bank, which have the largest exposure to Mr Montague's debts, have both remained silent about their intentions. However, RBS has yet to present the petition to Mr Montague, and sources at CTRG remain confident that he will

Commerzbank and Barclays

remain solvent. Regardless of the outcome, however, the crisis will put greater strains on CTRG's struggle to survive with around £520m debt.

HungarHotels contenders line up | McDonnell missile | Coca-Cola sales

By Virginia Marsh in Budapesi

American General Hospitality. a privately held US company and Intercontinental Hotels, the Japanese-owned botel group, last night emerged as the top contenders for a 51 per cent stake in HungarHotels, Hungary's last state-owned hotel chain to come up for pri-

The State Property Agency. the privatisation body, said three of the five companies invited to participate in yesterday's tender had put in

Analysts said American General, which operates 91 hotels in the US, and Intercontinental, which has wide experience

were the favourites to win. HungarHotels has registered sbare capital of Ft9bn (US\$83.3m) but the sale of the 51 per cent stake is expected to net around US\$60m.

HungarHotels owns 15 hotels in Hungary, including eight in Budapest and two on Lake Balaton, the country's most popular summer tourist destination. lt owns 45 per cent of four star botel capacity in Budapest, including the Hotel Forum situated on the River Danube in the centre of the city which is one of central Europe's most visited tourist and business locations.

The chain made net profit of Ft6.3bn last year and is projecting net profit of Ft6.6bn for 1994. Room occupancy aver-

aged 53.7 per cent last year and is expected to increase to 57 per cent this year.

Dallas-based American General, which was founded in 1981, has a track record in turning around loss-making or under performing hotels. The company, which had turnover of US\$300m last year, does not operate botels under its own name but appoints franchise partners for its hotels. In the US, it works with chains such as Marriott, Sheraton, Hilton and Holiday Inn.

The company said it believed its management could add "a lot of value" to Hungar-Hotels and that it was to establish a keen presence in the European market. Presently, the company

only operates in the US. Intercontinental has worked in the region since the 1960s. It runs the Hotel Forum through a local franchiser and until last year had a similar agreement with the Duna Intercontinental, now the Marriott.

Intercontinental said, if successful, it would manage directly just four hotels in the chain. It would leave the remainder with their existing management which it would train. A condition of the tender la that the successful bidder would not be able to sell off any of the 15 hotels for three

years.

The SPA is due to launch a public offering for the remaining 49 per cent once the majority stake has been sold.

operation in doubt

By Bernard Gray

McDonneli Douglas, the US aerospace company, faces a dif-ficult decision about the future of its missile business following its failure to get the "winner takes all" contract for up to \$2bn of Tomahawk cruise missiles from the US Navy.

The hard realities of consoli dation in the US defence business were underlined by Hughes, the winner of the competition, which put its success down to tha cost savings it has generated since buying General Dynamics' missile business two years ago. Hughes has rationalised the two companies' operations and moved them all to a single site in Tucson, Arizona.

McDonnell Douglas had put its missile operations up for sale 18 months ago but pulled it off tha markat because it considered offers inadequate. Now it is waiting for a debriefing at the Pentagon which will explain why it lost the Tomahawk competition before deciding what to do next.

The company has work on the Tomahawk from previous competitions which will last until mid-1995. McDonnell could also bid for a small contract to supply the UK with 100 Tomahawks, but there is no other potential work pending. As a result, the future of the

factory at Titusville. Florida, which employs 1,300 people on Cruise, must now be in doubt. Another 400 are employed on the programme at the compa-ny's headquarters in St Louis, Missouri, but they produce ship-based control systems which were unaffected by the missile competition.

Elsewhere, McDonnell's ahiplaunched Harpoon and the stand-off SLAM missile are relatively small contracts and its main development work is on the JDAM smart bomb. That may not be sufficient to maintain a viable missiles business in the rapidly shrinking US

defence market.
In theory, McDonnell Doug-las could add to its missila operations, but it is much more likely that the company will decide to sell to another missile maker. Hughes, which bid for the business last year, may be less interested now that it has become the sole supplier of Tomahawks. Other potential huyers, such as Northrop Grumman or Lockheed Martin may still be interested, but the price is likely to be even less than the \$300m reportedly offered last year.

For Hughes, winning the contract bas fewer consequences, though it will be able to develop Tomahawk for the next generation of cruise weap-

Macintosh licensing scheme from Apple

By Louise Kehoe in San Francisco

Apple Computer plans an expansion through the phased licensing of its Macintosh personal computer software to other PC companies.

Initially, Apple will license its core "Mac OS" and ele-ments of its PowerPC bardware design which until now has been unique to its own PC products, to companies that are not direct competitors. se will include companies where Apple has limited distribution: and those whose technical expertise can add value, such as making computers for specific applications.

Already "about six companies" have signed licensing agreements, Apple said, but refused to identify the licensees other than to say that they

are equally divided between the US, Europe and Asia. Industry analysts have speculated that some of Apple's direct competitors, including IBM, might be interested in licensing the Macintosh software

if the terms were favourable.

Apple's failure to license the Macintosh software in the late 1980s is seen by critics as a serious strategic blunder because it allowed Microsoft. the world's largest software company, to establish its Windows PC operating system as the industry standard, and industry analysts said Apple's move now is "too little, too late". Apple's share of the PC market has slipped to about 10 per cent in the face of intense competition from companies such as Compaq Computer offering PCs with Windows

IBM pins PC hopes on new home-use products

By Louise Kehoe

Machines (IBM) is pinning its hopes of regaining leadership of the personal computers market on its new products aimed at home users.

The Aptiva multimedia PC is the first of three new product lines that IBM is preparing for market. Two more are expected next month.

The products will be backed by the company's biggest ever advertising campaign, a spend of \$100m over the next three months, with \$20m dedicated specifically to Aptiva.

The marketing blltz is designed not only to boost sales but also to help IBM to rebuild its image as an industry leader. Over the past six months IBM has slipped to fourth place in US PC sales from first place last year, overtaken by Compaq Computer, Apple Computer and Packard Bell.

Mr Lou Gerstner, IBM chairman, this year hired Mr Rick Thoman, a colleague at RJR Nabisco and American overnight.

Express, to reinvigorate its PC operations. The product lines approach to PC marketing.

The Aptiva PCs are aimed at the growing consumer market, and follow last week's launch by Compaq Computer of a new line of consumer PCs. IBM is offering a wider price range than Compaq, from about \$1,200 to \$2,600, including two models based on Intel's highest performance Pentium microprocessors. Intel last week began its own \$80m consumeroriented advertising campaign

for Pentium-based PCs. The Aptiva range includes multimedia capabilities, sucb as a CD-ROM player and speakers, as standard, it can also take telephone messages or receive a fax, "waking up" when the telephone rings. whether or not the machine is turned on.

A "scheduler" also allows the home PC user to program the Aptiva PC to turn itself on and perform pre-selected functions, such as playing a music CD or sending fax messages

Kemira aims to raise FM1.5bn in share offer

Kemira, the Finnish stateowned chemicals group, said yesterday it boped to raise between FM1.5bn (\$305m) and FM2bn through an international sbare issue to be

launched next month. The offer, as part of Finland's biggest ever initial pub-lic offering, will cut state ownership in the group from 100 per cent to as little as 71 per cent in line with the government's privatisation pro-

gramme. It will be accompanied by a listing of Kamira'a shares on the Helsinki stock

exchange. Kemira said proceeds would be used to cut its FM8bn net debt and strengthen its equityto-assets ratio from a weak 15

per cent to about 25 per cent. The group will offer a total of 30m ordinary shares at a nominal FM10 each, with an option to increase the size of the issue by 5m shares if demand is strong. The bulk of the shares will be offered to international institutions, with

the balance being subscribed by Finnish institutions and retail investors.

Many of Kemira's businesses are starting to benefit from cyclical economic recovery and it returned to the black last year after two years of losses following an extensive cost-cutting programme. The group'a biggest division includes fertilisers and it has important niche positions in pulp and ment chemicals and titanium

paper chemicals, water treatdioxida pigments.

Mr Heimo Karinen, Kemira's

profitability and competitivenesa have snbatantially improved following the restructuring of its operations in the last few years. The equity issue will further strengthen the group's financial position and enable us to take full advantage of the recovery that is seen in the

The offer will be launched after publication of eightmonth figures on October 10 with final pricing being fixed in the week of October 31.

INTERNATIONAL COMPANIES AND FINANCE

Indian ambitions

year after Gillette was given permission by Mr Rajinder Malhotra, who given permission by **1** the Indian government to acquire a stake in Harbanslal Malhotra and Sons company, contested the deal, (HMSL), India's biggest razor blades manufacturer, the USbased multinational's ambitious plans for the sub-continent have been stalled by a family feud and protracted legal battle.

Cola Sale

Hosh licens

At the heart of the dispute is a growing fear and resentment among Indian industrialists that the government's reform programme, introduced three years ago, has made it too easy for multinationals to establish

with his sons owns 38 per cent of HMSL, the Rs600m flagship saying his two elder brothers Ved Prakash (who has retired due to ill health) and Surinder Nath (who runs the business), were selling their stake to Gillette without his knowledge. Ha claims that his brothers have valued HMSL at Rs600m while he believes it to be worth at least Rs15bn.

Mr Rajinder, who with his sons owns Vidyut Metallics, a local blades maker withabout 27 per cent of the market, fears

The US-based multinational's plans for its largest untapped market are faltering, writes Shiraz Sidhva

themselves in the motal mar-ket by buying up the most suc-cessful local businesses.

Last year, Coca-Cola bought Parle Exports, India's largest soft drinks manufacturer, and Provisor and Camble acquired a ic from App Procter and Gamble acquired a stake in Godrej Soaps to consolidate its presence in the Indian detergeuts market.

More recently, Whirlpool, the
US white goods giant, has
bought Kalvinator India, one of the country's most established refrigerator manufacturers.

Gillette has identified India as one of three chief markets (with China and Russia), in which it will expand all its businesses - Gillette shaving systems, the Oral-B dental care range, Braun home appliances, and Parker writing equipment - during the next decades. The company will invest \$50m to \$60m in 1994-95, and is carrying out extensive market research

in the country.

Gillette has had a presence in India's Rs2.5hn Indian razor hlades market since 1986. India's reforms programme only encouraged the company to expand in what it considers the world's largest market,

with a vast untapped potential. Last year, the company increased its 40 per cent stake in Indian Shaving Products, a joint venture with the Calcut-ta-based Poddar group, to 51

Although the Indian company enjoyed an 18 per cent market share, its success was confined to the upper end of the shaving systems market, which accounts for a mere 3 per cent of the total market of 47.2bn units a year. To enter the Indian blades market, Gillette decided to link up with its main Indian competitors, the Malhotras, who control over 55

per cent of the blades market. "Out of 20hn blades sold in the world, 7.8bu are in the lower segment of the market." says Mr Gurbrinder Singh Gill, director for strategic projects at Gillette International and head of Gillette's India operations. "We cannot produce cheap blades because of our high R&D costs. An alliance with the Malhotras will help us establish ourselves in all the segments, and then we will be in a position to consid-

erably widen the market." Gillette estimates that more than 700m Indians use cut-throat razors instead of blades, and could be persuaded to use more modern shaving systems in time.

Last October, the government's Foreign Investment Promotion Board cleared Gillette's proposal to pay \$20m for a 26 per cent stake in NVI Engineering, a Malhotra group company which manufactures

themselves in the Indian mar-ket by buying up the most suc-the stake in HMSL he inherited from his father, his Rs1bn-ayear turnover company would find it hard to compete with Gillette once it collaborated with his two brothers.

If Gillette acquired a 49 per cent stake in HMSL, it could gain an annual production capacity of 1.5hn blades, the capacity of two HMSL plants in Calcutta. If the capacities of other HMSL subsidiaries, Malhotra Shaving Products and Centron Industrial Alliances, wera added, Gillette could increase its capacity to 2.4bn blades. Since Gillette already has a controlling stake in Indian Shaving Products, it could control 75 per cent of the

Indian blades market. In August last year, before the government granted perion for Gillette to acquire the Malhotra stake, Mr Rajinder asked the Company Law Board to intervene over the negotiations hetween Gillette and his brothers. The Law Board ordered HMSL not to proceed with the collaboration without the approval of all the shareholders of the company, but this was subsequently set aside when the elder brothers appealed to the Calcutta High

r Rajinder also r Rajinder also moved to the Delhi High Court, chal-lenging the Foreign Investment Promotion Board's right to grant permission to Gillette to expand its business in India. he alleged that the government had not evolved clear criteria and principles for processing such applications. He claimed Gillette had suppressed important facts about the tie-up, and that the company was import it already possessed. Gillette, he said, was not ready to bring in sophisticated sensor-hlade technology, but the price of razor blades would increase sharply once Gillette estab-

lished a market monopoly.

A final decision is expected to be delivered by the Delhi High Court on October 4.

The Suprems Court was moved to set aside a stay the elder Malhotras acquired from the Calcutta High Court, and the final hearing in the Delhi High Court is posted for October 4. Mr Rajinder was also keen to get HMSL's shares evaluated the Indian company's shares, saying his brothers had grossly undervalued the company at Rs600m, while he estimated tha com-

pany to be worth Rs15bn. Meanwhile, Gillette is scouting for partners to enter the writing instruments market, and the home appliances and the dental care market.

INTL COMPANIES & CAPITAL MARKETS

China urged to develop funds

By Tony Walker in Beijing

China was urged yesterday to apeed the development of mutual funds with foreign involvement to stabilise its fledgling stock markets, which have been subject to wild fluctuations in the past year. Mr Robin Fox, vice-chairman

of Kleinwort Benson, told an investment seminar in Beijing organised by the China-Britain Trade Group that one way to bolster China's markets was to "promote properly authorised savings vehicles". Adding to the volatility of

China's equities markets has been the fact that inexperienced individuals seeking short-term speculative gains

make up the bulk of investors. China announced recently that it was considering allow-

ing foreign securities houses to form joint ventures with Chinese institutions to invest in the A-share market, presently closed to foreigners.

Mr Fox said there was a wealth of experience available among foreign securities companies in joint venture arrangements with local firms. Kleinwort Benson, for example, was engaged in such ven-tures in India, Korea, Taiwan and Japan.

partner would be more able to overcome conflicts of interest as well as resisting local pressure to invest in particular industries or companies," Mr Fox said.

"The main investment goal of the funds I am recommending would be to invest in quoted Chinese companies to

domestic stock markets, but I would expect them also to participate in the bond market, possibly by investing a stated percentage of each fund in gov-

ernment bonds." Mr Fox said merchant banks and foreign securities compa-nies were also well placed to assist China in its present phase of rapid economic development raquiring large mounts of capital, especially "The foreign joint-venture for infrastructure projects.

British investment banks were "ideal partners" for pro-jects which required creative approaches in evaluating the financial viability of a project, and seeking ways in which risk could be minimised.

There was also a substantial exercise, Mr Fox said, in looking at alternative sources

help in the development of of equity and debt finance, negotiating the construction and other contracts to maximise the risk taken on by the contractors, and also maximise the project finance that does not appear as a direct liability of the promoters of the pro-

Other speakers included Lord Alexander, chairman of the National Westmineter Bank, who urged his Chinese audience to take advantage of the "skill base" offered by London's commercial banking

These skills, he said, include assistance in the development of the Chinese securities industry, corporate finance, direct investment channels and fundraising for privately financed infrastructure projects, such as power stations and toll roads.

Singapore cashes in on ringgit turmoil

By Kleran Cooke in Kuala Lumpur

Singapore's money market dealers are reaping the benefits of continuing fluctuations in exchange rates of neighbouring countries' currencies, particu-larly that of the Malaysian dol-

Dealers say that the daily ringgit trading volume in Sing-apore, both on the spot and forward markets, is now regularly more than US\$3bn - five times the level of a year ago. There has also been a great deal of activity in other southeast Asian currencles, particularly in the Thai baht and the Indonesian rupiah, mainly because of interest rate differ entials between the two cur-rencies and the US dollar.

"We estimate that trading in south-east Asian currencies -the so-called exotics - now accounts for between 15 and 20 per cent of daily money trading here," says the head of one for-eign bank'e dealing operations in Singapore.

cies. Ringgit trading in Singapore has gone through the roof - on many days it's well ahead of London or Hong Kong."

The main cause of Singapore's sudden popularity as a ringgit trading centre was the introduction earlier this year of a series of measures by Bank Negara, the Malaysian central bank, aimed at curbing

the inflow of speculative funds. At the end of 1993 Bank Negara bought in large quantities of US dollars to revalue its reserves and reduce year-end book losses caused by the bank's own multi-billion dollar speculation on the foreign exchange markats. in 1992 Bank Negara lost M\$9bn (\$3.5bn) in foreign exchange

"Increasingly, the banks are looking to make good forex profits on the exotic current world's epeculators saw an buy the ringgit. Bank Negara, alarmed at the

the natural choice. Bank Negara has recently

dealings. Forex losses in 1993 were officially put at M\$5.7hn. The consequence of the move was that the ringgit fell sharply - from around M\$2.54 against the US dollar for most of 1993 to nearly M\$2.80 at one

world's epeculators saw an opportunity and rushed in to

inflationary impact of large amounts of speculative funds washing into the country, then introduced its restrictions, which included imposing a negative interest rate on foreign-held ringgit accounts and banning sales of sbort-term money market paper to for-

Traders and investors wanting to hedge their ringgit investments bad to move operations elsewhere. Singapore, dne to its status as a financial centre and its location adjacent to Malaysia, was

lifted most of its restrictions on the inflow of funds and after a highly volatile period, the ringgit's value has returned to around the M\$2.55 mark against the US dollar. But ringgit trading in Singapors has continued to grow. "It's a kind of inertia," says one Singapore money dealer.
"Bank Negara's moves and the big fluctuations in ringgit values acted as a catalyst for interest in currency trading in this region - not just in the ringgit, but in the other cur-rencies as well. Now the traders are here and enjoying it. They are not going to go away."

Singapore's growing importance as a ringgit trading cen-tre has not pleased Malaysia. Forex dealers in Kuala Lumpur say ringgit trading volumes in Malaysia now average between US\$500 and US\$1bn per day - well below levels in Singapore.

The Malaysian monetary authorities have always refused to entertain the idea of internationalising the country's currency. But Malaysia's own actions have resulted in the ringgit becoming one of the hottest items in the forex markets - and enhanced Singapore's position as a money trading centre.

INTERNATIONAL CAPITAL MARKETS

Treasuries regain balance after rout on Friday

By Frank McGurty in New York and Martin Brice and Conner Middelmann in London

Date of the second

The US Treasury market regained its balance yesterday morning after plunging in the previous session on unfavourahle economic data.

By midday, the benchmark 30-year government bond had edged in higher to 96%, with the yield slipping to 7.763 per cent. At the short end, the twoyear note was unchanged at 99%, to yield 6.369 per cent.

There was no fresh economic news to guide sentiment as the trading week opened. The lull afforded traders the opportunity to regroup after a rout which had pushed the price of the long bond down hy nearly two points and lifted the yield to its highest level of the year. In the morning's vacuum, the 30-year issue appreciated a little in light activity.

The only event which held the potential to move the market yesterday was an afternoon speech by Mr Alan Greenspan, the chairman of the Federal

Reserve. Bond traders were axpected to be listening for hints about monetary policy when the Fed chief addressed an economic conference at Boston College at 3.40pm.

In part, Friday's sell-off reflected an emerging consen-sus that the central bank could bring forward its next move to tighter credit conditions.

GOVERNMENT BONDS

Before the release of last week's data, most traders were reasonably confident that Mr Greenspan and his colleagues would wait until after the November elections before lifting interest rates again.

That calculation was undercut by Friday's news of a 0.7 per cent jump in industrial production last month, which suggested economic growth was still robust

Even more unsettling to the inflation-sensitive Treasury market, capacity utilisation in August had risen to 84.7 per

cent, its highest in five years. The production hottlenecks which are likely to arise with factories working at such a pace suggest producer prices are on the rise.

Against this backdrop, traders were eyeing this week's Treasury auctions of two-year and five-year securities as opportunities to unload more of their holdings. In a small hlessing, only a smattering of second-tier economic releases are due out this week, limiting the potential for another severe downturn by bonds.

■ After Friday's sell-off, most Europaan hond markats clawed back some ground yes terday as dealers covered their short positions, hut prices drifted lower in the afternoon. Investors remained mostly sidelined, ceding the stage to

the futures traders. "Many end-investors are still shell-shocked," said a hond dealer, adding "there's very lit-tle going on in the cash, but there's quite a lot of fast trading in the futures market".

UK gilts opened on a slightly firmer note as prices ticked up from the lows seen on Friday, when some yields reached 9 per cent. There was no weight behind the move, however, and the market gave up much of its

advance in the afternoon. Trading remained thin, with one dealer describing the mar-ket as very illiquid. He said longer-dated stock was tracking overseas markets, while concern over sterling weakness and the possibility of further UK base rate rises after last week's 50 basis point increase

affected short-dated gilts.
The 9 per cent yields of Friday had prompted some buying interest said another dealer However, according to Mr Andrew Roberts at UBS: There is little chance of capital flows into the market while there is this general pessimism at the short end over interest

Details of next Wednesday's gilt auction are due today. Some analysts anticipate that the Bank of England will cregilt, with £2bn of 8½ per cent stock due 2005.

On Liffe, the December long gilt future reached a high of 985 in the afternoon before falling to 9811, a rise of A on the day. The yield spread over bunds was around 152 in late trading.

■ German government bonds ended a listless session slightly firmer. Dealers were focusing on data releases due later this week. They include August M3 money supply, expected as early as today; August producer price data; September inflation numbers; and the Bundesbank's announcement of the next Bund issue, as well as the issuance calendar for the final quarter. Also looming large are Simday's state elections in Bavaria, which are seen as an indicator for the

about 15 basis points higher following Sunday's election but The Social Democrats did not

October 16 federal elections

win a parliamentary majority and the poor performance of the Liberal party dashed hopes for a centre-left coalition. Howevar, Prime Minister in-

waiting Mr ingvar Carlsson indicated that he plans to form a minority government relying on centre parties for support on key economic policies. His stated intention of forming "an effective government of co-operation" and the strength of the currency helped lift bond prices off early lows.

■ Italian bonds rose about a point on hopes that the government is close to finalising its 1995 hudget package. It met yesterday with trade union representatives to discuss planned pension reforms and dealers sald prices were boosted by hopes for a nearterm agreement.

In Portugal, bond prices rose by more than ½ point follow-ing the central bank's 50-basis point cut in its emergency lending rate to 11.50 per cent and its rate for draining excess

Pension schemes in UK 'set to cut equities holdings'

By Norma Cohen. Investments Correspondent

UK pension schemes are likely to reduce their very significant holdings in equities in coming years, while European pension schemes, typically large bond investors, are likely to increase theirs, panelists at a pension fund investment seminar con-

The debate about equity investment by UK pension schemes has been heightened by proposed new minimum solvency rules which actuaries warn will force them to sbift some of their assets into fixedinterest. Also, many large rent and deferred pensioners than they do contributing members, a condition which actuaries say requires them to switch into bonds in order to ensure they bave sufficient cash flow to meet payments as

they fall due. Meanwhile, pension investment experts are warning Continental pension schemes that unless they increase equity investment, corporations will have to increase pension scheme contributions in order to pay promised benefits.

Speaking at a National Association of Pension Funds conference in London last Friday, Mr Jean Frijns, board director responsible for investment at Dutch pension scheme ABP. said that the national peculiar ities which have led European pension schemes to favour bonds heavily are likely to disappear as markets become

"The Internationalisation and integration of capital mar-kets challenges national common wisdom and eoahles pension funds to operate on larger and more liquid markets," he

said. The factor of peer group behaviour, which often discourages European fund managers from increasing their equity weightings, should become less important as trustees begin to measure each manager's performance against a wider group.

Meanwhile, Mr Tim Gardener, partner at consulting actuaries William M. Mercer, predicted that due to new pension scheme rules and an ageing membership roster, "UK pension scheme equity rations will converge towards the years time, he said, the current 85 per cent average weighting in equities will be 75 per cent and falling. 'I see perhaps £40bn going into bonds. Hope-fully, the Europeans will be converging towards us and be buying those equities," he said. ABP, the Netherlands' larg-

est pension scheme and a big institutional investor in the Dutch market, has been fighting to ease government restrictions on its asset allocation for years. From January 1996 no restrictions will apply and Mr Frijns said the scheme will seek to increase its holdings of equities.

In explaining the propensity of European fund managers to invest in bonds, Mr Frijns cites different attitudes towards risk, differences in the institutional environment and differences in "the collective learn-

ing curve The habit of UK actuaries to use a so-called actuarial valuation for equities, which smoothes fluctuations in market value, added to the comfort level afforded fund managers investing in them. By contrast the Netherlands, Switzerland and Germany all use market value as the valuation basis.

Indian Airlines uses lease to finance four aircraft

By Antonia Sharpe

Participation

11 11 0

Medi

desire among Japanese entities to reduce their tax hills by offsetting capital allow-ances has allowed Indian Airlines to make a significant saving on the financing of its fleet. Rather than the airline taking out a loan to buy four A320-200 aircraft, the aircraft ware bought by a Japanese company which then leased them on to Indian Airlines.

An official at ANZ International Merchant Banking, which arranged the \$170m

WORLD BOND PRICES

The period of the lease is 10

years, at the end of which the

airline has the option to pur-

transaction, said that during the first 10 years it was cheaper for Indian Airlines to lease the aircraft rather than repay a loan. Meanwhile, the Japanese entity will be able to take advantage of the depreciation which goes with the own-

ership of the aircraft. The official said the transaction also reflected the renewed confidence which Japanese companies have in the Indian sub-continent.

The aircraft are due to be delivered in September, October, November and December and are the final four deliv eries of a six A320-200 aircraft mandate to ANZ in a financing totalling \$206m.

Attention turns to World Bank global

Only two new issues were launched in the eurobond market yesterday following the sharp falls in government bond prices last week. The market's attention

turned instead to the World

Bank's \$1.5bn global offering of five-year fixed rate bonds INTERNATIONAL

BONDS

which is expected to be launched in the next few days. "After a terrible week, people are taking time out to consolidate and wait for the next set of [economic] figures in

MAI increase to 9.5%

Speciality materials division hit by decline in defence markets

Morgan Crucible advances 8%

Morgan Crucible, the speciality materials manufacturer, is increasing its dividend for the first time since 1991 after reporting an 8 per cent rise in interim pre-tax profits from £32.3m to £35m.

Mr Bruce Farmer, managing director, said the 3.5 per cent increase in the dividend to 5.95p reflected confidenca in the future. Earnings per share for the six months to July 4 rose by 8 per cent to 10.3p (9.5p). We are now seeing some upturn in demand, particularly in Germany and France, and price increases are

He sdded that the company was not suffering from the squeeze on margins reported by many other manufacturers. Operating margins were steady at 10.2 per cent and Mr Farmer predicted they would improve in the second half.

The figures include profits of £3.6m and sales of £49.3m from Holt Lloyd, the car care buslness sold to management for £63.5m last month. Mr Farmer said the deal would not dilute earnings because much of the cash would he recycled into bolt on acquisitions. However, he stressed that year-end gearing would be below 50 per cent, compared with almost 70 per cent at the start of the year. There was unchanged net cash inflow of £5.2m after capideferred consideration costs of

Mr Farmer said the main areas of continued weakness were defence, now accounting for less than 3 per cent of turnover, and Japan. Australasia was patchy but continantal Europe had recovered more quickly than expected.

Group order intake was up 6 per cent compared with a 2.6 per cent rise in sales to £412m (£401.6m). Morgan is seeing good growth from new products such as components for safety air bags in cars which should generate sales of about \$20m (£13m) this year.

Operating profits rose 3 per cent to £42.1m with the carbon. technical ceramics and thermal ceramics divisions all ahead Profits from speciality materials slipped to £7.8m (£8.1m), hit hy declining defence and nuclear power markets. The shares closed 4%p higher at 332p.

 COMMENT Morgan Crucible responded to institutional shareholders' concerns by gen erating cash and selling Holt Lloyd so the recent weakness in the shares might appear churlish. The truth is that the shares had got a bit abesd of themselves after a strong run. While profits growth is steady rather than sparkling the drag

from defence cannot last for

ever, if only because it is now

fited from the lack of makers

restrictions imposed on new

cars, that trade prices had held

up well, and thet there had

been none of the previously seen "seasonal drift-down".

Since the acquisitions

which lifted gearing to the mid

80s, since reduced to the low

70s via property disposals - the

group "needed to digest", said Mr Bramall. It still had about

£5m-worth of property to sell, half in the second half and half

Graham Swetman, finance director, (left), with Bruce Farmer: some upturn in demand, particularly in Germany and France

so small. While other manufacturers complain of intense pressure on margins Mr Farmer is confident Morgan's margins will swell from just over 10 per cent to more than 14 per cent over the next two

to three years. The pace should pick up in the second half driv-ing profits to about £74m, before the gain on the Holt Lloyd sale. On a multiple of only 15 the shares are starting

Acquisitions help lift Sanderson Bramall

By Peter Pearse

Sanderson Bramall Motor Gronp, the West Yorkshirebased motor distributor, more than doubled pre-tax profits from £1.06m to £3.01m in the first half of 1994, boosted by

In August 1993 Sanderson bought Skipper Group from RTZ for £14m and in April this year it acquired Petrogate for some £5.5m plus its debt of just under £11m. These lifted the number of the group's dealerships from 12 to 33. Of this, 24 are car dealerships and nine

Operating profits rose to £3.39m (£1.25m), including £864,000 (£75,000) from acquisitions. Turnover advanced to (£4.86m) from acquisitions.

The number of new commercial vehicles sold jumped to 1,564 (200), while new cars sold rose to 6,490 (2,925). However, Mr Tony Bramall, chairman and chief executive, said that the group's main profit centres were ite after-sales business, the value-added packages underpinning its new and used car sales, and the used car operations. Used cars sold increased to 5,440 (1,780).

Mr Bramall explained that the used car operations bene-

Fall in UK sales pushes Magnolia to £0.3m loss

Following its warning in June that first half performance would be disappointing, Magnolia, the picture frame and reproductions company, turned in a loss of £309,000 against a profit of £76,000 last time and announced a rationalisation in its UK operations.

Turnover for the six months to June 30 was down from £9.05m to £8.41m.

This was largely as a result of a decline in the UK market for traditional wooden mouldings, said Mr David Wallrock, chairman. Demand had been in steady decline throughout the recession and continued to be suppressed by the flat bousing

COMPANY NEWS: UK

Bemrose rises to £2.7m and makes £2.3m buy

By Caroline Southey

ems chee

Bemrose, the security and promotional printer, announced a 6 per cent rise in interim profits as well as the acquisition for an initial £2.3m of a company which sources, imprints and supplies promotional products.

Pre-tax profits for the six months to July 2 rose from 22.55m to £2.7m on turnover up 56 per ceni st £48.1m (£30.8m). More than 50 per cent of sales are generated in the US where Bemrose is now tha largest supplier to the US advertising speciality market following s

series of acquisitions.
"We have mada a positive start, with substantially increased sales from our enlarged group," Mr Roger Booth, chairman, said. Order books were strong and second half trading would be substantially greater than that seen in the first half, he said.

A seasonal bias to Bemrose's results, which saw 75 per cent of the company's earnings generated in the second half of last year, has been further exagger-ated by acquisitions, including McCleery-Cumming, the second largest US publisher of advertising calendars.

Acquisitions over the last two years have increased the

Rhino runs deeper into red at midway

By Gary Evans

Shares in Rhino Group, the USM-quoted specialist video and computer games retailer, fell 5p to 27p yesterday, after the group reported a sharp increase in pre-tax losses from £263,000 to £1.37m for the first

half of 1994. Mr Bcv Ripley, chairman. hlamed the setback on the strong seasonality of Rhino's subsidieries. Future Zone Stores and Downpace. However, he expected the second half to again benefit signifi-cantly from Christmas trading - 1993 profits totalled £2m.

First-half turnover jumped to £17.5m (£3.6m) reflecting Rhino's growing number of stores. Future Zone now oper-ates from 90 retall outlets, against 28 a year ago, and the group expects to have at least 110 stores trading during Christmas.

Because of the seasonality of the business, no interim divi-dend has been declared. Losses per share were 1.21p (0.45p). Mr Ripley estimated that so far this year the UK computer and video games market had declined by about 14 per cent, although this trend had not been consistent across the varions product ranges. He added that Rhino's share of the UK software market had now

risen to about 12 per cent. The company intends to apply for a full listing, following publication of its 1994 annual report.

Coffee futures touch fresh 8½-year highs

By Allson Maltland

Coffee futures in London briefly burst through their recent 81/2-year high yesterday morning as continued drought in Brazil and signs of falling consumer stocks raised fresh concern about supply short-

The November contract rose to \$4,089 a tonne, just above the peak of \$4,085 reached during the trading day following the second severe frost in Brazil in early July. These levels are the highest the market has

ably above \$4,000 for the rest of the day, closing up \$107 at \$4,039 a tonne. Mr Robert MacArthur, bead

of the Tropical Trader Group at Merrill Lynch in London, said the dry weather had now lasted as long as the serious drought in the mid-1980s. Coming on top of the two frosts, the persistent dry spell was adding to fears about the likely shortfall in next year's crop from Brazil, the world's largest producer.

In addition, Colombia bad

year and would have to draw down its internal stocks to meet domestic demand, while US stocks were dwindling.

The market's done ver well in fair volume," he said. "It looks as if the trend is still for higher prices as we move

London was buoyed by a strong performance by arabica futures in New York to match that of Friday. In early trading, New York wae up nearly 9 cents. By the afternoon, the cents higher at 226.75 cents a

More aluminium gains forecast

By Richard Mooney

The aluminlum market appears determined to move higher", according to Billiton-Enthoven Metals, And It says in its latest Metals Report that it "is likely to continue to do so in the final quarter of [this] year and beyond, providing the drawdown in LME [London Metal Exchange] stocks contin-

Billiton notes that the aluminium markat bas been in deficit for several months, taking stocks held in LME registered warehouses 278,475 tonnes, or 10.5 per cent, below the record lavel reached in mid-June. A less marked reduction in producer stocks in member countries of the International Primary Aluminium Institute has been attributed to seasonal factors, the report says, "and further declines are

It points out, however, that the production slow-down foliowing the multilateral agreement reached earlier this year to curb output has been "rather disappointing". In June the operating rate, as reported by the IPAL was down only 100 tonnes a day and in July it was ing," says Bliliton, "to see

> Having burst through the \$1,600-a-tonne harrier on Friday the three months delivery position ran into overhead resistance and what traders described as "producer-type selling" after moving up to \$1,615 a tonne in early trading. It dipped below the \$1,600 mark a couple of times before closing \$6 down on the day at \$1,602.50 a tonne

Traders said they were looking for further big falls in LME stocks to confirm aluminium'e "unside credentials".

Traders sceptical about cocoa output curb

Plans by the International Cocoa Organisation (ICCO) to cut cocoa ontput by 375,000 tonnes over the next five years look good on paper hut will have little immediate impact on the market, London traders said yesterday, reports Reu-

Members of the organisation agreed on Saturday to implement a five-year plan aimed at cutting 75,000 tonnes a year, beginning in the 1994-95 sea-son, in an attempt to bolster

They are good intentions but Indonesia is not part of the agreement. . and as a cooce producer it has the growth record," ona pointed out. However, Mr Gny-Alain Gauze, Ivory Coast's commodi-

ties minister, told reporters after the ICCO talks ended in London on Saturday that "Indonesia has said it will not take any decision against producers". Indonesian observers at the

talks said they were monitoring the progress of the production management plan and, based on that, would eventu-ally decide whether or not to join the pact. Indonesia, which is forecast

to produca about 250,000 tonnes cocoa during the 1993-64 season, has registered an average growth rate of 20 per cent a year over the past five years. Apart from the question mark over Indonesia, traders

sald the voluma of stocks available to the market would also offset any attempt to cut There are many stocks to

get rid of," said one, "There has been a lot of cocoa surplus in the world and producers get impatient for higher prices," one said. If the plan does materialise.

"it will be interesting to see how they implement it and finance it", commented a London-based analyst.

Britain sees catches in EU fish plan

By Alison Maitland

Britain said yesterday that it smelled "a stinking fish" in European Commission plans for opening up European Union waters around Ireland to the Spanish and Portuguese fishing fleets in 1996.

Mr Michael Jack, UK fish-eries minister, sald Britain would call on the commission at next week'e fisheries council in Brussels to rethink proposals that were "a bureaucratic and administrativa night-

The government has come under strong pressure from the fishing industry to oppose the plans, which are designed to share out access among mem-ber states to waters lying west of the UK, France and north-west Spain.

Mr Jack said British fisher-

so complex that the huge Spanish fleet would be able to flout them with impunity. "There's a very real worry that in some way an increase in Spanish fishing effort will be unleashed un these sensitive waters and there will be no means of con-

trolling it," be said. When they joined the community, Spain and Portugal were barred access to the so-called Irish Box, which covars the waters immediately aurrounding Ireland. That exclusion ends on December 31 next year, although they will still not be allowed to fish in the Irish Sea for species subject to quotas. They will also

The commission has tabled two draft regulations covering accesa to the EU's "Western

men feared the new rules were waters" for all member states and monitoring compliance by individual vessels with the new rules. ft agreed the rules would not cause member states to lose quota and would entail no increase in fishing. However, its proposal to allo-

cate countries with a fixed number of fishing days has run foul of the British government. which says its position is backed by Ireland and France. in a letter to 48 members of parliament from fishing con-Mr Jack questioned the way the allocation of days - known

"It is not clear that the allo-cations of SVDs set out in the remain barred from tha North proposal would represent equitable allocations among member states or respect relative

been calculated.

been allocated enough days to fulfil its quotas, whereas lreland might have been

granted too many. He added that the proposals for monitoring compliance were complex and would impose "excessive burdans on our fishermen."

Britain is particularly unhappy that the commission has left it up to member states to allocate days to individual vessels in their own fleets - a highly sensitive task - without prescribing how this should be lecided.

The council on September 28 is unlikely to decide this issue, which could drag on into next year. Mr Jack sald Britain would present a "practical and simple" alternative, but he was unable to give details before

St Lucia hit hardest as tropical storm devastates Winwards banana crops

By Canute James in Kingston, Jamaica

Tha banana industry in the Windward fslands, the main source of British imports, was davaetated by the tropical storm that passed through the eastern Caribbean ten days ago. Shipping schedules will be disrupted, according to government and industry officials.

The islands - Dominica, Grenada, St Lucia and St Vincent - will lose millions of dollars in exports earnings and could also lose some share of the market because of the damage, the industry officials said. St

Lucia, the largest producer in the group, has been tha hit hardest.

"All of our banana, coconut and cattle production has been loet, small gardens are destroyed and the roads are flooded," said Mr John Compton. St Lucia's prime minister. Banana exports provide tha island with income of about US\$60m a year, representing just under a half of all its for-

eign earnings. The Windward Islands Crop Insurance Schema (Wincrop), an agency which insures the region's agriculture, says it is receiving hundreds of claims

cent and 2 per cent over three

years, plus signing bonuses of

C\$1,000 in the first year, C\$500

in the second and up to C\$500

following the storm.
"We are receiving claims now mainly from Dominica, St Lucia and St Vincent," said Mr Kerwin Ferreira, Wincrop's

"St Vincent's loss is of a fair level, Dominica's significant, and I would say St Lucia is very, very, very bad." The losses in the Windward Islands will disrupt suppliers to the UK, according to a St

Lucian government official. The loss for the four islands will not only be in export earnings but also in market share. he said. There is concern in the

Windward Islands that any reduction in shipments from the region will benefit Latin American exporters, who will fill the shortfall. Latin American producers had earlier attacked the new European Union import regime, which allows duty free entry to Carib-

been fruit. "The has come at a very bad time for the Windwards' industry," sald the official. "We might not be able to recapture our markets aftar this. Tha only consolation is that if we start replanting now we will have export fruit ready in a

Settlement eases Canadian wood strike fears

IWA-Canada, representing 15,000 British Columbian coastal area woodworkers, has resched a settlement with employers that should also set a pattern for woodworkers in the interior and the pulp and

paper mill workers. The pact, to be ratified by get priority in hiring for the province's forest renewal pro-IWA members over the next gramme two weeks, providae pay increases of 3 per cent, 3 per

Originally the IWA sought 18 per cent over three years. Forest Industrial Relations, negotiating for the companies, said the deal would be costly share the benefit of strong timber markets. Talks with the interior woodworkers and two different unions representing the pulp

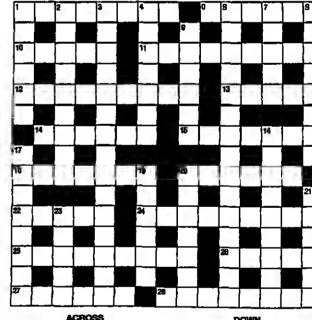

and paper mill workers resume

this week and hopes are high

that a strike can be averted.

MARKET REPORT

Little strength behind nervous rally in shares

By Terry Byland, UK Stock Market Editor

Securitles markets in London rallied yesterday but trading vol-ume was subdued and concern over the outlook for interest rates in the US and Germany remained high. Gains were trimmed towards the close when UK bonds reacted to sterling weakness in the face of a strong US currency.

The FT-SE 100 index continued to move between two important trading benchmarks, dipping to 3,048.3 in early dealings and then rising to 3,085.3 at the day's best. The final reading of 3,079.1 showed a net gain on the day of 14 points. The December contract on the Footsie, now the lead player in stock index futures, regained a premium against the underlying cash market.

Analysts saw little change in mar-ket sentiment yesterday. The focus remained very much on the US interest rate outlook, with investors showing nervousness ahead of a speech from Mr Alan Greenspan, chairman of the Federal Reserva and of the possibility of a move on rates at the meeting of the Federal Open Market Committee next week. The next rise in US interest rates was seen as a matter of timing.

Although shares opened lower, it was clear that Friday afternoon's selling bout had blown itself out, at least for the present. The long end of the gilt-edged market, which reflects inflation worries, improved, but falls in the short dates, more closely linked to base rate prospects, indicated underlying fears. With turnover relatively poor, it was the blue chip, dollar-orientated,

stocks which saw most of the recovery. The FT-SE Mid 250 Index, covering a wide range of ahares. slipped 8.1 to 3,608.

Seaq volume totalled only 469.1m shares, down more than 17 per cent from Friday when, despite the shakeout in share prices, retail, or genuine investment activity in equities was worth only £1.2bn, a modest total by recent daily averages. London was keeping a wary eye

on the trading screens for the announcement of the latest M3 money supply data due this week from Germany. "A further tighten-ing in Federal Reserve policy has probably been priced into the market, but any sign of tightening by the Bundesbank will send markets plunging," said one leading analyst. This week also brings hurdles for the stock market in the shape of the

UK M4 lending figures and non-EU trada statistics. At the end of the week, markets will be poised for the US August durable goods orders, which fell sharply in the previous month but are expected to show a renewed surge and thus fuel fears that the Federal Reserve may feel obliged to tighten policy more quickly than markets anticipate. On

Friday, the latest estimates of UK

gross domestic product will also

throw light on the progress of eco-

LONDON STOCK EXCHANGE

nomic recovery in the UK. The London stock market paid little heed yesterday to comments from Mr Kenneth Clarke, the UK chancellor of the exchequer, that he would continue to adjust interest rates so as to sustain recovery. A rise in mortgage rates by the Halifax building society, while no surprise in view of last week's rise in day's widespread shakeout.

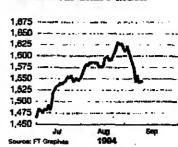

base rates and similar moves by other building societies, kept the market focus on the near term outlook for domestic interest rates. Gains in leading oil and pharmaceutical stocks gave a good lead to

the Footsie index, but owed some of

their strength to the dollar rather

than to investment activity in the London stock market. Retail and consumer issues had a more uncertain session, with some struggling to recoup a little of Friday's losses while others gave further ground. Construction issues, also closely linked to interest rate perceptions traded narrowly with losses among those with interests in the German economy. But traders stressed that much of yesterday's activity reflected little more than a tidy ing up operation in the wake of Fri-

plus rights issue to finance a \$1.5 bn US acquisition was put forward by traders as the reason behind the marked weakness of Arjo sharas which retreated around 8 to 258p after turnover of 2m shares,

Snop, Great Livernal, Ricenses, Petricige Pine Arts, Scrinkaue, 619PO-617 IERNA, 7, P. BSM, Courts Consulting, MR Data Man, Macro 4, CtS Int. Inspection, Stat-Plus, Burgard Data, TEXTILES & APPAREL, (5) Hagger (J), Lamont, TRANSPORT (5) Transport Dev. Vard, AMERICANS (6).

There were plenty of good

performers in the utilities sec-tors, notably the Recs where East Midlands came in for strong support, closing 16 higher at 737p and London Electricity 12 higher at 700p, the latter after talk of heavy demand from Goldman Sachs, the influential US investment

A NatWest Securitles bny recommendation triggered good support for Sonthern Water, which moved up 10 to

MAI, the financial services and media group, came under fire in the stockmarket after releasing mildly disappointing

preliminary results. The shares dropped 13 to 255%p. The banks were in the forefront of the market's mid-session rally but turnover in tha sector was well down on recent levels. "The market got Itself short of these things, and that was it; there was no weight of buying, simply a mark-up,'

Royal Bank of Scotland was the sector's outstanding performer, the shares climbing 9 to 4170 after talk that Mr Peter Wood, chief executive of Royal Bank's hugely successful Direct Line insurance company had met with banking analysts at Credit Lyonnais Laing,

said one dealer.

Royal Bank's broker, ICI had a buoyant day and pushed up 9 to 842p. Activity was strong in Coats Viyella with 3.4m shares changing hands. The price improved 6 to 208p as one analyst sald that bnyers were

returning to the stock after its

relatively weak performance recently.

19.01

3081.0

Peel Holdings was the one noticeable mover among property shares, rising 4 to 261p on hopes that its plans for a big shopping development in Manchester may finally get the go-ahead next year.

Further consideration of the trans-Atlantic fare wars sparked last weement k by Continental Airlines of the US, led to a 2% decline (for 9 in two sessions) to 380p at British Air-

Eurotunnel gained 5 to 279p on the announcement that its overture Shuttle service would finally start on or around November 15.

After a bounce last week Carlton Communications slipped back 4 to 850p after a very mixed trading day in the media sector. A combination of profit-taking and reaction to recent presentations by the company to analysts was put behind the fall.

Recouping half of Friday's losses, British Aerospace rose 6 to 479p ahead of tomorrow's announcement of intarim results. Traders are looking for a strong profits recovery, possibly to £75m pre-tax after £20m

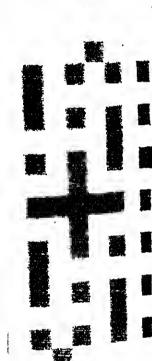

British Steel was again in demand, moving up 3% to 156%p on the back of autumn price rises ranging from 3 to 7 per cent.

MARKET REPORTERS: Steve Thompson, Jeffrey Brown, Christine Buckley.

MARKETS REPORT

Swedish krona up

The Swedish krona rebounded from early drops yesterday to consolidate an overall gain after a general election returned the Social Democratic party to power on Sunday, writes Motoko Rich.

Against the D-Mark, the Swedish krona finished at SKr4.805, np from SKr4.828. During the day the Nordic currency dipped as low as Skr4.88 as markets were disappointed in the SDP's failure to achieve a majority of parliamentary

The dollar remained range bound but recovered some of its Friday losses on the back of a spate of short covering in the European afternoon. In London, it ended up against the D-Mark at DM1.5528 from DM1.5376 though down against the yen et Y98.7650 from Y98.8550.

Sterling had lost some of its lustre in the aftermath of last week's interest rate rise, as it lost ground against the dollar and the German currency. The pound closed in London at DM2.4347 from DM2.4356 and \$1.568 from \$1.584.

■ The week opened oo a quiet note as market-moving eco-nomic data were in short supply end currency traders turned their ettention to political and technical factors. Ballot results from Sweden's general election on Sunday catapulted the krona into the

limelight. In early trading the krona dipped against the D-Mark as markets were left uncertain about the prospects for a centre-left coalition, which inves-

tors would prefer. The markets were cheered after a speech by Mr Ingvar Carlsson, prime-minister designate and leader of the SDP, in which he said he wanted to introduce new parliamentary procedures to allow parliament to fix a total budget ceiling. Analysts sald the markets will be keen to see if Mr Carls-

soo's government can control Sweden's budget deficit. "If the new leadership fails to turn around the deficit, there will be a sell off of the Swedish krona," said Mr Neil MacKinnon, chief ecocomist at Citibank. "Right now the cur-

rency is in a honeymoon period."
The markets appeared to continue the Scandinavian theme as they drove the Finnish markka to its highest

level against the D-Mark this year, et FM3.1775. This regional focus is likely to continue this week as traders look to the general election in Denmark tomorrow. Mr MacKinnon said he anticipated the Danish krone reaching as high as DKr3.85 against the D-Mark. Yesterday in London it finished et DKr3.938.

Technically driven trade urged the dollar back up against the D-Mark. After testing the US currency's down-side on Friday, the markets took the absence of any dramatic follow-through as a sign that it was safe to consolidate positions and raise the dollar on short-covering.

Mr Adrian Cunningham, senior currency economist at UBS, said be expected the dollar to remain within a fivepfennig range against the D-Mark, between DM1.5250 and DM1.5750, "That range should hold until a fundamental catalyst from outside arrives."

He said that a catalyst would most likely come from the trade talks between the US and Japan in advance of the September 30 deadline for sanctions. If the talks go well, the dollar should benefit. US officials were optimistic

2.026 1.059 1.220 0.417

5.448 2.846 3.281 1.121

that a Japanese fiscal reform package, expected this morn-ing, could help to correct the

■ Sterling continued to show some independence from the dollar, though to its detriment. While the US currency enjoyed a rebound, the UK currency trickled down against the D-Mark and lost its sixteen month high against the dollar. But Mr Malcolm Barr, international economist at Chemical Bank, did not think the pound would remain detached from the dollar for long. There may have been a bit of de-coupling of sterling from the dollar, but I would be sceptical of saying that it will con-tinue," he said.

■ The German currency wae looking vulnerable as it wavered on the crosses. It gave up its gains against the Italian lira and finished at L1010 from L1011. Against the French franc, it closed et FFr3.416 from FFr3.418.

Mr Cunningham said the markets were retreating from the D-Mark because of a growing belief that the Bundesbank will soon raise the discount rate by 25 basis points.

A report from the Bundes-

bank stating that Germany is on course for economic growth free of inflation spurred further speculation that a spate of monetary loosening could be in

■ In the UK money markets, the Bank of England forecasted a £500m shortage and initially provided £200m assistance et established rates. Later it pro-vided liquidity of £300m at established rates. Overnight money traded betwee 2 1/2 and 5 per cent. The September short sterling

contract, which expires tomor-row, traded 5,800 lots to finish et 94.15 from 94.16. The December Euromark contract traded 40,660 lots and settled at 94.66

Coca-Cola leads advances at midsession

Wall Street

US stocks battled back yesterday morning, retaking much of the ground lost at the end of last week, in spite of a noncommittal bond market, writes Frank McGurty in New York.

By 1 pm. the Dow Jones Industrial Average was 12.45 ahead at 3.945.80, white the more broadly based Standard & Poor's 500 was 1.51 better at 472.70. Volume on the Big. Board was light, with 148m shares traded by early after-

In the secondary markets. the American SE composite was up 0.87 at 460.73, and the Nasdaq composite was 0.65 higher at 778.56.

A dearth of fresh economic news allowed the market to put aside its concerns over the pace of economic growth and coucentrate on a few favourable developments for key individual stocks.

The bond market was marginally supportive in that it managed to steady itself after Friday's rout. By mldday. prices on the inflation-sensitive loug end were edging higher in lacklustre activity. However. the overall tone remained negative in view of last week's stronger-than-expected readings ou industrial production and capacity utilisation.

Sectiment was decidedly more positive in stocks, as it had been on Friday. The Dow industrials were showing surprising buoyancy during a morning when only slim gains had been expected.

Coca-Cola was one of the companies fuelling the advance. The stocks climbed \$1'. to \$49 oo the company's announcement that its thirdquarter sales volume would likely to approximate expecta-

Exxon was also giving a boost to the blue-chip index. The stock gained \$11 to \$60 after a jury ordered the energy group to pay \$5bn as punish ment for its responsibility for the 1989 Exxon Valdez oil spill. The award, which had been announced late on Friday, was not large enough to damage the company's long-term performance, analysts said.

The court decision prompted Bear Stearns to lift its rating on Exxon. But the securities house downgraded Atlantic Richfield, and its share price back-tracked \$2! to \$1011/2 as a result.

Elsewbere, Time-Warner was marked up \$1% to \$38 on a published report which raised the possibility of the media group's merger with General Electric. GE, which later denied such a move was under consideration.

slipped \$\% to \$50\%.
The NYSE's most active list was led by Digital Equipment. The stock jumped \$1% to \$26% after Cowen & Company issued a "strong huy" recommenda-tion, citing confidence that the computer company would soon return to profitability.

Canada

Toronto built on the strength of blue chips to move higher and the TSE 300 composite index was 28.02 higher at 4.431.87 by noon, in volume of 30.0m shares.

Toronto's utilities group added 54.14, or 1.5 per cent, to 3,614.64 on gains in telephone company shares following a Canadian Radio-television and Telecommunications Commission ruling allowing then to enter some multimedia marexceed analysts' projections, kets and raise local rates.

There was a further spate of turbulence among the European markets on Friday as Wall Street reversed the strong gains seen the day before. But even in a week of generally negative news one or two of the world's equity markets managed a climb into positive territory. Italy's near 4 per cent rise, for instance, assisted by expectations of good news from the forthcoming half year results season, restricted the European component of the FT-Actuaries World indices to a 1.7 per cent fall on the week, still 2 per cent up in dollar terms since the start of the year.

since the start of the year.
Tomorrow sees the release of the French budget, while Denmark goes to the polls on the same day, two events which are likely to affect the financial markets. According to Bikuben Securitles the parilamentary elections in both Sweden and Finland are likely to have only limited, short-term effects on the markets. Of greater importance will be the EU referendums, they say, while on the longer outlook they expect a more positive tone to prevail.

Hochtief, Holzmann draw interest in Frankfurt

The continental bourses went their own diverse ways yesterday for no apparent reason. FRANKFURT retreated a fur-

ther 1 per cent but turnover was low. The Dax index fell 21.97 during the official session to 2,096.76, recovering slightly in the post-bourse to 2,100.55. Turnover was DM5.5bn.

Some brokers have become cautious on Germany as the shadow of the federal election on October 16 has begun to be cast over the country's finan-cial markets. Merck Finck remarked that since December 1993 the Dax had moved in a range between 2,000 and 2,270, while during that same period volatility had risen. It expected this sideways trend to continue ahead of next month's polling.

BNP analysts were more positive on a six month view, having upgraded weightings in cyclical and financial shares, underweighting domesticallyorientated companies, and observing that the market remained attractive on an earnings yield basis. BNP had

a target of 2,660 for the Dax hy the end of next year. performance also providing a late fillip. The SMI index rose The main news was an announcement in the contruc-

tion sector that Hochtief intended to raise its 20 per cent stake in Holzmann to 30 per cent. The former's shares put on DM4 to DM1,030, while the latter rose DM19 to DM882. Hochtief said that it would purchase the stake from BfG Bank. Holzmann, the country's largest construction group, later said that it was willing to co-operate with Hochtief, but would maintain its indepen-

PARIS edged down a notch as investors awaited tomorrow's budget, even though most of the proposals have already heen factored into prices. The CAC-40 index lost 1.72 to 1,922.87. JP Morgan commented that given the expected neutral

stance of the hudget there was unlikely to be a significant effect on sectors. Investors were instead keeping an eye on the presidential elections, scheduled for May 1995, after which key decisions on reducing the deficit would be made. ZURICH turned higher with Roche and Nestlé leading the way and Wall Street's morning

FT-SE Eurotrack 100 1354.32 1354.35 1354.93 1351.81 1352.51 1354.06 1356.02 1356.96 FT-SE Eurotrack 200 1400.57 1401.75 1402.16 1399.51 1400.71 1401.21 1404.20 1404.55 Sep 15 Sep 15 Sep 14 Sep 13 1358.S1 1368.54 1406.25 1415.84 1360 68 1401.55 11.4 to 2,614.7. Nestlė registered rose SFr13 to SFr1,213 in response to Friday's first half figures and as Goldman Sachs from a loss of SFr25m to a raised its rating to moderate profit of SFr30-35m.
